Liquor Control Board of Ontario

454 UNIVERSITY AVENUE, TORONTO 2, ONTARIO.

February 20th, 1935.

TO THE HONOURABLE MITCHELL F. HEPBURN,
Prime Minister and Provincial Treasurer of Ontario,
Parliament Buildings, Toronto 5, Ontario.

Sir,—

I have the honour to submit herewith the Eighth Report of the Liquor Control Board of Ontario for the year which ended the 31st of October, 1934.

FINANCIAL STATEMENT

Included therewith is the Balance Sheet and Profit and Loss Account prepared and certified to by Messrs. Brokenshire, Scarff & Company, Chartered Accountants.

The Balance Sheet shows the amount of fixed assets to be \$156,441.78. This item includes the value of the Board's real estate, consisting of the land and buildings situated at 154 Wellington Street West, Toronto, and 201 Victoria Avenue, Fort William, occupied as warehouses, less the depreciation on buildings which since the commencement of the Board's operations in June, 1927, until October 31st, 1934, has been provided, out of the Board's profits, to an extent of \$170,384.56. Included also is the value of furniture, fixtures, equipment and alterations in the various premises occupied by the Board, less the amount written off.

Other assets totalled \$2,812,744.49, being comprised of the following items:—

Cash on hand and in transit from branch banks	\$ 400,488.04
Accounts Receivable—hospital charge sales, beer levies, duty recoverable items, freight claims, fines, etc.	256,088.52
Inventories of liquors and supplies	2,131,924.16
Prepaid insurance, etc.	24,243.77

Liabilities amounted to \$1,724,710.70 as follows:—

Accounts Payable—for liquors and supplies, accrued charges, etc.	\$1,700,430.80
Due Provincial Treasurer—(for permit sales and confiscated stock)	24,279.90

It will be observed that sales of permits during the year amounted to a net figure of \$435,043.13, which with the amount unpaid from the previous year of \$2,799.45, totalled \$437,842.58, of which \$430,000.00 was remitted to the Provincial Treasurer, in accordance with the requirements of the Liquor Control Act of Ontario, Section 17 (2).

The item of \$16,437.32 represents a balance due to the Provincial Treasurer for forfeited liquor which was purchased by the Board after careful examination, and in accordance with the provisions of Section 114 (2) of the Act.

Contingent liabilities amounted to \$1,331,081.09. These items comprise principally the value of undelivered orders and, also, the amount of customs or excise duties which will have to be paid on the goods which were in bond on our premises on October 31st, when same are cleared. These items are not chargeable against, nor do they affect the operations of the Board for the year under review.

The Profit and Loss Account shows sales of \$27,752,675.40. These sales include all sales made through the Liquor Control Board Stores for the year, and the sales of beer made from breweries, and brewers' warehouses up to and including July 23rd, 1934. On the following day the Amendments to the Liquor Control Act became effective, and as a change was made in the Board's levy on beer from a value basis to a gallonage basis, sales of beer from breweries and brewers' warehouses on and after July 24th have not been included in the total sales figure in the Board's profit and loss statement. These sales, from July 24th to October 31st, 1934, amounted to \$8,340,981.65. The sales of beer from breweries and brewers' warehouses during the entire twelve months totalled \$17,113,835.25.

The Account shows a gross trading profit of \$6,628,744.07 and a net trading profit of \$4,385,548.17. This latter sum together with other revenue which amounted to \$1,558,254.50 resulted in a total profit of \$5,943,802.67, which is carried to the Surplus Account.

For the purpose of comparison, the percentage that the cost of stocks sold, miscellaneous earnings and expenses and other revenue bear to the total of gross sales are given for the years 1933 and 1934.

The Surplus Account shows a balance at the commencement of the year of \$422,959.92, this being the amount of accumulated profit from previous years' operations which had not been transferred to the Provincial Treasurer. It was represented by the net assets of the Board. Added to this is the year's profit of \$5,943,802.67 and also the amount refunded to the Board from the Superannuation Fund which with, certain Accounts Payable adjustments—both items totalling \$47,712.98—resulted in an amount of \$6,414,475.57 from which was remitted to the Provincial Treasurer \$5,170,000.00. The total payments to the Provincial Treasurer during the year were therefore,—

On account of profits	\$5,170,000.00
On account of permits	430,000.00
	\$5,600,000.00

Besides the Balance Sheet, Profit and Loss Account, and Surplus Account, statements showing summary of sales and the expenses of administration and operation for the twelve months are also attached. Total expenses for the year amounted to \$2,242,651.57 as against \$2,306,758.72 during the preceding year. Again, for the purpose of comparison, the individual percentage which all these

expenses bear to the total sales is given for both periods on the expense statement. On October 31st, 1934, the staff comprised 904 employees as against a staff of 1066 at the end of the previous year.

In addition, all Liquor Board stores, brewers' warehouses, breweries and wineries privileged to sell alcoholic beverages in Ontario as of October 31st, 1934, are set forth on Schedule III attached; a classification of permit and license sales appears on Schedule IV, with a summary of authorities issued on Schedule V.

SALES

The sales of spirits, beer and wine from liquor stores during the twelve months together with the sales of beer to permit holders from breweries and brewers' warehouses from November 1st, 1933, to July 23rd, 1934, amounted to \$27,752,675.40, of which \$18,979,821.80 was sold from the liquor stores and \$8,772,853.60 from breweries and brewers' warehouses. In addition, sales of beer from breweries and brewers' warehouses from July 24th to October 31st totalled \$8,340,981.65, which amount should be taken into consideration in making comparisons with prior years.

For purposes of comparison, we have tabulated below the figures showing sales on a value basis, and also on a gallonage basis, of the various classes of goods sold during the year and also during the previous year.

VALUE

	1932-33	1933-34	Difference	Percentage
Domestic Spirits.....	\$8,745,731 82	\$9,506,957 29	\$761,225 47	Inc. 8.7
Imported Spirits.....	5,673,806 21	4,788,821 57	884,984 64	Dec. 15.6
Domestic Wines.....	2,207,466 75	2,284,755 75	77,289 00	Inc. 3.5
Imported Wines.....	555,503 40	601,919 38	46,415 98	Inc. 8.3
Domestic Beers.....	1,399,296 28	1,713,887 71	314,591 43	Inc. 22.5
Imported Beers.....	91,241 40	83,480 10	7,761 30	Dec. 8.5
Total sales from Liquor Stores..	\$18,673,045 86	\$18,979,821 80	\$306,775 94	Inc. 1.6
Total B. & B. W. sales (Domestic Beer).....	11,470,201 40	17,113,835 25	5,643,633 85	Inc. 49.1
	\$30,143,247 26	\$36,093,657 05	\$5,950,409 79	Inc. 19.8

GALLONAGE

	1932-33	1933-34	Difference	Percentage
Domestic Spirits (Gallons).....	551,195	608,532	57,337	Inc. 10.4
Imported Spirits.....	262,975	223,645	39,330	Dec. 14.9
Domestic Wines.....	1,064,349	940,690	123,659	Dec. 11.6
Imported Wines.....	65,775	71,433	5,658	Inc. 8.6
Domestic Beers.....	742,448	954,691	212,243	Inc. 28.6
Imported Beers.....	24,390	22,344	2,046	Dec. 8.4
Total sales from Liquor Stores..	2,711,132	2,821,335	110,203	Inc. 4.1
Total B. & B. W. sales (Domestic Beer).....	6,724,222	10,936,751	4,212,529	Inc. 62.6
	9,435,354	13,758,086	4,322,732	Inc. 45.8

Following the repeal of the 18th Amendment to the Constitution of the United States, the imposing of a low rate of excise duty on domestic spirits and the comparative unrestricted sale of alcoholic beverages in those States adjoining Ontario, the difficulties of liquor law enforcement in Ontario increased. It was brought to the Board's attention that spirits from the United States were being smuggled into Ontario. In order to combat this illicit traffic, the Board, after negotiation with the Canadian Distillers, arranged for the distribution and sale of a number of brands of Canadian Dry Gins and also Rye Whiskies at lower prices than previously in effect.

DOMINION TAXATION

The Dominion Customs and Excise levies continue to be a major proportion of the cost of liquor and any substantial reduction in the Board's selling prices is contingent on a reduction in the imposts of the Dominion Government.

During the year under review, the Dominion Government received for Customs and Excise Duties, Excise Taxes and Sales Taxes on alcoholic beverages, purchased by the Board, \$5,001,798.44. In addition, there was indirectly paid to the Dominion Government for Malt Duties, Excise and Sales Tax on Domestic beer, sold in Ontario, an amount exceeding \$2,500,000.00. Dominion Taxation on native wines sold from the Ontario wineries direct to consumers approximated \$65,000.00.

STORES

The number of liquor stores in operation on October 31st was 124; unchanged from the preceding year.

BREWERS' WAREHOUSES

An additional brewers' warehouse was opened at Casselman on September 15th, 1934. This increased the number of warehouses to 103 on October 31st.

Four warehouses were transferred to new locations.

BREWERIES

On February 24th, 1934, the Welland Brewery, Limited ceased operations, and on March 31st, 1934, the Budweiser Brewery, Limited closed.

On August 11th, 1934, the Board licensed Drewrys Limited of Winnipeg, Manitoba, to sell in Ontario.

On October 31st there were 30 Ontario, 4 Quebec and 1 Manitoba breweries licensed to sell their products in Ontario.

The following table shows the gallonage of domestic beer sold in Ontario during the fiscal years from 1930 to 1934 inclusive:—

	1930 Gallons	1931 Gallons	1932 Gallons	1933 Gallons	1934 Gallons
Sales from Liquor Stores' stock	781,618	737,609	689,150	682,810	896,529
Beer orders taken at Liquor Stores for delivery by breweries and brewers' warehouses	138,594	105,884	75,669	59,638	58,162
Sales from breweries and brewers' warehouses	10,056,562	9,558,801	7,813,741	6,724,222	10,936,751
Total Ontario Sale of Domestic Beer	10,976,774	10,402,294	8,578,560	7,466,670	11,891,442
Sales to other Provinces	1,525,628	1,440,440	1,148,273	1,467,854	1,444,135
Export Sales	554,997	8,850	143,182	63,207
Total	2,080,625	1,440,440	1,157,123	1,611,036	1,507,342

WINERIES

During the year 15,500 tons of grapes were used in the manufacture of wine, concentrates and grape juice—12,670 $\frac{2}{3}$ tons for wine—353 $\frac{1}{3}$ tons for grape juice and 2,470 tons for concentrates. For distillation into brandy spirit 111 tons of grapes were used and 50 tons of cherries used to manufacture cherry wine.

Following negotiations between the grape-growers, wine-manufacturers and the Board, it was agreed that the manufacturers would pay the growers a minimum price of forty dollars per ton for all blue grapes, and fifty dollars per ton for the other varieties purchased during the season.

It is noteworthy that during the year under review, which is the second year in which the manufacture of grape concentrates has been carried on, the tonnage of grapes used for this purpose was 2,470 tons compared with 862.25 tons in the previous year.

The Provincial Department of Health continued its analytical work with respect to native wines, as well as the supplying of yeast cultures when requested; fifty-seven cultures having been sent out to eighteen wineries.

Lectures on fermentation and yeast cultures were given to representatives from various wineries during the year by the Provincial Chemist, Mr. A. R. Bonham.

The Department also carried out analyses of the various brands of native wine which were being sold by the wineries. In all 549 samples were analysed.

Shortly after the close of the fiscal year, the Board listed for distribution and sale, two brands of Canadian brandy. The selling price thereof is less than the amount charged for the imported brandies. Undoubtedly this opens a new avenue of sale for Ontario grapes.

At the close of the year there were 49 native wine licenses in effect. During the year the license, stock and equipment of the Regal Wine Co. Limited, were purchased by the Danforth Wine Co. Limited.

A compilation of the monthly reports submitted to the Board from 1930 to 1934 results in the following statistics being obtained relative to the gallonage of native wine sold:—

	1930 Gallons	1931 Gallons	1932 Gallons	1933 Gallons	1934 Gallons
Sale at Wineries	806,684	589,577	568,109	442,754	390,106
Sales to the Board	1,337,153	1,511,631	1,192,267	1,065,340	942,064
Total Ontario Sales	2,143,837	2,101,208	1,760,376	1,508,094	1,332,170
Sales to other Provinces	1,346,094	1,183,762	982,957	931,428	1,443,320
Export Sales	14,774	174	562	792	35,041
	3,504,705	3,285,144	2,743,895	2,440,314	2,810,531

AUTHORITIES FOR THE SALE OF BEER AND WINE

The Amendments to the Liquor Control Act of Ontario passed during the last session of the Legislature, and following Royal Proclamation on July 12th by the Honourable Lieutenant-Governor of Ontario, empowered the Board to issue

authorities for the sale of beer and wine, or beer or wine in standard hotels and such other premises as the Regulations may provide and define". The Amendments also provided that no authority should be issued in any municipality in which the Canada Temperance Act is in force, or where, upon the coming into force of the Ontario Temperance Act, a by-law, passed under The Liquor License Act, was in force prohibiting the sale of liquor by retail unless and until a favourable vote has been taken. The legislation also empowered the Board to provide for the purchasing of beer and wine by a resident without an individual permit being required.

Following the proclaiming of the legislation the required Regulations were prepared, passed by the Board, and approved by the Lieutenant-Governor-in-Council on July 18th, being published in "The Ontario Gazette" on July 21st, 1934.

The Regulations provided for the issuance of authorities to:—

- (a) STANDARD HOTELS—for the sale and consumption of beer and wine with meals in their respective dining rooms, and of beer without meals in their respective beverage rooms.
- (b) CLUBS—for the sale and consumption of beer and wine with meals in their respective dining rooms, and of beer without meals in other parts of the club premises approved by the Board.
- (c) RAILWAY TRAINS—for the sale and consumption of beer and wine with meals, and of beer without meals in railway dining cars.
- (d) STEAMSHIPS—for the sale and consumption of beer and wine with meals in their respective dining rooms, and of beer without meals in such portions of the steamship as are approved by the Board.

With respect to standard hotels, separate authorities were issued for:—

- (1) The sale of beer with meals;
- (2) The sale of wine with meals;
- (3) The sale of beer without meals in beverage room.

A similar arrangement was observed with respect to steamship authorities, and with regard to clubs and railway trains, authorities were obtainable for:—

- (1) The sale of beer;
- (2) The sale of wine with meals.

The fee for each authority was set at \$50.00, the expiration date of all authorities being October 31st, 1934.

On July 23rd, authorities were issued to 99 hotels, 3 clubs and 2 steamship companies, and actual sale commenced on July 24th in 89 hotels and 3 clubs. Additional applications were quickly dealt with and to October 31st, 1934—the end of the fiscal year—the number of hotels to which authorities were issued totalled 1053 with 173 clubs, 2 steamship companies and 1 railway company.

To ensure compliance with the regulations and the Board's requirements, a staff of 21 inspectors were appointed, and each authorised premises is subject to frequent inspection.

During the period from July 24th to October 31st, 1934, as a result of non-compliance with the Board's requirements, it was found necessary to cancel the authorities issued to 41 hotels and 3 clubs.

A summary of the various authorised premises is set forth in Schedule V which accompanies this report.

HOTELS

Apart from issuing authorities the Board is empowered by the Act to license premises in any municipality for the accommodation of the travelling public, which shall be known as standard hotels.

Supplementing the regulations previously in effect with respect to standard hotels, the Board prepared and issued a "Digest of Rules, Orders, Regulations and Legislation affecting Standard and other Hotels". In addition to incorporating therein the existing legislation and regulations relative to hotels, the Board's requirements with regard to accommodation and equipment were clearly set forth in detail, together with the Board's orders respecting the conduct, operation and furnishing of beverage rooms.

There were 1463 standard hotel licenses issued during the year of which 562 included the privilege to sell light beer. In addition, 515 non-standard hotels were subject to inspection. At all times close attention is given to the matter of fire prevention.

PERMITS

The amendments to the Act and the regulations passed pursuant thereto, which came into force on July 24th, 1934, which provided for the sale and consumption of beer and wine in authorised premises also allowed the purchase of beer and wine from liquor stores, breweries, brewers' warehouses and wineries without permits being necessary.

As a result, the Special Wine and Beer Permit was discontinued on that date. Likewise, the necessity for Sacramental Wine Permits ceased.

The number of annual liquor permits issued was 178,517 resident, and 9,783 non-resident, a total of 188,300, as against 192,894 resident and 21,762 non-resident, a total of 214,656, in the preceding year, a decrease of 26,356, or 12.27%.

Sales of Special Wine and Beer permits amounted to 102,008 resident and 2,591 non-resident, a total of 104,599, which compares with the sales during the preceding year of 108,985, resident and 9,756 non-resident, a total of 118,741, a decrease of 14,142, or 11.9%.

14,089 wine and beer permits were converted into general liquor permits. Of this number 14,009 were resident wine and beer permits and 80 were non-resident. This represented a decrease of 671 from the previous year.

On August 1st the Board authorised the issue of a Special Permit which allows a holder thereof to make one purchase of spirits of not more than twelve bottles. The fee for this Special Single Purchase Permit was fixed at twenty-five cents and the sale during the three months amounted to 77,602.

Permit cancellations during the year totalled 2,091, and revocations numbered 232. 386 preventive notices were issued with respect to permit holders, and in addition 16 persons were subject to the Board's order prohibiting the use of spirits, beer and wine. Orders of Interdiction amounted to 6.

I have the honour to be, Sir,

Your obedient servant,

E. G. ODETTE,

Chief Commissioner.

SUMMARY OF SALES

For Year Ended 31st October, 1934

Store counter and mail order sales of wines, spirits and beer	\$18,882,299 90	
Beer orders taken at stores for delivery by breweries and brewery warehouses	97,521 90	<u>\$18,979,821 80</u>
*Beer sales by breweries and brewery warehouses (1st November, 1933 to 23rd July, 1934)	8,772,853 60	<u>\$27,752,675 40</u>

*In view of the Liquor Control Board having, on July 24, 1934, changed the method of collecting their revenue on beer from the basis of five per cent. of gross sales to a levy on the gallonage produced for Ontario sale and in the case of the Quebec and Manitoba breweries, on gallons sold, the value of beer sold from brewers' retail shops and brewers' warehouses from July 24th, 1934, to October 31, 1934, was not included in the sales of the Board as set forth in the Profit and Loss Account. Such sales, however, totalled \$8,340,981 65 and should be considered in making comparisons.

SCHEDULE II

ADMINISTRATION AND OPERATING EXPENSES

For the Year Ended 31st October, 1934 and

Number of Employees on the Staff at 31st October, 1934

Ontario Department of Agriculture

REPORT

OF THE

Minister of Agriculture

Province of Ontario

FOR THE YEAR ENDING OCTOBER 31, 1934

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO
SESSIONAL PAPER No. 21, 1935

ONTARIO

TORONTO

Printed and Published by T. E. Bowman, Printer to the King's Most Excellent Majesty
1935

DEPARTMENT OF AGRICULTURE

PROVINCE OF ONTARIO

TO THE HONOURABLE HERBERT ALEXANDER BRUCE,
Colonel in the Royal Army Medical Corps, F.R.C.S. (England),
Lieutenant-Governor of Ontario.

MAY IT PLEASE YOUR HONOUR:

I have the honour to submit the Report of the Department of Agriculture for the year 1933-1934.

Farming is an occupation which requires constant study if men and women are to make any reasonable progress at it. From this we believe that Agricultural Education is perhaps the most important feature of a Provincial Department of Agriculture. By this we do not mean merely the attendance of students at Agricultural Schools or Colleges, but also the constant campaign that is carried on all over the Province by representatives of the Department of Agriculture both directly from the Department and through the Agricultural Representatives in each county.

We realize, of course, that the farm market is the means by which the farmer accomplishes everything. He must be able to make money on his farm if he is going to educate his boys and girls so they may be enabled to make the best uses of land.

Farm markets have been very variable during the past fiscal year. The price of hogs has been quite good so farmers who were engaged in that enterprise have had fairly good returns. I wish as much could be said for the men engaged in some kinds of dairy farming.

The sale of whole milk is now an important feature of the dairy business and the Milk Control Board, as we now have it organized, has been acclaimed by the farmers themselves to have been a most useful bargaining influence for a substantial improvement in the price of whole milk. We look forward for continued usefulness in this organization and while it may meet difficulties which will, from time to time, be more or less unsurmountable, yet, with the backing and support which it now has of the great majority of the farmers who sell whole milk for consumption in our towns and cities, it will be able to render a very decided service to Agriculture.

It is gratifying that the Ontario Agricultural College has a largely increased attendance and the Short Courses held this Winter surpassed in attendance anything that has been before attempted.

The College is the centre of our educational activities in Agriculture, and we hope to see the work there supplemented by the School of Agriculture at Kemptville and other Agricultural educational facilities which are offered to farm boys and girls in this Province become very important means of improving farming conditions.

There is always something to learn about farming. There have been more new developments in Agriculture than perhaps in any other occupation in

recent years. Men and women who are engaged in this business as a means of livelihood, and for the purpose of establishing homes for themselves in the Province of Ontario, are realizing more and more the importance of knowing the last word in tillage, cropping, and producing livestock in order that they may make the best of their opportunities.

In times when the marketing of farm products is below par, as has been the case during the last year or so, it is always good practice to learn, and as live stock is the chief feature of farming in this Province, we have had some good opportunities for the improvement of farm animals.

We are strengthening the live stock activities of the Ontario Agricultural College and the Kemptville School because we believe the first requisite to the teaching of Animal Husbandry to boys and girls, who attend these Institutions, is for the men in charge of the teaching to demonstrate that they can carry out in practice the principles and theories about which they are giving instruction. This would be an impossible accomplishment for them if they did not have good foundation stock, and so we are endeavouring to strengthen these Institutions in that particular.

We have only been in charge of the Department for a few months of the last fiscal year so we shall leave to a future report statements about changes and plans we have in mind in order to improve the usefulness of the Department to the men and women who live on the land.

However, no report of a Department of Agriculture would be quite complete without some reference to the Women's Institutes which, for a number of years, have been a very splendid organization, not only in this Province but in practically every Province in Canada. Everybody realizes how much women have contributed to the comforts in farm homes and to the successful achievement of Agriculture, and we are pleased to say that this organization of women throughout the Province of Ontario has a thorough grip upon the work necessary to be done for home life on the farm. It is no reflection on the past to say that we can always see some method of improvement and because of the excellent work these women have done, largely upon their own account, we thought that in the Department of Agriculture their organization should be headed by a woman. Consequently such an appointment has been made.

We hope and confidently expect to have the earnest co-operation of farmers, farmers' wives, and their families in the conduct of a Department that ought to be useful to them in very many respects, and which has served them well over a long period of years.

I have the honour to be, Sir,

Your obedient servant,

DUNCAN MARSHALL,

Minister of Agriculture.

Toronto, October 31st, 1934.

PRINCIPAL OFFICERS OF THE DEPARTMENT OF AGRICULTURE

THE HONOURABLE DUNCAN MARSHALL, *Minister*

JAMES B. FAIRBAIRN, *Deputy Minister*

MISS M. VIRTUE, *Secretary to the Minister*

J. A. McFEETERS *Chairman, Milk Control Board of Ontario*

**ONTARIO AGRICULTURAL COLLEGE AND
EXPERIMENTAL FARM
1934**

COLLEGE ATTENDANCE INCREASING

In the general courses for the Fall Term, the attendance at the College was 852. The students were registered as follows: Agriculture—593; Home Economics—223; Baking School—7; Graduate Courses—16; Special—13. More than a hundred students of the Ontario Veterinary College received instruction in Animal Husbandry, Dairy Husbandry, Poultry Husbandry, Chemistry, English, and Economics. Laboratory and class room space was at a premium. Many departments were over-crowded, with the result that students as well as staff were unable to do their best work. With Short Courses, Summer School for teachers, and conferences, which were in addition to the regular work, the facilities of the College were in constant use.

Residence accommodation was taxed to capacity, and it was even necessary for a number of students to find rooms in private homes.

REGISTRATION

Registration in all courses in Agriculture and Home Economics was well maintained. The total registration was somewhat lower than that of the preceding year, because of a decrease in the attendance at the Winter Short Courses and the Summer School.

Following is a detailed statement of the attendance in the various courses (figures for general courses include students of the Winter Term and new students of the Fall Term, 1934);

Course	Registration
General Course.....	773
Specialists in General Course Work.....	3
Animal Husbandry Specialist (One Year Course).....	3
Poultry Specialist (One Year Course).....	5
Dairy Courses.....	229
Live Stock and Field Crops.....	25
Farm Drainage.....	2
Poultry Raising.....	29
Horticulture.....	121
Apiculture.....	21
Farm Mechanics.....	27
Baking School.....	15
Special Drafting Course (one week).....	10
	1,263
Domestic Science (at Macdonald Institute).....	460
Girls' Conference (Junior Women's Institute).....	192
Home Economics (two weeks).....	5
Summer Courses:	
Intermediate Course—(First year, 38; Second Year, 46).....	84
Elementary Course—(First year, 112; Second year, 95).....	207
Specialists Course.....	12
Farm Mechanics.....	17
	320
Total.....	2,240

SUBJECTS OF STUDY AND INSTRUCTION

The subjects taught and studied at the Ontario Agricultural College cover many wide and varied fields. Included in the curriculum are Animal Husbandry, Chemistry, Entomology and Zoology, Botany, Poultry, Horticulture, Field Husbandry, Mathematics, English, French, German, Bacteriology, History, Dairy Husbandry, Genetics, General Physics, Apiculture, Economics, Veterinary Science and Physical training. In arranging such a curriculum, the aim has been to give to the students a course which is as well balanced as possible; an education which will broaden their outlook, and most important equip them for their life's work which lies before them.

Agriculture, in more ways perhaps than any other industrial art, has to do with nature and natural laws. It includes heat, light and moisture, along with mechanics and motive power. It is connected with the composition of soils and foods, with animals and plants, the laws of their reproduction and their growth, their habits and their uses. Agriculture is not only a science, it is a business, and History and Economics assist the student of agriculture to conduct his business intelligently.

The subject of English is taught in every term of the regular courses. While the arts of speaking and of writing are taught directly by exercises, the subject of English does not end here. The best English authors are studied, with the full assurance that the study will bear fruit in enriching the language and thought of the students. Hence a study of these subjects is not only of technical value, but of cultural value as well. The aim is to make not only good farmers of the students, but also intelligent and public spirited citizens.

OUTSTANDING EVENTS AT THE COLLEGE DURING 1934

Diamond Jubilee

The Diamond Jubilee of the College, marking sixty years of history and progress, was celebrated on June 22-24, 1934.

Tenth Anniversary of the College Royal

The tenth anniversary of the College Royal Show, which was organized in 1924, was held on March 6th and 7th, and proved to be one of the most important events of the past year. There were a total of 138 classes and 869 entries in all, so that the show was comparatively large, as well as competitive and interesting.

Farm and Home Week

Farm and Home Week of 1934, held on June 20th, 21st, and 22nd, was the most notable of its kind in the past decade. People flocked to the College in unusually large numbers during each of the three days of its duration. The most noticeable improvement over Farm and Home weeks in past years was perhaps the exceptionally fine program of exhibits and demonstrations prepared for the women visitors by the staff of the Home Economics Division. Due to the interest aroused, it is almost certain that the attendance of women visitors at the 1935 Farm and Home Week will be much larger.

Swine Breeders' meeting

On Thursday, June 21st, about one hundred breeders of pure bred hogs convened at the College for conference and demonstrational purposes. By previous arrangement, eleven breeders each brought a hog, which the breeder considered to be truly typical of the breed represented. These animals were inspected on foot and then slaughtered. The carcasses were then scored on the rail by two experts. The breeders present then inspected the dressed carcasses very carefully, and some of them were very much surprised at the way in which individual animals dressed out. The result of the demonstration, which marks the event as one of decided importance, was a greatly increased interest in and the Association's endorsement of the pooling of advanced registry boars for service.

Sale of Live Stock

In October, the annual auction sale of live stock was held at the College. This is always an event of importance, since it brings many hundreds of farmers from all over the Province to the College, where they are given the opportunity to buy high class animals at reasonable prices. The animals purchased often become foundation stock for new herds and flocks.

In 1934, the offering consisted of four shorthorn bulls, five fat steers, and sixty-four hogs. The sale was a success in every respect.

High Milk Record:

The four-year-old Holstein Cow (Toitilla Paulette), which was bred at the O.A.C., established an excellent record during the past year. Starting early in 1934, and completing her test early in 1935, she produced in 365 days a total of 24,774 pounds of milk with an average test of 3.81 per cent., and a total butterfat production of 946 pounds. Her highest month's record was in May, when she produced 2,669 pounds of milk.

This constitutes the highest 365 day milk record ever made by any cow of any age or breed at the O.A.C.

Student Athletics:

Four Canadian Intercollegiate Championships and one University of Toronto Interfaulty Championship were captured within the year by O.A.C. student athletic teams. The Boxing, Wrestling and Fencing team won the Intermediate C.I.A.U. championship and the University of Toronto Senior Assault-at-Arms.

The Senior and Intermediate Soccer teams were successful in retaining their Intercollegiate titles.

The Harrier team won the Intermediate Intercollegiate championship.

The O.A.C. Basketball team won the Intermediate C.I.A.U. championship. At the O.A.C. Field Day Meet, the 100 yards, 440 yards and the relay records were broken.

Records show that approximately 375 students are taking part in various athletic activities, not because they are compelled to do so, but merely for the love of feeling fit.

Judging Teams:

The Ontario Agricultural College was represented at two live stock judging competitions and a meat judging contest in 1934.

At the Waterloo Dairy Cattle Congress, the O.A.C. ranked third in competition with sixteen teams. Individual members of the team representing the College ranked fourth in Jerseys, sixth in Ayrshires, and fourth and fifth in the competition.

At the Intermediate Live Stock Judging Contest, Ontario stood 16th, with 23 teams competing. This was somewhat lower than in 1933. The College team stood 12th in horses, and 7th in beef cattle. One member of the O.A.C. team was awarded fourth place in horses.

In the Meat Judging Contest at Chicago, the team representing the O.A.C. ranked fourth, with nine teams contesting. As a team it stood first in pork, third in lamb, and sixth in beef. Individual members of the team ranked first in lamb, second and seventh in pork, and eighth and ninth in the contest.

New Illustrated Booklet:

For many years there has been a real need for an illustrated booklet of the College, to send out to prospective students and to others interested in this Institution and its activities, and to answer sundry inquiries. In May, the Extension Department of the O.A.C. prepared pictures, layout and copy for such a booklet. Ten thousand copies were printed in June. In all, the booklet contains 32 pictures of College buildings, sections of the campus and farm, student activities, and College live stock.

Conferences and Groups visiting the College:

Each year a large number of groups and Associations come to the College for the purpose of holding their meetings, studying the work of various Departments, and making contact with members of the Faculty. It is another way in which the Institution can be of direct service to these people. The groups which have visited the College during the past year are as follows: Guelph District Educational Association—November 1st, 1933; Agricultural Representative Conference—December 27th and 29th; Experimental Union—January 9th and 10th, 1934; Normal School, Hamilton—January 18th; Rotary "International"—January 25th; Delegates to Bible School—February 22nd; Canadian School of Missions—April 20th; Federation of Ontario Naturalists—April 21st; Girls' Conference—May 8th, 9th and 10th; Hamilton Normal School Students—May 15th; Pullorum Workers' Conference, May 16th to 19th; Normal Students from London, Stratford and Toronto—May 29th; Ontario

Advisory Fertilizer Board—June 14th and 15th; Botanical Society of America—June 19th; Poultry Associations' Meetings—June 20th; Ontario Swine Breeders' Association—June 21st and 22nd; Canadian Feed Manufacturers' and Retail Feed and Grain Dealers' Association—June 21st and 22nd; Beekeepers' Meeting—June 22nd; Ontario Horticultural Association Picnic—June 27th; English and Scotch Veterinarians—August 25th; Representatives of Baking Industry from England and Ireland—August 30th; Inter-city Rotary—September 19th; South Wellington and City of Guelph Teachers' Convention—October 5th; Ontario County Teachers—October 5th; Inter-County Judging Competition—October 19th.

RESEARCH PROJECTS AND SERVICE

Through their research and service activities, various Departments of the College have rendered much help to Canadian farmers during the past year in bringing to light highly important and useful information. Projects of interest have been summarized.

Breeding in Relation to Hatching Power of Fertile Eggs: For the past six years, individual selection and progeny testing for high hatching individuals and their selected progeny, and a similar line for low hatching families have given an average high hatch of 78.4 per cent., as against that of low hatching families of 39.5 per cent. The average for unselected stock runs about sixty to sixty-five per cent.

Feeds in Relation to the Hatching Power of Fertile Eggs: Much effort has been placed on finding a reasonable substitute for sunshine. It was found that there were considerable differences in results secured from animal proteins. When milk was fed, hatches were relatively high. Milk fed in combination with fish or beef always improved the hatch. Through co-operation with the Connaught Laboratories, University of Toronto, which supplied the College with liver extract, it was possible to ascertain that the liver extract did not increase the hatch when fed with milk, but did improve the hatch from beef meal and fish meal when fed singly or in combination with milk. The hatch on milk was increased as high as twenty per cent., and on fish fifteen per cent.

Leather end: One of the important problems of tomato canning is the development of a tough, yellow point to Tomatoes known as Leather End. In Canning, it is necessary to remove this part of the tomato to avoid tough, woody canned stock. Through a co-operative effort, it was ascertained that nitrate of soda and muriate of potash decreased Leather End, when used at the rate of 1,000 pounds per acre in 2-12-6 or 2-12-10.

Root Rot and Blight Resistance in Peas: Twenty-eight varieties of peas were tested to ascertain if there is any hereditary resistance to root rot and blight. The following varieties of peas gave a heavy yield of seed, on soil which is heavily infested with root rot organisms: Alderman, Champion of England, Prince of Wales, Improved Advancer, Quite Content, Horal, Rice's 330, Green Admiral, Yellow Admiral, Green Feast (Lincoln) Canadian Beauty, Telephone, Alcross, and some selections from Alaska, Horal x Prince of Wales. Other varieties were susceptible to disease.

Emergency Crops: Spring and summer climatic conditions of 1933 were exceedingly unfavourable to crops, following one of the coldest winters of recent times. Pastures and meadows, including new seedings, suffered severely. The Department of Field Husbandry has been investigating a great number of crops for emergency under such conditions. Among the crops which have been adjudged as especially favourable for emergency fodder were the following: Peas and Oats: (2 bus. of O.A.C. No. 144, O.A.C. No. 72 or Banner Oats along with on bus. of O.A.C. No. 181, Golden Vine or Prussian Blue Peas); Soybeans, Millet, Alfalfa and Biennial Sweet Clover: Oats and Sweet Clover (this mixture produced pasture in six weeks. There was a good oat crop, and later an especially good clover); Sudan Grass; Early Amber Sugar Sorghum; Rape and Kale.

Urban Oats: This new variety of oats is a pure-line selection from a cross of Banner and Early Ripe, which has made an excellent record in tests at the College. The grain is white, thinner in hull, and about the same size as Banner. It is totally immune from smut, and very little injured from rust. Having a stronger straw than that of Banner, it outyielded Banner by nine bushels per acre for a period of ten years.

Swede Turnip or Rutabaga in Ontario: This has become an important honey crop in several centres. Four varieties,—Perfect Model, Canadian Gem, Perfection, and New Century—have proven their superiority. Turnips for shipping should be pulled by hand in order to avoid injury. Protection from exposure is effective in retaining bloom. The control of water core or brown heart is still a problem that is being studied by the Department.

Testing Adhesive Effect of Refined Oil Emulsions: In an effort to cause arsenate of lead to adhere to foliage and fruit of apple trees long enough to omit the necessity of a second spraying, and yet not long enough to stain the fruit or make it necessary to wash or rub off the poison, the O.A.C. has investigated various grades of oils. The amount of refined (unsulphonatable) oil in each spray runs from .5 per cent. to .3 per cent. The amount of rainfall and other climatic conditions effect the spray to such a degree, that it is impossible to draw definite conclusions without a couple of years more work. Results are quite promising.

Hot Water Method of Controlling Cyclamen Mite: Tiny brown mites known as "cyclamen mites" are active pests in greenhouses. The hot water treatment, reported favourable in the United States, was tested. Preliminary tests gave results 100 per cent. effective; no sign of mite injury was found, and none of the plants were injured by the treatment.

Turnip Aphid Control: One of the great curses of the turnip growing industry is the aphid, which sweeps over an area of turnips destroying foliage and stopping all growth. The species of aphid involved is not the one which commonly attacks both cabbage and turnips, which is covered with a whitish powder, but a brownish-green species, free from any powdery covering. All forms of turnips were attacked, but cabbage and cauliflower were exempt. Most aphids are readily controlled by a 2 per cent. nicotine dust, but this was found to simply stupify the aphids for a short time. Fifteen different materials were tested, either as sprays or dusts. Of all these, the simplest and cheapest was linseed oil soap,—1 lb. to 10 gals. of water. This killed every aphid hit, glueing it to the leaf. The spray was applied by a ten gallon hand outfit equipped

with a rod three feet long, bent up at an angle near the tip, and equipped with a disc nozzle. By means of this equipment, the spray could be shot up to the lower sides of the leaves, so as to hit the aphids. The spray should be shot inwards and upwards to hit the under surfaces. One hundred gallons of this mixture costs from eighty cents to a dollar.

Single Chamber Septic Tank: This septic tank, without syphon, has been found to give general satisfaction. The sludge deposit should be pumped out of each tank every five years. No laundry or sink water should enter the tank if it can be avoided, since such treatment will have a detrimental effect on proper digestion, or will shorten the retention period, either of which aid in clogging the absorption bed.

Farm Drainage: The Division charged with the administration of the Drainage Act reports an active interest on the part of farmers in draining their soils. A total of 424 farmers were given assistance during the year. There was an increase in drainage loans secured by Ontario farmers of \$38,200 over last year, and an increase of \$55,200 over 1932. In all, 324,565 feet of profile drain were designed, and of this 285,590 feet were installed.

Preventing Mould Growth on Wooden Walls of Cold Storage Plants: The Department has found that the most effective treatment is two applications of a whitewash composed as follows:

A. { 7 gal. water { 50 pounds hydrated lime.	B. { 3 gal. hot water When cold { 6 pounds salt mix A and B.
---	---

Add 1 oz. powdered alum to each gallon of whitewash, and allow time for solution.

Wax moth in Comb Honey: Much comb honey was found to be injured in January, 1934. A small white grub was responsible, which seriously defaced the surface of comb honey. The conclusion reached was that the trouble arose from common wax moth. Common fumigants such as sulphur, cyanogas, and carbon bisulphide may be used satisfactorily to destroy the larvae.

Supersedure of Queens in Package Bees: This condition is causing considerable trouble throughout Ontario. It appears that when queens were subjected to temperatures of 45 F. for a period of four hours, that supersedure occasionally results.

Free Choice Feeds for Calves: The best mixture of feeds to produce satisfactory growth of calves has been a subject of prolonged research by this Department. It was found that when calves were allowed to choose from a large number of supplementary feeds, such as were placed before the poultry in the O.A.C. Baby Chick Ration, that the calves made choices which were advantageous for their health and growth. Definite rations are recommended.

Supplementary Feeds for Nursing Pigs: In order to get early and continuous growth, it is extremely necessary and desirable to provide young nursing pigs with feeds so that they quickly learn to eat, and which feeds greatly assist in early nourishment. Young pigs rarely start to eat before twenty days of age. A certain amount of cod liver oil was used to advantage. Three definite rations are recommended.

Soil Survey: A survey of the soils of the Thedford and Bradford Muck Areas was undertaken. The area of the Thedford Marsh is comprised of 600 to 700 acres, while that of the Bradford Marsh is from 1,000 to 1,200 acres. The Thedford area is about fifteen feet above Lake Huron, and three or four miles from it. There are three main types of soil: (1) The "Egypt" area is composed of a well decomposed black or dark grey woody muck with a considerable admixture of silt and clay, underlain by brown woody peat with many stumps and logs in varying stages of decomposition. Marl or sandy clay, high in carbonates, occurs at depths varying from 2½ to 5 feet. (2) The Lake Berwell area is composed of a dark greyish fibrous muck, underlain by brown fibrous peat, with marl occurring at 1 to 3 feet. Numerous thick marsh grass roots are found in the newly cultivated areas. (3) The west end of the area is comprised of black, well decomposed, woody muck, underlain by brown woody peat, with partially decomposed tree roots, stumps and logs. It is underlain by marl at depths varying from less than a foot near the border to about 7 feet.

Necessarily, fertilizers have to be used with considerable care on this soil, since it naturally contains a large quantity of nitrogen, which, however, has to await heat and good circulation of air in order to break down into such forms that the plant can use it. Phosphoric acid is relatively rare on the newer land, and potash is very scarce. On the areas under cultivation for ten years, however, there is a fair amount of acid soluble phosphorous, but no very large reserve of replaceable potash.

Pasture Progress: The rotational grazing experiment, begun in 1930, has been continued. Records of 1934 show a marked increase from the use of fertilizers, in dry matter and in crude protein. There was also a gain of almost 300 per cent. in pasture days per acre in 1934. The Beef Cattle Grazing Experiment was continued. The 1934 results showed material gain in weight of beef cattle grazing upon the fertilized, as compared with those on the unfertilized areas.

Milk Bottle Breakage: One of the important overhead charges in milk distribution plants is the breakage of bottles. In co-operation with the Ontario Dairy Research Council, a survey was made on this question. The findings were as follows:

(1) The average monthly breakages for different plants ranges from 0.27 pounds to 1.4 pounds of broken glass per 100 pounds of glass, handled as quart, pint, ½ pint and ¼ pint bottles.

(2) Studies on the distribution of breakage in plants revealed considerable difference between different kinds of handling. In general, highest breakage was found under "Driver's Returns", which includes route breakage and dumping returns, while lowest breakage occurs in "Milk Storage", which includes checking out routes.

Keeping Quality and Uses of Plastic Cream: By reducing the flow of milk into a cream separator, a cream containing about 80 per cent. of fat is produced. This is called plastic cream, and resembles butter both in composition and appearance. Plastic cream, separated from raw milk, maintained a good flavour when stored at 50°F. for one week. At the end of that time, a cheesy flavour developed. When milk was pasteurized to 170°F. and the cream held at 50°F., it maintained a fine flavour for a period ranging from three weeks to

one month. Plastic Cream, when made from pasteurized milk, and then artificially coloured and salted, makes a very palatable "spread". There appears to be a considerable future for this material.

Low Temperature Studies: The condition of fruit on the foreign market is impressing the necessity of greater care in the storing of apples and other fruits for shipment from this country. Studies of the effect of temperature in storage, the maturity at the time of harvesting, and the use of oiled paper in the control of superficial scald of apples are still proceeding. It has been established that early picking predisposes fruit, resulting in considerable loss. Fungal rotting and internal break-down are both affected by conditions of handling in storage. The export of plums to England has been under investigation. The rate of pre-cooling, the temperature and length of the holding period, and the temperature of shipment by rail and steamship, as well as the degree of ripeness at picking have received attention.

London Lettuce Trouble: Vegetable gardeners in the vicinity of London have reported considerable disease in their lettuce in greenhouses. Investigation seems to have established the fact that no difference was found between plants grown on sterilized or unsterilized soil, nor did it make any difference whether the plants were protected from insects or neighbouring plants.

A Study of the Oxford County Cheese Factories: A study of Oxford County Cheese factories brings out the importance of pasture in producing milk for cheese factories. One-third of the cheese is manufactured during the months of June and July, and 43 per cent. in three months out of the twelve. In the half-yearly period, over three-fourths of the cheese is produced. This emphasizes the importance of lengthening the period of sufficient pasture.

Demand and Preference for Cheddar Cheese in the City of Guelph

Investigation shows that in this city of 21,000, over 11,000 pounds of cheese are used per month, or a yearly consumption of 63 tons. This gives a per capita consumption of 4.7 pounds. The Dominion Statistics give a per capita consumption of 3.5 pounds. Great Britain reports a per capita consumption of 9.5 pounds. The ungraded cheese came from a variety of sources. The stores selling this product, sold process cheese rather than the cheddar, for only 35 to 50 per cent. of their cheese sales were of the latter type. In stores where definite graded No. 1 Cheddar Cheese was sold, cheddar was over 75 per cent., and in one case 90 per cent. of the total cheese sales.

N.B.: The above report of the activities and research projects at the O.A.C. is necessarily very general. It makes no claim to be exhaustive or even to have depicted in detail the activities reported. Those seeking more comprehensive information are referred to the Annual Report of the Ontario Agricultural College, 1934, which is printed as a separate publication.

ONTARIO VETERINARY COLLEGE

STUDENT ENROLMENT

The student enrolment has again shown a decided improvement over that of previous years. In the report of last year the view was expressed that so long as the present attendance was being maintained, there was no pressing need for intensive efforts to increase the enrolment. While this policy has been adhered to during the past year, the attendance of the Ontario Veterinary College has, nevertheless, shown a noticeable increase over that of last year. The fact is that the total attendance capacity has now been reached. The registration for last year comprised a total of 150 students, whereas the registration this year totalled 184 students—an increase of 34. At a special Convocation of the University of Toronto, held on May 3rd, 1934, the degree of Bachelor of Veterinary Science, (B.V.Sc.) was conferred on 23 graduates by the Chancellor, Sir William Mulock. As in previous years, students are again in attendance from each of the Provinces of Canada, from Great Britain and other parts of the Empire, and from many parts of the United States.

COURSES OF STUDY AND INSTRUCTION

Adjustments have been made during the current session whereby the courses in Anatomy and Surgery, as well as the subjects of Pharmacy, Materia Medica and Therapeutics, have been more closely co-related. The course in Parasitology has been enlarged and allied more intimately with Biology and Zoölogy. The clinical facilities have also been considerably enlarged by the addition of a new and commodious clinic room and also hospital accommodation for small animals. With the increased attendance, a division of the laboratory classes into two sections has been necessitated, so that more individual attention could be given. This has naturally increased class work, but the results have been beneficial.

Adjustments in the courses are a necessary development, and have to be arranged to meet changing conditions as they arise. In this respect it would appear that it may soon be desirable to lengthen the course from four to five years' duration. By so doing the standard of qualification would be progressively improved and placed on a standard approaching that of the other learned professions. The general trend in veterinary science now appears to be towards a four years' professional course, preceded by a year of College work in which may be included such subjects as English, General Chemistry, Physics, Botany, Biology and Zoötechnics. It is generally recognized that a careful selection and grouping of certain subjects as the basis for a year of college work preceding the professional course of four years has been productive of better results than the inclusion of such subjects as part of the regular professional training. By this plan the students acquires a better preparation for the technical or professional studies. This arrangement also provides for a more suitable schedule of studies in the different years and a better balanced time-table throughout the course, whereby lectures, clinical instruction and laboratory practice are more closely co-related.

During the month of June a short course and conference was held relating to the Fur Farming Industry, under the joint auspices of the Ontario Veterinary

College and the Ontario Silver Fox Breeders' Association, and in co-operation with the staff of the Government Experimental Fur Farm at Kirkfield.

The course consisted of special lectures and demonstrations in the following subjects: 'The Diagnosis and Control of Infectious Diseases; Lung Worm Disease and its Complications; Anaemia affecting Mink; Coccidiosis affecting Mink; Methods of Pelting; Classification and Judging of Fox and Mink Pelts; Reproduction and Fertility in Foxes; Report on Distemper Research; Discussion on Feeds and Feeding of Foxes; Discussions on the Control of Hookworms and Round-worms; the Cause and Control of Ricketts in Foxes.

A special course was arranged for general practitioners during the month of July, with an average of sixty in attendance. The programme of instructions was arranged along specific lines to meet the needs of those concerned, and consisted of lectures, clinical and laboratory demonstrations on infectious, nutritional, and parasitic diseases of animals as is indicated in the following outline:

Diseases of Cattle—General review of Bang's Disease, Johne's Disease, Mammitis, White Scours, Warble Control.

Diseases of the Horse—General review of Encephalomyelitis; Forage Poisoning; Bot Control; Joint-ill in Foals.

Diseases of Swine—General review of Swine Erysipelas; Hemorrhagic Septicemia; Anaemia of Young Pigs.

Miscellaneous Topics—Milk Hygiene including Pasteurization and the Bacteriological Examination of Milk; Deficiency and Metabolic Diseases of Animals; Vaccination against Distemper in Dogs.

RESEARCH AND INVESTIGATIONAL WORK

Although the Ontario Veterinary College is essentially an educational institution, concerned primarily with the instruction and training of students, it has also undertaken considerable research and investigational work. It is not sufficiently realized sometimes that researches, properly conducted and carried to completion, involve a greater amount of time, extra staff and equipment than happens to be always available. For this reason the scope and extent of veterinary scientific research have had to be kept within the bounds and means at the disposal of the staff. In spite of these disadvantages, the Ontario Veterinary College has maintained its usefulness to an exceptional degree in rendering efficient service in solving disease problems as they arise. Members of the staff have been kept exceedingly busy with routine work, and the increasing requests for special investigations would seem to warrant an increase of the available resources under the direction of someone whose whole time could be devoted to the work, in close co-operation with the College and other interested research organizations. It is highly important work with an unlimited field, and the increased requests for assistance indicates the confidence of the public in the services rendered.

Requests for services of this kind receive the required attention as far as time and facilities will permit. The progress made, and a description of some of the researches conducted this year are here briefly outlined, and for those interested more detailed reports in appendices submitted by members of the departments concerned are to be found in the Annual Report of the Ontario Veterinary College for 1934.

John's Disease of Cattle. Several cases of this disease were reported again this year. The insidious nature of this disease makes its detection very difficult until the symptoms become well marked. As a rule the first symptom to attract attention is a persistent diarrhoea with gradual loss of flesh, in spite of good care and careful feeding. The disease is generally introduced into a clean herd by the purchase of an infected breeding female from an infected herd. If the animal happens to be pregnant at the time of purchase, the symptoms may not become manifest until after calving time. Up to the present time the disease seems to be confined chiefly to a few dairy herds. The diagnosis may be confirmed in suspected cases by a microscopic examination of scrapings from the rectum, or by the application of the Johnin Test or the Avian Tuberculin Test or by a post-mortem examination. Several cases have been submitted to these methods of detection during the past year.

Swine Erysipelas. This disease is not of very common occurrence here as yet. It is, however, quite prevalent in many other countries, and is said to be becoming more widespread in some parts of Western Canada. Several cases developed this year in a herd under the observation of the College. The disease occurs in several forms or types, one being mild in character and commonly known as Diamond Skin Disease. This form of the disease develops as a form of Urticaria, characterized by the sudden appearance of Rhomboid or diamond shaped, darkly reddened areas on the skin on different parts of the body. This is the type usually observed at the College as yet, and, as a rule, it responds to treatment with recovery in about two weeks' time.

The other types are of a more serious nature, and may occur either in an Acute, Subacute, or Chronic form. Acute cases are of a septicemic nature, characterized by high temperature, extensive discoloration of the skin, discharge from the eyes, complete loss of appetite and definite illness accompanied by difficult breathing and heart weakness. This type of the disease runs a rapid course, frequently terminating fatally in from two or four days' time. Fortunately this form of the disease is not common here as yet. Subacute or Chronic cases are stated to be increasing among young pigs in some parts of Western Canada. In this form of the disease the chief symptoms are general arthritis or inflammation of the joints resembling rheumatism, causing the affected legs to become stiffened up and lame with enlarged joints, accompanied by general unthriftiness and a considerable death rate. Generally speaking, Swine Erysipelas has not yet occurred to any great extent in a severe form in these parts.

Histology of the Endocrin System of Fowl. The endocrin system comprises certain glands of the body which have an internal secretion, capable of being absorbed directly into the blood. These secretions are known to have an important influence on the normal functions of the body, and in maintaining health. In order to better understand how the endocrin glands appear in health, how they function, and also to aid in the diagnosis of diseases resulting from them, a knowledge of their minute cellular structure is desirable. The study of these glands was therefore undertaken to determine their exact location in fowl, and to establish any marked histological differences as compared with the same structures in larger animals.

The Use of Azamine for the Treatment of Coccidiosis. Coccidiosis is a disease of animals caused by a parasitic invasion of the bowel and producing a form

of bloody dysentery. It attacks young cattle on certain pastures and when they are kept in contaminated stables. Coccidiosis also affects poultry and fur bearing animals, especially in the case of mink farms. This experiment was conducted by the College for the purpose of determining the efficacy of the drug known as Azamine for the treatment of Coccidiosis in poultry and mink. The results of these preliminary experiments are sufficiently promising to warrant further research, as to its value in the treatment of all animals subject to the disease.

Swamp Fever of Horses. Cases of Infectious Anaemia of Horses or so-called Swamp Fever are now being reported from time to time in different parts of the Province. It is a virus disease which has prevailed endemically for many years in certain districts in Western Canada and the United States. It has not been a common disease here, and is believed to have been introduced by the shipment of western horses into different sections of Ontario. The exact cause and methods of transmission have not been fully determined, but it is at least known to be caused by a filterable virus present in the blood, urine and faeces of affected horses. The infection may be acquired from contaminated pastures, slough water, and possibly also by the attacks of blood-sucking, biting flies.

The disease occurs in three forms described as Acute, Subacute and Chronic Swamp Fever, depending on the severity of the attack and its duration. Irrespective of the form in which the disease appears, it causes an exceedingly high mortality. Acute cases are characterized by their sudden onset, high fever, marked weakness and prostration, and terminating fatally within a few days. These cases are chiefly observed during the summer months. Subacute cases are manifested by symptoms of intermittent fever, weakness, loud beating of the heart and weak pulse, and profound anaemia with blanching of the visible membranes. As the disease advances marked weakness of the hind quarters develops with incoördination of movement, accompanied by progressive emaciation, in spite of the fact that the animal has retained its appetite. These cases may last from one to two months before death takes place, and are most frequent during the late fall months. Chronic cases are usually observed chiefly during the late fall and winter months, and follow a slow course manifested by intermittent fever, palpitation of the heart, weak, quivering pulse, profound anaemia, polyuria, general weakness and emaciation in spite of an increased appetite in some cases.

Myiasis in Man and Animals. Myiasis is commonly known as fly maggot infestation, and causes a severe skin eruption which is of more frequent occurrence in man and animals than is generally known. The disease has been observed to affect children and fur bearing animals in different parts of Ontario during recent years. This investigation relates to its incidence in children and in mink.

In children the disease is manifested by the development of boil-like eruptions on exposed parts of the body. Infection takes place during the summer months when flies are prevalent, between the months of June and September. The flies deposit their maggots on the skin of the child which then burrow into the skin, giving rise to painful boil-like lesions from which the maggots can be squeezed out. The same condition is also observed in young mink in captivity, and causes severe losses. In this experiment the life cycle of the fly *Wohlfahrtia vigil* was studied, for the purpose of determining the most suitable means for controlling this pest.

Report of an Outbreak of Malignant Catarrh. Severe outbreaks of Malignant Catarrh have fortunately not been of very common occurrence in Ontario. It is essentially a highly fatal infectious disease of cattle, causing a severe inflammation of the tissues lining the air passages of the head and throat, accompanied by a nasal discharge together with inflammation of the eyes and nervous derangement, and in some cases inflammation of the stomach and intestines. In this outbreak the disease occurred in a herd of 28 cattle which were in good condition and kept stabled. The cattle had been on this farm for about four months when the disease appeared. Half the herd became affected within a short time, resulting in the death of eleven head. This outbreak was notable in that the onset of the disease was sudden, and occurred in both respiratory and intestinal forms.

Convulsions in Suckling Calves. The occurrence of Convulsions in Suckling Calves was the subject of an investigation, and an effort was made to determine the exact nature of the disease and its cause. Nothing of a definite character could be found as to the cause of the convulsions, but it is hoped to renew the study of this disease as opportunity permits.

PUBLIC EXTENSION SERVICE

This service has been promoted to furnish specialized clinical and laboratory assistance in the diagnosis, prevention and operative treatment of diseases in all classes of animals. It has been developed along such lines of usefulness as seemed to be most effective and desirable to those requiring specialized services, and to furnish clinical and laboratory material for teaching and demonstrational purposes in class work. It thus serves a twofold purpose, and has also been made more or less self-sustaining by making a nominal charge to cover any expense incurred where the service rendered is of an individual commercial nature. The nature and extent of the service rendered is briefly summarized as follows:

Animal Clinics. To these clinics animals of all kinds can be brought for special examination and operative treatment. They are held regularly on four afternoons of each week during the College session. Their value and importance to the community is clearly manifested by the large number of animals brought regularly for attention. During the past year 1,200 animals were selected for medical and operative treatment. It is readily apparent that a valuable medical and surgical service has been rendered to those in need of same.

Laboratory Examinations. The value of scientific laboratory examination is becoming increasingly important, and offers indeed the only dependable means for the correct diagnosis of many diseases. During the past year 1,041 disease specimens were received for microscopic and bacteriological examination. Autopsies were made of 1,806 poultry carcasses belonging to individual owners who reported disease in their flocks. In each case a personal laboratory report of the results of the examination was sent to the one concerned, with instructions as to the proper treatment and the prevention of the disease in question.

Serological Tests. These are commonly known as blood tests and are becoming more widely used as the best method for diagnosing certain forms of disease. At the present time they are most frequently used for the diagnosis of Bang's Disease in cattle (contagious abortion), and for Pullorum Disease

(bacillary white diarrhoea) in fowl. For the diagnosis of Bang's Disease 9,034 blood samples were received from veterinarians or their clients, and submitted to the agglutination or blood test for *B. abortus* infection. Included in this number were 310 pure-bred cows, intended for export to the United States. In addition, 6,850 doses of *B. abortus* antigen (test fluid) were supplied to graduate veterinarians for the testing of herds under their supervision. These tests were made co-operatively with qualified veterinarians for clients whose herds they were supervising, on the understanding that the reacting animals would not be sold to enter clean herds, and that their disposal would be regulated as follows:

1. By segregation on the owners' premises pending their ultimate disposal.
2. Disposal by transferring them to positive herds on separate premises.
3. Disposal by slaughter ultimately at abattoirs under inspection.

Pullorum Antigen. A sufficient quantity of the Pullorum Antigen (test fluid) was prepared and supplied to graduate veterinarians. The latter completed over 48,000 poultry blood tests for their clients.

Fowl Pox Vaccine. At the request of the Poultry Department, 60,000 doses of Fowl Pox Vaccine were prepared and supplied to poultry breeding stations under their control. The details of these different services are included in the appended reports of the departments concerned in the Report of the Ontario Veterinary College for 1934, for those who are interested.

The increasing demand for these extension services creates a large amount of detailed routine work of a skilful nature, with an immense volume of correspondence, personal interviews for advice, and the preparation of test charts and laboratory reports concerning the work. Throughout the year the entire staff has been kept busily engaged, and each individual has performed his work in an efficient and diligent manner. A high standard of efficiency is being maintained in all departments of the Ontario Veterinary College at a minimum cost to the Province.

KEMPTVILLE AGRICULTURAL SCHOOL

The attendance during the past year was about equal to that of previous years. The enrolment in the regular classes was as follows:

Agriculture, Senior Year	25
Agriculture, Junior Year	29
Agriculture, Short Course	55
Teachers' Summer Course	56

The School entertained the following groups during the year:

Date	Name of Organization	Number Present
Nov. 15—	Judging Teams	25
Jan. 16-17—	Extra Short Course	26
Apr. 6—	Regional Conference	25
Apr. 10-11—	Young Canada Movement	50
June 8—	Field Day	600
	10—Ontario Agricultural College Staff	8
	30—Kars S. S. Picnic	100
July 7—	C.S.T.A. Picnic	100
	27—Dundas-Grenville Judging Competition	60
	28—Dundas-Grenville Agricultural Field Day	300
Aug. 3—	North Gower Anglican Church	140
	11—Kemptville Agricultural School Reunion	125
Oct. 10—	Waterloo Young People's Club	15
	26—Grenville Teachers' Convention	130

The yields on the Kemptville Agricultural School Farm of all cereal and root crops were reduced during the past season due to extreme drought, while the excessively low temperatures of the 1933-34 winter did considerable damage to alfalfa and clovers and completely destroyed the winter wheat on the farm. This was the first year that such has ever happened.

The annual sale of surplus live stock was again a success. Approximately three hundred farmers were in attendance and prices, especially for bred sows, were quite satisfactory.

As in former years, the "K.A.S. Royal" was a decided success. The standard of showmanship set by previous classes was maintained, while such features as displays of Home Planting and Farm Garden plans, the Entomological and Mechanics exhibits were most creditable.

The following is a brief outline of the extension work undertaken by different members of the School staff:

THE PRINCIPAL

During the year the Principal attended twenty-nine director and committee meetings connected with the Central Canada Exhibition, the Ottawa Winter Fair, the Kemptville Agricultural Society and the "Royal." He spoke at ten banquets, judged horses or cattle at several fairs, assisted with many judging and showmanship competitions and attended several dairy cattle field days and plowing matches. In all, he was asked to speak at or assist with over seventy agricultural meetings of various kinds during the year. He acted as a member of the Ontario Fertilizer Committee, the Ontario Bacon Hog Committee and on the Advisory Council of the Ontario Research Foundation.

He carried out his duties as Superintendent of the School farm and live stock, and in addition lectured to the regular and short course students on Animal Husbandry.

DEPARTMENT OF CHEMISTRY, SOILS AND APICULTURE

Regular lecture work in Soils, Fertilizers, Chemistry, Apiculture and Mathematics was given to the regular students. Extension work consisted of several apiary inspections and other apiary work. Fertilizer and soil problems were investigated. A series of fertilizer experiments on student farms were conducted in co-operation with the Canadian Industries Limited and the Potash Company of Canada. Sixteen different experiments were conducted and inspected.

Weather readings were taken daily, and the following is a summary report of same:

	Maximum	Minimum	Mean	Precipitation
November, 1933.....	32.9	13.5	22.9	2.4"
December, 1933.....	20.3	— .5	9.5	2.62
January, 1934.....	24.03	4.1	8.6	2.36
February, 1934.....	11.4	— 11.1	— .67	1.40
March, 1934.....	30.0	14.4	21.6	1.88
April, 1934.....	48.7	32.2	39.9	2.79
May, 1934.....	68.8	43.29	57.8	1.03
June, 1934.....	76.8	54.48	67.4	2.11
July, 1934.....	85.26	60.03	73.06	1.14
August, 1934.....	74.2	51.9	64.6	1.43
September, 1934.....	70.9	54.6	62.8	3.83
October, 1934.....	52.6	33.7	44.67	1.84

Lowest temperature—February 8, 1934—32°.

Highest temperature—July 25, 1934—94°.

DEPARTMENT OF FARM MECHANICS

The work of this Department consisted of lectures on the various phases of this subject to regular students, as well as to the Representatives, Kemptville Agricultural School Short Courses, and to the Kemptville Agricultural Summer School.

In addition to the surveys made for drainage during the summer months, advisory visits were made to 65 farmers, 21 interviews were held at the office or at home, five friendly awards were made during the summer, four of which were completed. These four affected thirty-two parties and sixteen of these were on one job alone and, strange to say, the work was all completed on time and every one satisfied.

The lecturer in this Department was, moreover, responsible for the classes in Singing and the Physical Instruction in the gymnasium.

POULTRY DEPARTMENT

The work on the Poultry Department, although curtailed, has been very successful with regard to laying records.

The Barred Rock Pullets, completing the full year's laying records on the plant, averaged 240.7 eggs per bird. This brings the average of K.A.S. breeding stock in this breed up to 253.12 eggs per bird.

The White Leghorn Pullets completing their first year averaged 238.5 eggs per bird and gives the K.A.S. breeding stock an average production of 236.1 eggs per bird.

In addition to the usual lecture work at the School, the following extension work has been carried on:

Short Courses attended—5, with an attendance of 424 people.

Farmers' meetings attended—21, with an attendance of 1,376 people.

Culling Demonstrations—16, with an attendance of 320 people.

Killing and Plucking Demonstrations—6, with an attendance of 55 people.

Birds Culled	7,484
Farm visits re disease, housing, feeding, etc.....	71
Meetings of Fair Boards and Directorates.....	12
Judging Farmers' Meetings and Judging Competitions.....	11
Meeting re formation of Egg Circles and Poultry Pools.....	5
Judging at Fall Fairs.....	3 fairs
Judging at School Fairs.....	5 fairs

HORTICULTURAL DEPARTMENT

It was deemed advisable at the close of last year to remove a number of trees in the orchard, which had grown to such a size that they were interfering with general orchard operations. Some three hundred such trees were removed. Then, owing to a very severe winter some of the remaining trees were killed, which this spring necessitated the replacement of some 350 young trees in the School Orchards.

Owing to the fact that climatic conditions in this district are not strictly comparable to those along the St. Lawrence River, and that a considerable number of inquiries had been made regarding suitable varieties of apples for planting in this area, the opportunity was afforded to include in the replacements several trees of recent origin. The majority of the replacements, however, consisted of McIntosh, with Fameuse as second choice. It is interesting to note that despite an extremely dry summer the loss in "whips" planted was practically negligible, in the two-year-old stock approximately twenty per cent., and in the three-year-old stock the loss was heavier, despite the fact that all the young trees came into leaf and grew fairly satisfactorily for a number of weeks. The sustained dry weather checked the possibility of satisfactory growth on any of the stock, but it should be noted that one-year-old stock is more satisfactory, even under such adverse conditions as those of the past year.

It is most pleasing to report that considerable development (though yet in a small way) has been made in extension work dealing with the improvement of Public School surroundings. Several School Inspectors and a number of teachers in the several Inspectorates have shown enthusiastic energy in developing this work, and material has been sent to a number of these schools from surplus stock of such material as is to be found in the perennial borders at the school. It should be mentioned, furthermore, that considerable assistance has been obtained from a number of graduates of this School, who have undertaken the personal supervision of nearby schools.

As during former years, and in collaboration with the Agricultural Representative of Grenville County, a spray service to orchardists in this district has been maintained, and a considerable number of interesting replies have been secured from the questionnaire sent out to those on the mailing list.

Several visits have been made to market gardeners, when assistance has been requested in connection with the control of disease infestation or insect pests. Assistance has also been given to a number of farmers who have been desirous of improving their home surroundings, and have requested advice regarding suitable types of shrubbery and trees for home planting.

A number of addresses, generally illustrated with lantern slides, have been given during the year to Short Courses, Horticultural Societies, Women's Institutes and other organizations, on topics of horticultural interest.

HORTICULTURAL EXPERIMENT STATION, VINELAND

During 1934 a change in relationship was made as between the Experiment Station and the Ontario Agricultural College. This change, involving the appointment of the Director of the Horticultural Experiment Station as Head also of the Department of Horticulture at the College, was made with the view of more completely coördinating the activities of the two institutions, particularly in the field of student instruction. As a result, the teaching of pomology in all its phases is being handled by members of the staff of the Experiment Station. In addition, arrangements were completed whereby students who require practical experience in fruit and vegetable culture, will be given employment during the summer at the Horticultural Experiment Station.

EXTENSION WORK

Nursery Inspection for the Elimination of Varietal Mixture. Fruit growers have always complained about the losses incurred when varieties of tree fruits proved untrue-to-name. At the conclusion of two years' intensive study of variety growth habits in nurseries, an inspection service for the elimination of varietal mixtures in tree fruits in Ontario nurseries was offered. The 1934 season was the tenth consecutive year in which this service was extended to nurserymen and fruit growers. Although this inspection has never been compulsory, practically all Ontario nurseries have been accepting it willingly during this period.

Mixtures have been either broken down or labelled correctly, at the discretion of the nurseryman. Usually only standard varieties are labelled which occur as a mixture in large numbers, otherwise the mixture is broken down immediately. Not only has the system of roguing out varietal mixtures been effective in a direct way, but it has shown nurserymen how mixtures may occur and thus suggested ways of avoiding them. Although mixtures are not now as prevalent as they were at the commencement of the inspection, they are still occurring, which is an indication that continual inspection is required. Table I shows that about 6½ million trees, of which approximately 1 per cent. were untrue-to-name, were examined in the ten year period.

TABLE I.
SUMMARY OF TEN YEARS NURSERY INSPECTION FOR VARIETAL MIXTURES,
1925-1934 INCLUSIVE

Year	Total Number of Trees Examined	Total Number of Mixtures Found	Mixtures as Per Cent. of Total
1925.....	856,100	14,421	1.7
1926.....	659,350	12,399	1.9
1927.....	705,500	5,230	0.7
1928.....	669,700	3,500	0.5
1929.....	599,200	2,123	0.35
1930.....	556,000	7,165	1.3
1931.....	540,000	4,735	0.9
1932.....	694,000	2,855	0.4
1933.....	679,300	8,073	1.2
1934.....	622,500	5,002	0.8
Total.....	6,581,850	65,503	1.0

Winter Injury to Peaches. Following the severe winter of 1933-34, extensive counts of live and dead blossom buds were made of commercial peach varieties throughout the district, and also of new varieties and seedling selections in the Station orchards.

The results showed that the standard variety, *Elberta*, which is rather tender in bud, suffered nearly 100 per cent. injury in unfavourably located orchards in the district from Grimsby to Hamilton, whereas injury was progressively less towards the Niagara River. Many of the best situated orchards in the east end of the Peninsula were not injured sufficiently as to cause crop reduction.

Recent commercially important introductions from this Station may be ranked as follows: *Veteran* is considerably hardier than *Elberta*, *Vedette* is slightly hardier, and *Valiant* is equally as tender as, or more tender than, *Elberta*. Other recommended varieties that are hardy are *Rochester* and *South Haven*. Other tender varieties include most of the *Crawford* group.

Results demonstrated very forcibly that the degree of winter injury is closely connected with the condition and health of the trees, or, indirectly, with soil condition. In one of the Station orchards, where potash and phosphorus deficiencies are being studied, *Veteran* trees on soil that has had its fertility maintained had 65 per cent. of the fruit buds alive, while the same variety on mineral deficient soil had less than 45 per cent. alive on the best trees and only 8 per cent. alive on the poorest tree.

A more detailed survey of injury throughout the district supplemented by notes on tree growth, etc., might well have supplied a valuable index of soil conditions.

Meetings, Etc. As usual numerous fruit and vegetable growers meetings were attended and addressed by various members of the staff, and similar assistance given to the Short Courses in Agriculture in Lincoln, Welland and Wentworth.

Orchard Spray Service. The growers of the Niagara Peninsula were served as in former years. This particular activity has now grown to the point where well over 1,000 growers make use of it, each grower receiving timely mimeograph spraying instructions during April, May and June. From twelve to fifteen letters, in addition to the regular Spray Calendar were sent out. Because of the complexity of the spray program in the Niagara District, the work required the full attention of one individual during the three month's period noted.

EXPERIMENTAL AND RESEARCH WORK

Transplanting Experiments. Tests during two transplanting seasons indicate that fall planting of peach trees is undesirable because of resulting poor stand. Fall planting of the other tree fruits has proven very satisfactory. Late spring planting (May) resulted in many losses in sweet cherries, and in reduced growth of apples, pears and plums. Peaches, on the other hand, gave good results when planted in early May. Observations on the development of new roots on transplanted trees indicated that the plum forms new roots quickly, cherry and peach are very slow, and apple and pear are intermediate in new root formation. The unfortunate combination of early leaf development and tardy formation of new roots explains the poor results often experienced in transplanting cherries.

Mineral Deficiency Studies. In the spring of 1934, a block of 1,100 peach trees was divided into eleven plots for a preliminary study of mineral deficiency with special reference to phosphorus and potash. Since this block was composed entirely of seedling trees, it was interesting to note, during the first season's growth after applying the fertilizer, that plots fertilized with sulphate of potash showed unmistakable signs of improvement,—greener leaves and better growth,—while the check plots continued to show typical leaf symptoms of mineral deficiency. Dormant tissue samples will be collected in 1935 for chemical analysis. Leaf and stem tissue analyses will also be made in the field throughout the summer.

Potash Deficiency. During 1932 a large block of apple seedlings, planted in 1931, showed peculiar marginal burning of the leaves. This was diagnosed as being due to a lack of available potash in the soil.

In September of that year various fertilizer tests were made on a block of these trees. In one section potash was used, in the next section acid phosphate, and then a combination of the two. To get this material to the trees quickly some soil was removed, and the fertilizers were applied in contact with the roots.

During the 1933 season the difference between untreated and potash treated trees was very marked. The untreated trees still showed decided burning, while only occasionally did a potash treated tree show any trace of injury. Trees receiving acid phosphate showed slight improvement, but the improvement in growth of the accompanying rape green manure crop was very striking.

In 1934 the improved growth and appearance of the potash treated trees was still in evidence, but leaf tests indicated that more potash was required to permanently correct the trouble. With this in mind, a two-pound per tree application of potash was worked into the soil about the trees in the potash treated block. This is a very liberal application, the effect of which will be noted in 1935.

Grape Pruning and Soil Fertilization. After six years of annual applications of fertilizers in an experiment involving four acres of *Concords*, a slight indication of fertilizer effect was apparent in the increased weight of prunings, and also in the yield. There appears to be no indication at the present time that this soil fertilization has in any way affected the chemical composition of the grape, more particularly the sugar and acid content of the juice.

The annual fertilizer application so far has been: Nitrate of soda 200 lbs., superphosphate 600 lbs., and sulphate of potash 150 lbs. per acre. Owing to the lack of adequate response from these fertilizers at the rates mentioned, it is planned to make future applications as follows: Nitrate of soda 200 lbs., superphosphate 1,000 lbs., and sulphate of potash 500 lbs. per acre. This should give a better nitrogen-mineral balance.

The addition of straw to some of the plots (to increase organic matter content of the soil) has again given a marked increase in the weight of prunings removed, but so far has shown no increase in yield, largely due to the type of pruning given. Commencing in 1935, these plots will be pruned according to the vigour of the vines, as represented by the growth made the previous year. This should result in an increased yield, corresponding to the increased vigour produced by the applications of straw.

In the various plots receiving nitrate of soda at various times of the year, there was still no indication as to which time is best. The fall, early, and late spring applications have shown no increase in growth or fruit yield over the untreated plots. In 1935, lime will be applied in place of nitrate to some of these plots, at the rate of 1,500 lbs. per acre.

The soil analysis for phosphorus in the grape plots was completed. Figures are now available covering a period of five years, from 1929-1934. Very interesting results on the penetration of phosphorus is shown in this comparison. With one or two minor exceptions, the phosphates do not appear to have penetrated beyond a depth of six inches. All plots receiving phosphatic fertilizers show a marked gain in amounts of readily available phosphate in the surface level, but no gain whatever in the lower levels of the subsoil. As this soil type, Vineland clay loam, is inherently low in both phosphate and potash, it is hoped that a better penetration will be evident at the end of the next five year period.

Analysis for potash has been started, but not completed. Owing to the very difficult task of adapting a suitable method for the determination of potash in soils, this phase of the work is somewhat behind schedule. With the addition of some new equipment just received, however, it is hoped that potash analysis will be greatly facilitated, and completed in the very near future.

Sugar and acid analyses of the fruit on these plots were made in 1934, which completed five years' work on two samplings per plot in each year. It is hoped to prepare in the near future an interim report on the results to date of this experiment.

Artificial Culture of Peach Embryos. A preliminary study of the artificial culture of early ripening varieties of peaches, such as *Greensboro*, *Admiral Dewey*, *Mayflower*, and *Arp Beauty*, was undertaken during the past year. Hitherto, when "after-ripened" and planted during the spring in the usual way, the seeds did not grow. Investigational work by H. B. Turkey of the New York Experiment Station has brought to light that this failure to grow is due to arrested development of the embryo during the growth of the fruit. By removing the embryos at an early stage and growing them under artificial conditions, he has proven that successful germination can be obtained. Taking this discovery for a basis, a number of different varieties were tried, in order to determine their response to artificial culture. Methods of sterilizing the embryos, applying nutrient solutions, and the handling and transplanting of young seedlings were studied, with the aim of finding the most economical way of handling larger quantities of promising seed.

Strawberry Root Rot. Ontario growers are finding it more difficult from year to year to grow strawberries profitably, especially in the older strawberry growing sections along the shore of Lake Ontario from the Niagara River to Toronto. Various causes have been suggested such as running-out of varieties, winter injury, etc. It has been definitely determined, however, by work in plant pathology, carried on at this Station and elsewhere, that various fungi living in the soil are very largely responsible for much of the reduction in yields, by causing rotting of the roots and consequent lack of vigour in the plants. One of the main experimental projects at present in small fruits is to work out some scheme whereby growers may obtain plants that are relatively free from these root organisms, and also to find a system of rotation that will help to hold in check the injurious organisms in the soil.

PLANT BREEDING AND NEW VARIETIES

STRAWBERRIES. In strawberry breeding the main purpose is to meet the demands of growers for better early sorts, and also for improved shipping and preserving varieties.

There are a considerable number of selections on hand, several of which are promising as early berries. Two in particular are earlier than *Premier*, the present standard early. These selections yield as well as or better than *Premier* and appear to make better rows. Among the mid-season selections, there are also several that show promise of improvement over some of the present commercial varieties.

Under test also are the more outstanding new varieties from the U.S. Department of Agriculture, from the New York Agricultural Experiment Station at Geneva, N.Y., and from several private sources. Probably the two most outstanding new sorts are the *Dorsett* and *Fairfax* from the U.S.D.A. The *Blakemore*, also from the U.S.D.A. and much heralded in the U.S.A., has not shown up to advantage at Vineland. Of the newer sorts from the Geneva Station, *Caledonia* and *Culver* appear to be the most promising.

RASPBERRIES. Although the *Viking* red raspberry, an origination of the Vineland Station, is making a distinct place for itself among commercial growers, yet under some conditions of soil and exposure it is subject to winter injury. Present breeding work has in mind increased hardiness in good quality varieties, and relative immunity to virus diseases. At present there are a number of selections under trial from earlier breeding work, and several of these appear to be worthy of increase for the purpose of a more extensive trial with suitable growers. These selections all have *Viking* as one of the parents, and in future breeding *Viking* will be used still more in combination with hardier varieties.

The more outstanding of the newer varieties from various sources are under test. These include *Latham*, *Chief*, *Newburgh*, *Lloyd George*, *Newman* and *Adams 87*. *Newburgh* and *Latham* are creating considerable interest among growers, and they show definite promise of becoming commercially important varieties. They are both the result of definite breeding work carried on at Experiment Stations. The *Newburgh* variety is from the Agricultural Experiment Station at Geneva, N.Y., and *Latham* is from the Minnesota Agricultural Experiment Station.

GRAPES. Of the many new varieties under test, *Ontario*, *Fredonia* and *Lomanto* appear to have the most value. *Ontario*, under the conditions at Vineland, has continued its good performance. It came through the winter of 1933-34 without injury, the fruit was early and of good quality, and, contrary to some reports on this variety, did not shell off the bunch.

Fredonia appears to be a good early black variety, and, though small in bunch, has large berries. The quality is good and it appears to be hardy.

Lomanto is without doubt the Station's best addition to the list of strictly wine grapes. In the graperies it is outstanding in appearance, with good growth and characteristics; the black fruit is very showy against the red colour of the shoots. Wine tests indicate that it will give an excellent wine for blending purposes, as the quality increases remarkably with age.

PEACHES. Many growers have expressed the need for new early varieties of peaches to fill the gap, at present imperfectly filled, by such varieties as *Admiral Dewey* and *Cowell*, and also for further varieties to complete the *Veteran-Elberta* season.

Seedling No. 250810: This is a *Hale x Vaughan* seedling of very handsome appearance. Its season is just after *St. John*, about with *Valiant*, and the fruit appears to hang for a long time on the tree. Its chief fault is a tendency to clinginess. In 1933, 180 trees were distributed for trial among 21 growers.

Golden Jubilee: This variety, which has been recently added to the recommended list, is a second generation seedling of *Elberta* and *Greensboro*, and was produced by the New Jersey Experiment Station. It is an attractive, yellow-fleshed, freestone peach, that helps to fill a much needed want in the season several days before *Rochester*. As a result of its performance at Vineland, many growers are showing an interest in this variety, which was first planted for test on the Station grounds in 1927.

APPLES. The *Secor* apple, a *Salome x Jonathan* seedling from Iowa State College, now fruited at Vineland for the third year, looks very promising as a late winter apple of good quality and appearance. Like *Salome* it may be inclined to overbear and require heavy thinning, but when thinned it produces a very attractive apple of good size. It is of much better quality than *Salome*, lacking the high acidity of that variety. All available scions of this variety have been sent to interested growers, particularly east of Toronto where *Salome* itself is proving profitable. *Secor* is worthy of trial where a late winter apple is wanted. Several Ontario nurseries are propagating the variety.

CHERRIES. "Fisher" Seedling Cherry (*Baldwin*, "Fisher" Seedling, and *Olivet* Cherries). These appear to be one variety under three names (*Baldwin* and *Olivet* being misnomers) from three sources; it is a most promising variety, maturing with *Early Richmond* and superior to that variety. It has been fruiting in the Station orchard for some years.

As the *Early Richmond* is now being pretty well discarded, the introduction of a better cherry of the same season seems timely. This new variety is just as productive, makes a longer lived tree, and produces fruit of culinary qualities much superior to *Richmond*. This new variety, the seeds of which will be distributed to interested nurseries under the name *Fisher*, retains its rich colour when cooked, rather than fading as does *Richmond*, and has more of the *Duke* type quality in richness of flavour.

Hedelfingen Sweet Cherry: This variety originated in Hedelfingen, Germany, and has been fruiting regularly in the Station orchard, where it has attracted considerable attention as a black sweet cherry to follow *Windsor*. Several Ontario nurseries are now propagating the variety, on the recommendation of this Station. Its performance in the Station orchard and in a Grimsby orchard justifies its being recommended, where a large late black sweet cherry is wanted.

PEARS. *Gorham Pear:* Of the newer varieties of pears, *Gorham*, a recent introduction from Geneva, N.Y., is the only one which Vineland tests indicate worthy of wider trial. It matures perhaps too soon after *Bartlett*, but its quality and appearance warrant that it should receive a thorough trial.

Durondeau, another new pear variety, about which little is known as regards quality, is being observed with interest.

Selection and breeding projects were carried on with a number of other fruits and vegetables,—tomatoes, plums, sweet peppers, sweet corn, lettuce and asparagus. Registered Elite stock seed, covering several varieties of vegetables, was produced and maintained in co-operation with the Canadian Seed Growers Association, some of which has been distributed under seal to commercial growers.

WESTERN ONTARIO EXPERIMENTAL FARM, RIDGETOWN

GENERAL INTRODUCTION

Crops during 1934 in Southwestern Ontario were uneven, ranging from very poor to excellent, according to the moisture supply and the amount of winter and spring injury suffered by the Fall wheat. In many cases, corn and beans and sugar beets germinated unevenly or not at all. Late sown beans and corn grew well but did not mature properly or were injured by frost. Hay was a very light crop. However, because of the very good crops of corn, sugar beets, and in some instances, beans and tobacco, wherever conditions were at all favourable, the situation was better than in 1933. The corn and bean crops supplied sufficient roughage to carry the livestock through the winter, and the feed situation was rendered less acute by the late Fall pasturage.

The prices of wheat, barley, beans, corn, tobacco and hogs improved sufficiently as to render the outlook considerably brighter.

The Spring months of May and June were exceptionally dry, and this accounted for the light hay and grain crops. The following is the rainfall, in total and in detail, for the growing months. It will be noticed that during May there were no useful showers, and only one in June and one in July. The rains on August 2nd and 8th were, however, responsible for the good crops. Until the end of October, the land was very dry; not only the surface soil but the subsoil as well was far too dry for Fall conditions.

RAINFALL

Following is a summary of the rainfall during the growing season of 1934:

April.....	3.55 inches (5 inches snow)
May.....	.54 "
June.....	1.02 "
July.....	1.54 "
August.....	4.16 "
September.....	2.50 "
October.....	.86 "
Total.....	14.21 " (5 inches snow)

FIELD CROPS (EXPERIMENTAL FARM, 1934)

Wheat.....	375 bushels from 25 acres—15 bushels per acre
Oats.....	720 " " 24 " —30 " "
Barley.....	295 " " 8 " —36+ " "
Beans.....	1,070 " " 30 " —35+ " "
Corn.....	1,800 " " 20 " —90 " "

STEERS

Purchased 20 head, November 26th, 1933, at Winnipeg, @ \$3,738.	
Weight per steer.....	844 lbs.
Total weight.....	16,880 lbs.
Total cost.....	\$631.06
Total cost of feed.....	\$389.61
Sold April 11th, 1934, 20 head, weight 21,760 lbs., @ \$5.75.	
Total selling price.....	\$1,251.20
Gain per steer.....	244 lbs.
Total gain.....	4,880 lbs.
Gain in total selling price over total cost price.....	\$620.14
Net gain, after deducting cost of feed.....	\$230.53

HORTICULTURE

The severe winter weather caused considerable loss to horticulturists. Peach losses, especially where no ground cover was provided, were greatest. Winter injury to apples was small, compared to other sections of the Province. Roses and herbaceous perennial casualties were heavy. Many kinds of ornamental shrubs froze back to the ground, but revived with the coming of Spring. Very probably the excessive drought of the preceding summer was a contributing factor to the winter losses.

Both the Ridgetown Agricultural Vocational School and the general public made considerable use of the horticultural displays, and of the advice given by the Farm. Three classes of boys from the Vocational School and a Short Course Class of girls received practical instruction at the farm greenhouse and in the orchards throughout the school year; practical home floriculture, home ground beautification, vegetable gardening and planting, training, pruning and spraying fruit trees were taught. These subjects are all of considerable value to well organized homes in rural communities and small towns.

Plant disease work was carried on in co-operation with the Department of Botany, Ontario Agricultural College, Guelph.

BEAN EXPERIMENT

The three strains of Robust beans, that had been obtained from Ithaca, Michigan and Wisconsin a few years ago, were again planted. The seed was from the 1933 crop, which had been rogued the previous summer for Mosaic and hand picked before seeding, in order to remove any anthracnose that might be noticed. Plots were sown early in June, each plot consisting of three rows about twenty-five rods long.

These were rogued for Mosaic, as follows:

Date	Wisconsin	Ithaca	Michigan
July 4.....	2	0	0
July 18.....	1	0	1
July 31.....	0	2	1
Total.....	3 plants	2 plants	2 plants

Plots were inspected for anthracnose on September 10th, just before pulling. Pods were examined, and the percentage of pods affected is given below:

Michigan.....	12.5%	Anthracnose
Ithaca.....	16.8%	"
Wisconsin.....	18.2%	"

As noted previously, the weather during May, June and July was very dry, and the early maturing varieties of beans ripened early. The heavy rains in August caused more growth in the late maturing varieties, but at the same time considerable anthracnose developed.

LATE POTATOES—DUSTING AND SPRAYING

Three plots were planted, each about $\frac{1}{3}$ acre, in rows 30 inches apart. All plots were fertilized with a 4—12—4 mixture at the rate of 600 lbs. per acre. Plots were planted with Dooley potatoes on June 22nd. Spraying and dusting were started on July 31st, when plants were about 8 inches high. Power machinery was used. One plot was sprayed with Bordeaux Mixture (4—8—40)

on an average of about 80 gallons per acre. One was dusted with Copotex and Copodust, on an average of about 30 lbs. per acre, and one plot was left as a check. The results are shown in the following table:

Treatment	Yield in bushels per acre	
	Marketable	Small
Plot 1. Spraying.....	316.5 bus.	10.5 bus.
Plot 2. Dusting.....	315.5 bus.	10.5 bus.
Plot 3. Check.....	304.0 bus.	10.0 bus.

FERTILIZER EXPERIMENTS

(a) On Sugar Beets:

Considerable discussion took place regarding the advisability of increasing the phosphate and potash content of the sugar beet fertilizers. During the past season, a series of experiments was carried on at the Experimental Farm, Ridgeway, and at eleven other private farms in the vicinity. The Fertilizer Experiment on sugar beets carried on at the Experimental Farm, and also the averages of the twelve experiments for 1934 are given below:

(1) Sugar Beets—Experimental Farm, Ridgeway.

Fertilizer and rate of application per acre	Yield per acre		Sugar per cent.	Purity per cent.	Value of yield per acre	Value of yield per acre after deducting cost of Fertilizer
	tons	lbs.				
2—12—6 @ 250 lbs....	13	1,300	17.7	89.1	\$84.29	\$80.16
2—16—6 @ 250 lbs....	13	1,400	16.5	87.1	80.49	75.99
2—12—10 @ 250 lbs....	14	1,600	16.3	90.0	86.21	81.71
2—16—10 @ 250 lbs....	14	1,900	16.3	87.2	87.08	82.20

(2) Sugar Beets—Averages 12 experiments for 1934.

Fertilizer and rate of application per acre	Yield per acre		Sugar per cent.	Purity per cent.	Value of yield per acre	Value of yield per acre after deducting cost of Fertilizer
	tons	lbs.				
2—12—6 @ 208 $\frac{1}{3}$ lbs..	12	1,267	15.40	87.13	\$70.64	\$67.20
2—16—6 @ 208 $\frac{1}{3}$ lbs..	13	125	15.46	87.36	73.37	69.62
2—12—10 @ 208 $\frac{1}{3}$ lbs..	13	150	15.22	87.18	72.77	69.01
2—16—10 @ 208 $\frac{1}{3}$ lbs..	13	475	15.43	87.22	73.93	69.87

Note: The results on sugar beets were based on prices paid to growers by the factory at Chatham.

(b) *On late Potatoes:*

The late potato industry should be more prominent in some sections of South-western Ontario, and the following tests will be carried on for at least five years, in order to secure reliable data for the section represented by the Ridgetown Experimental Farm.

(1) 4—8—10 applied at different rates of application.

Rate of application	Yield per acre (bags)	Increase over check per acre (bags)	Value of increase over check per acre	Cost of fertilizer	Gain per acre after deducting cost of fertilizer
200 lbs.....	162.7	27.7	\$13.85	\$ 3.50	\$10.35
400 lbs.....	171.1	36.1	18.05	7.00	11.05
600 lbs.....	181.1	46.1	23.05	10.50	12.55
800 lbs.....	185	50	25.00	14.00	11.00
1,000 lbs.....	167.2	32.2	16.10	17.50
None.....	135

(2) Fertilizer applied at 600 lbs. per acre.

Fertilizer analysis	Yield per acre (bags)	Increase over check per acre (bags)	Value of increase over check per acre	Cost of fertilizer	Gain per acre after deducting cost of fertilizer
4—12—6.....	154.4	29.4	\$14.70	\$10.50	\$ 4.20
8—12—6.....	157.2	32.2	16.10	12.90	3.20
4—16—6.....	168.8	43.8	21.90	11.40	10.50
4—20—6.....	164.4	39.4	19.70	12.30	7.40
4—12—4.....	169.4	44.4	22.20	10.05	12.15
4—12—8.....	158.3	33.3	16.65	10.95	5.70
4—12—12.....	157.2	32.2	16.10	11.85	4.25
None.....	125

Note: Results on late potatoes are based on price 50 cents per bag of 90 lbs.

(c) *On Beans:*

Twelve years ago, the commercial bean crop of Ontario was threatened, due to the prevalence of Anthracnose, which had become so serious that the bean growers asked for aid in solving the problem. The Experimental Farm accepted it as one of its major activities. Coupled with the disease problem, was the question of artificial fertilization versus the use of clover and barnyard manure, which had for many years been the accepted method of preparing bean land.

Various experiments have been carried on since that time to test out systems of fertilization, but up to the present time nothing has been found better than the clover and farmyard manure system. Slight increases have resulted from the use of artificial fertilizers, but not sufficient to warrant their general use, as for other crops. Results of the fertilizer experiment on beans for 1934 are given below:

(1) Fertilizer applied at 200 lbs. per acre.

Fertilizer analysis	Yield per acre	Increase over check	Value of increase	Cost of fertilizer
6-12-6.....	40 bus. 0 lbs.	\$3.90
4-12-6.....	44 bus. 10 lbs.	1 bus. 15 lbs.	\$1.87	3.50
2-12-6.....	41 bus. 40 lbs.	3.10
2-16-6.....	40 bus. 0 lbs.	3.40
0-12-6.....	38 bus. 20 lbs.	2.70
0-12-10.....	39 bus. 10 lbs.	3.00
2-12-10.....	35 bus. 0 lbs.	3.40
0-16-0.....	31 bus. 40 lbs.	2.00
None.....	42 bus. 55 lbs.

Note: The peculiar season must have influenced these results, since the soil was very uniform.

(2) Manure versus No Manure.

Manure.....	41 bus. 53 lbs.
No Manure.....	32 bus. 34 lbs.

Note: Manure was applied at the rate of 12 spreader loads per acre.

(3) Variety Test—Beans:

Every promising variety or strain in Ontario, Michigan and New York were tested for yield and disease during 1934.

Variety	Yield per acre
E.F.R.....	45 bus. 0 lbs.
Steen 4.....	41 bus. 53 lbs.
Ithaca 1936.....	40 bus. 20 lbs.
Maynard.....	38 bus. 46 lbs.
Steen 2.....	37 bus. 14 lbs.
Armstrong, Alvinston.....	32 bus. 34 lbs.
Robust.....	31 bus. 1 lb.
Zavitz.....	31 bus. 1 lb.
Wisconsin, D.R.S.....	29 bus. 28 lbs.
Ithaca, D.R.S.....	29 bus. 28 lbs.
Michigan, D.R.S.....	29 bus. 28 lbs.
Northwood.....	29 bus. 28 lbs.
Steen 3.....	27 bus. 55 lbs.
Early Prolific x Wisconsin.....	27 bus. 55 lbs.
Wisconsin x 8122.....	26 bus. 22 lbs.
8122 x Wisconsin.....	24 bus. 59 lbs.

Note: Variations in yields must have been partially caused by the peculiarities of the season.

SWINE

A herd of fifteen brood sows were kept at the farm until it was necessary to operate upon reduced appropriations. The herd was then reduced to seven, but the demand was so insistent, not only for breeding stock but also for some more definite experimental work regarding the feeding of corn, that it was again increased to twelve brood sows. In order to do experimental work upon a sufficiently large scale, there should be at least eighty to ninety spring and fall pigs.

The problem in Kent and Essex counties is different from that in other parts of the Province. The bacon hog has not been developed for two reasons; firstly, because of the ease of corn productions, and secondly because of the fact that the bacon hogs sent into Kent and Essex from the east were of an undesirable type and very poor feeders.

During the first three years that the Western Ontario Experimental Farm was in operation, considerable work with corn feeding was undertaken, and some definite conclusions were drawn. There are still, however, some problems that should be thoroughly investigated, which are vital to the establishment of a better swine industry in the western section of the Province. Now that the corn crop is coming back, much of the crop should be fed to hogs, if agriculture is to regain its proper balance. How much corn may be fed to a pig from weaning to finishing, and still produce satisfactory bacon sides? This question was only partially solved through past experiments. How, and to what proportions, may alfalfa be more largely fed to swine in conjunction with corn? These are some of the problems which have as yet not been completely determined.

Type is of very definite importance. The demand for breeding stock was largely because of the type of pig offered for sale. On account of the question of type, as many pigs as possible of the Farm's select breeding stock should be sold from the Farm for the next three to five years. After that, the breeders should be able to meet the demand.

POULTRY

The value of selected live stock, descended from several generations of ancestors of proven performance, is unquestionable. In distributing annually, at reasonable cost, some nine to twelve thousand hatching eggs of Barred Rocks of such ancestry, throughout the surrounding district, the Farm is aiding the rural poultry industry to an immense degree; the profits from such stock are at once recognised by the purchasers.

Fewer enquiries were received concerning poultry feeds, but increasing numbers asked about diseased birds. Parasites were responsible for most of the enquiries brought to the attention of the Farm. Chickens have been raised on the same untreated soil year after year, and this results in high losses, particularly from intestinal and caecal worms. All cases brought to the Farm were carefully examined; procedure was recommended, and, whenever necessary, a visit was made to the farms.

A foundation flock of at least one hundred hens of known ancestry and performance is kept, and a pullet flock of 350 is selected every fall. Eggs for hatching at the Farm come only from the foundation flock.

EXTENSION WORK

The usual extension activities were continued, which had to do with swine, poultry, tobacco, corn, and the general agriculture of this part of the Province. Considerable horticultural work was also carried on.

Assistance was again given to the Agricultural School. While not under the immediate control of the Western Ontario Experimental Farm, the school is,

nevertheless, largely a product of the extension activities of the Farm. The Farm is used extensively by the School, and principally for stock and poultry judging, horticultural work such as pruning and spraying apples, peaches, pears, cherries, grapes, berries and shrubs, and also for greenhouse work and grafting.

From April 1st to November 15th, the administration of Rondeau Park was assumed for the Department of Lands and Forests. During April, May and June, September and October about 40 per cent., and during July and August 66 per cent. of the Superintendent's time was devoted to that work. This necessitated the placing of more responsibility upon the shoulders of the men on the farm. It was, however, arranged satisfactorily, and the work was carried on without difficulty.

STATISTICS AND PUBLICATIONS BRANCH

The improvement in agricultural conditions, which commenced in the spring of 1933, continued during 1934. Although the volume of production was reduced during 1934, the rise in farm prices was of such magnitude, that the total value of agricultural output showed a considerable gain over 1933.

The acreage sown to the principal field crops in Ontario declined from 9,194,900 acres to 9,000,000 acres, representing a reduction of 194,900 acres or 2.2 per cent. from the preceding year. Oats, barley, peas, fall rye, flax, buckwheat, corn, sugar beets, potatoes and mangolds showed an increase over 1933.

The area under fall wheat and hay and clover crops was reduced by the most extensive winter-killing in years. Other crops having a lesser acreage in 1934 than during the preceding year were mixed grains, dry beans, and turnips.

The yield per acre of fall wheat, fall rye, buckwheat, dry beans, sugar beets, alfalfa, and hay and clovers, was less than in 1933. Spring grains, fortunately, withstood the dry growing season much better than anticipated, and yields per acre generally exceeded 1933, except in the southern part of Western Ontario where the summer drought was the most pronounced. Corn and roots benefited from excellent growing conditions during the latter part of the season, and good crops were harvested. The total hay crop amounted to only 4,286,500 tons, as compared with 6,182,900 tons in 1933. The shortage of hay supplies was supplemented by heavy yields of corn and root crops, and a surprising improvement in the condition of late pastures, following heavy rains in late August and early September. A late freeze-up, which did not take place until the first week in December, permitted beef cattle to graze from five to seven weeks longer than usual. Prices of most secondary products were not high enough to warrant the purchase of hay at prevailing quotations, and farmers carried their stock through the winter by feeding increased quantities of straw, stooked corn, roughages and molasses.

The gross annual agricultural revenue of Ontario for the years 1930 to 1934 is set out in the table below. The estimates for 1934 are preliminary and subject to revision. No allowance has been made in these calculations for the portions of crops used for seed and in the feeding of live stock. Because of these duplications the totals represent gross values.

GROSS ANNUAL AGRICULTURAL REVENUE OF ONTARIO, 1930-1934
("000" omitted)

	1930	1931	1932	1933	1934
Field Crops	\$179,919	\$124,541	\$116,424	\$135,813	\$143,734
Farm animals	60,738	33,486	21,957	31,500	34,089
Wool	632	458	287	553	585
Dairy Products	103,095	82,155	69,079	74,117	79,059
Fruits and vegetables	20,207	16,424	12,733	12,553	14,388
Poultry and eggs	41,461	25,067	18,565	16,294	18,246
Fur farming	817	603	614	721	733
Maple products	1,576	1,563	888	720	1,040
Tobacco	6,244	6,814	5,703	6,204	6,338
Flax fibre	371	179	170	159	250
Clover and grass seed	1,855	1,110	615	1,079	857
Honey	870	824	619	895	1,029
Total	\$417,785	\$293,224	\$247,684	\$280,608	\$300,348

The value of the production of principal field crops in Ontario in 1934 is placed at \$143,734,000 as compared with \$135,813,000 in 1933, an increase of \$7,921,000, or 5.8 per cent. The price per unit of all field crops except potatoes and sugar beets was higher. In the case of hay and clover, wheat and dry beans, the increase was substantial. It must be borne in mind, however, that the estimated value of the hay crop is based upon the market price of the relatively small proportion of the entire crop which enters into commerce. The bulk of this crop is fed on farms, and the returns depend upon the price received for what may be termed, secondary products. In Ontario, 70 per cent. of the net agricultural income is derived from the sale of dairy products, live stock, and poultry and eggs. The prices of these products determine largely the economic position of Ontario farmers.

Prices offered for cheese during 1934 were quite low and averaged about one-third cent per pound below the average for the preceding year. Butter was 4 to 6 cents a pound higher in January, February and March of 1934 than in 1933, but during the balance of the year prices averaged practically the same as a year earlier. Producers of whole milk for human consumption were favoured by a substantial rise. Toronto dairies in December, 1934, were paying producers \$2.10 per cwt. for milk delivered, as compared with \$1.81 at the beginning of December, 1933. The production of butter in Ontario showed a gain of approximately 5 per cent. over the previous year. This increase was, however, at the expense of a reduction in the make of cheese, which showed a reduction of more than 8 per cent. from 1933. The output of cheese has declined so steadily in recent years, that some concern over the situation is expressed in many quarters.

The price trend in live stock was irregularly firmer. Bacon hogs, W.O.C. Toronto, rose from \$3.75 in January, 1933, to \$6.93 per cwt. in December, 1933. The advance continued in 1934 until a high of \$9.87 was reached at the beginning of March, but from this level the price fluctuated downward to around \$8.00 at the end of the year. The price of calves ranged from 75 cents to \$1.50 per cwt. higher during the first months of this year over corresponding months of last year. In June the price fell rapidly, and from July onward the price was practically the same to slightly better than in 1932. In the case of lambs, prices during the first half of the year were considerably stronger than in 1933, but after June 1st were very close to prices prevailing a year earlier. Light butcher cattle were in keen demand and prices of good quality steers, under 1,050 pounds, rose considerably. Heavier steers, weighing over 1,050 pounds, fetched moderately higher prices during the first half of the year, but sold off towards the end of the year, and prices at the end of November had declined to the same level as in November, 1933.

All classes of live stock on farms in Ontario, according to the June Survey, showed reductions from the previous year. The total number of horses on June 1st, 1933, was 567,100, and on June 1st, 1934, the number reported was 563,700. Cattle holdings declined from 2,522,200 head to 2,494,500; swine from 1,257,900 to 1,177,900; and sheep and lambs from 1,000,900 to 962,300.

During the spring of 1934 egg prices were two to three cents above those of 1933. During the summer, prices were rather depressed but improved in the autumn and showed a fair margin of profit to producers who had eggs to market at that time. Dressed poultry prices showed only a very slight improvement over 1933, and returns were rather discouraging. Exports of dressed poultry to the United Kingdom increased by almost 100 per cent. A development which

deserves comment was the introduction in Ontario of a Grade A-1 egg, packaged by the better commercial producers, and sold for around six cents per dozen more than prevailing prices for Grade A eggs. The number of hens and chickens on farms, at the 1st of June, showed a small reduction from last year, with 21,729,400 reported in 1933, and 21,567,000 in 1934. Both these years show a huge increase from a few years earlier. In 1920 the poultry population of the Province numbered only 11,031,000.

The statistical work of this Branch includes the preparation and publication of monthly reports relating to the condition and production of field crops, live stock and fruits. Average prices received by farmers for farm products are compiled from monthly price schedules completed by a large number of farm correspondents. The acreage of field crops, numbers of live stock and marketing intentions, are collected by means of a census of farms conducted twice a year in June and December, with the co-operation of the rural school teachers.

The Annual Reports of the various Departments printed for distribution during the year were as follows:

	No. of Copies Printed
The Report of the Minister of Agriculture.....	1,500
The Ontario Agricultural College.....	2,000
The Experimental Union.....	2,500
Agricultural Societies.....	6,000
Horticultural Societies.....	7,000
Vegetable Growers' Association.....	2,500
Ontario Veterinary College.....	1,500
Agricultural Development Board.....	2,000
Stallion Enrolment Board.....	2,500
Agricultural Statistics.....	6,000
Entomological Society.....	1,500

During the year the following agricultural bulletins were printed for distribution:

Serial Number	Title	No. of Copies printed
350.....	The Warble Flies.....	25,000
357.....	Top Working and Repair Grafting.....	7,500
360.....	Farm Underdrainage.....	10,000
376.....	The Weeds of Ontario.....	20,000
377.....	Bee Diseases.....	5,000

Farmers desiring literature on farming may secure a list of the available free bulletins by addressing an enquiry to the Director, Publications and Statistics Branch.

AGRICULTURAL AND HORTICULTURAL SOCIETIES BRANCH

AGRICULTURAL SOCIETIES

For nearly a century and a half, Agricultural Societies have been giving leadership in the best interests of Agriculture and rural life. Difficult economic conditions have not materially lessened the number, nor decreased their strength.

Fall Fairs:

In 1934 three hundred and seventeen Societies were recognized by the Agricultural Societies Act, of this number 292 held fall fairs. For different reasons, 12 Societies, which had conducted fairs in 1933, did not function in this respect in 1934; on the other hand 5 Societies held fairs this past season, although inactive in this respect during the previous year.

Interest in fall fairs is not waning, but on the contrary over 50 per cent. of the Societies reported increased gate receipts this year, over the previous season, when attendance generally was very large. While weather conditions were quite unfavourable for production, particularly in South Western Ontario, exhibits were generally of high quality and very numerous.

Cloudy weather prevailed, over a good part of the season when fairs were held, but wet days were few. The special Wet Weather appropriation was used to assist 45 Societies. As the amount available was increased to \$10,000 the grant to each amounted to the full 90 per cent. of gate receipt losses, allowed by the Act.

Other Projects:

Interest in other agricultural projects is increasing. Nine Societies received special grants for the maintenance of pure bred stock, totalling \$2,165.00. The following animals were maintained:

Bulls.....	67	Rams.....	9
Boars.....	28	Stallions.....	1

Five Societies received special grants on Spring Stock Shows.

A recommendation of the Ontario Association of Fairs and Exhibitions was accepted, which offered grants for Standing Field Crop Competitions, on the following basis:

To Agricultural Societies agreeing to supply 50 per cent. of the prize money, grants equal to the other 50 per cent. were made available from the Federal and Ontario Departments. Judges were paid by this Department, but their expenses while in Society areas were covered by Societies. Thirty-six competitions resulted, as follows:

Kind of Crop	No. Competitors
Oats.....	407
Potatoes.....	165
Barley.....	25
Corn.....	20
36	617

Prize money was provided by the Ontario and Quebec Brewing Industry for 10 crop competitions in Malting Barley. Five of these were allotted to Eastern Ontario, and the balance to the Western section. Prizes were liberal, as \$105.00 was provided for each competition, which permitted 6 prizes, the first being \$30.00.

In addition, the same donors gave \$18.00 for each of 60 Agricultural Societies for Special Malting Barley Classes at Fall Fairs. Prize money totalling \$50.00 was given also to each of 3 Winter Fairs and 3 District Seed Fairs.

Agricultural Society Officers are becoming more interested in the promotion of good seed. Seed Cleaning Plants, which received Government grants, are now being operated by the Agricultural Societies at Earlton Junction, Vankleek Hill and Sturgeon Falls. The Camden Agricultural Society was chiefly responsible for the establishment of a seed cleaning plant at Dresden, and at least one other Society has a similar plan under way.

The Vankleek Hill Society is to be congratulated on another crop improvement project. With the assistance of Federal Officers, a "Rod Row" demonstration plot was planted and cared for by the Society. Samples of seed were selected from lots which members had brought to the seed cleaning plant, and these were grown for comparison with seed of leading varieties supplied by the Dominion Cerealists. Field meetings were held, by which Society members were able to learn much about the value of high class seed of suitable varieties.

Six Agricultural Societies and two independent organizations sponsored spring seed fairs. A new feature this year was the co-operation of Agricultural Societies in the operation of joint seed fairs. One such fair was held at Renfrew, under the auspices of Renfrew and Arnprior Societies, and another at Earlton, sponsored by New Liskeard and Earlton Societies.

Agricultural Society Classes for seed grain proved so successful at the Ottawa and Guelph Winter Fairs last year, that they were continued this year, and, in addition, the Class open to five Counties was provided on the same basis, at the South Western Seed Fair held in February at Chatham.

The Canadian National Exhibition provided \$1,000 for classes open to Agricultural Societies in grain and sheaves. Ten competitors entered in the former and six in the latter, which made a very interesting and attractive display. In addition, a Championship Sheaf Class was provided, which was open to members of Agricultural Societies.

The largest entry was realized at the 1934 Guelph Winter Fair, which was open to Western Ontario only. Twenty-one Societies competed, with 105 Society members represented.

HORTICULTURAL SOCIETIES

In spite of economic difficulties, the result of which was a drastic falling off of revenue, Horticultural Societies continued their good work. The number active dropped from 284 during the previous year, to 272 in 1934. While the Government grants were larger this year, the effect of previous curtailment made it necessary for a number of these Societies to remain dormant for this season at least.

The Ontario Horticultural Association was more active during the past year, and special reference should be made to a series of 12 radio talks given each Thursday evening between June 7th and August 30th. Letters of appreciation and requests for information were received as follows:—

Ontario.....	111	New Brunswick.....	19
Quebec.....	52	Nova Scotia.....	14
Alberta.....	29	Prince Edward Island.....	4
Saskatchewan.....	33	United States.....	3
Manitoba.....	41		

This response indicates appreciation of the service rendered by the Association.

A continued interest in beautification in all parts of the Province was indicated by heavy demands made upon the Horticultural Society's lecturer. By special request, he gave addresses at 123 Horticultural Society meetings, and, in addition, attended 24 Society Committee meetings.

There was an increased demand from other organizations, such as Service Clubs, Lodges and Schools, and 57 addresses were given to such groups. Some of the most appreciative audiences, according to the lecturer in Horticulture, were found when visits were made to High Schools.

In referring to the amount of winter injury, the lecturer reports an encouraging determination to replace, and planting was very heavy during the season.

ONTARIO VEGETABLE GROWERS' ASSOCIATION

Through the Vegetable Fieldman, co-operation with the Ontario Vegetable Growers was continued. The Fieldman was called upon to address many meetings, and to assist Branches with local problems.

Vegetable Crop Competitions, formerly so prominent, were restored in part. Prizes were supplied by this Department and the Ontario Vegetable Growers' Association, each paying half. The following competitions resulted:

DISTRICT NO. 1—(Cyrville, Ottawa, Kingston, Peterboro and Brockville Branches)

Crop	Entries
Cabbage.....	11
Celery.....	7
Lettuce.....	8
Melons.....	9
Tomatoes.....	13
Gardens.....	8
	56

DISTRICT NO. 2—(St. Catharines and Brantford Branches)

Cabbage.....	8
Potatoes.....	11
Melons.....	9
Onions.....	7
Tomatoes.....	10
Gardens.....	6
	51

DISTRICT NO. 3—(Scarboro, Toronto and London Branches)

Cabbage.....	14
Celery.....	9
Onions.....	5
Potatoes.....	7
Tomatoes.....	9
Gardens.....	6
	50

All of these were judged by the Fieldman.

At the Canadian National Exhibition this year, the Vegetable Growers were provided with much more space in the Western Wing of the Coliseum. The Branch exhibits were shown to greater advantage. The awards were placed as follows:

1st—Toronto
2nd—Scarboro
3rd—London
4th—Peterboro

5th Brantford
6th—Credit Valley
7th—Kingston
8th—St. Catharines

There was excellent competition in vegetables at other Fairs. At the Royal Winter Fair, to rouse greater interest in the various competitions, a trophy was donated by the Ontario Vegetable Growers' Association for the grower securing the greatest number of points.

Community Garden Committees, serving the unemployed of several cities, were given assistance particularly by practical talks to these amateur gardeners, and advice to committees in charge. The Fieldman assisted in the judging of some 10,000 plots.

Though held at a busy time, a number of Vegetable Growers attended the annual Convention of the Vegetable Growers of America, which was held in Toronto from August 20th to 23rd. Assistance was given in planning this Convention, particularly in field trips.

ONTARIO PLOWMEN'S ASSOCIATION

Interest in good plowing is increasing, and this year 72 branches of the Ontario Plowmen's Association held matches. This shows an increase of 4 over the previous year. In addition, 19 junior competitions were conducted.

Competent judges were supplied by the Department for the majority of these events. To insure uniform judging, a conference of judges was held at Donalds Farm on August 17th. Though obliged to pay their own expenses, practically all of those invited attended, and very profitable results were obtained.

There was a greater demand for demonstrations, and expert demonstrators were sent to the following Counties:

Thunder Bay, Algoma, Middlesex, Haldimand, Halton, Lincoln, York, Frontenac, Lennox and Addington, Dundas W., Stormont W., and Glengarry.

INTERNATIONAL PLOWING MATCH

The largest entry in history was realized at the International Plowing Match and Farm Machinery Demonstration, held on Maryvale Farm, Wexford, York County, on October 9th to 12th. Weather was ideal, and Maryvale Farm offered accommodation which would be difficult to duplicate.

There were 432 entries in horse drawn classes and 107 tractors, a grand total of 539. The Inter-County Competition for juniors was outstanding. Fifteen teams of 3 boys each entered, and these 45 young men displayed skill which will do much to improve plowing in the Counties which they represented. The first position was won by the York County team, with Waterloo second, and Perth third.

In the Tented City, educational displays were provided by the following:

Ontario Hydro-Electric Power Commission,
Central Experimental Farm,
Ontario Board of Health,
Ontario Veterinary College,
Ontario Agricultural College—Chemistry Dept.,
Ontario Department of Agriculture—Seed Cleaning Demonstrations.

The prizes for best plow teams brought out a large number of excellent horses, and, to qualify, each team was required to plow. Prizes, which numbered 24, were provided by the Dominion Department of Agriculture and Mr. T. A. Crow. A total of \$395.00 was awarded, the first prize being \$40.00. The three teams ranking high were entered by the following:—

Donalda Farms, Todmorden,
Maryvale Farm, Wexford,
T. A. Crow, Scarboro Junction.

The banquet tendered by the City of Toronto was attended by about 700 plowmen and their friends, and brought to a close a very successful plowmen's week.

Financial support was given by the Dominion Department of Agriculture, Ontario Department of Agriculture, Municipal Councils of York, City of Toronto, and public spirited citizens. Appreciation should be given to those arranging educational exhibits and to the Hydro-Electric Commission, which supplied power, light and water.

LIVE STOCK BRANCH

FOREWORD

Generally speaking, the sheep industry in the Province of Ontario has made satisfactory returns in comparison with other lines of live stock. There is a gradual tendency on the part of Ontario farmers, by earlier breeding, to market their lambs during the early summer months when prices have been more satisfactory and lamb runs smaller. Considerable interest is being shown by Ontario farmers in the feeding of Western lambs for marketing during the winter months and at the end of 1934 approximately 23,000 lambs were on feed in the Province of Ontario. Cold storage holdings of lamb at the end of the year were about the same as the average holdings for the last five-year period. The imports of lamb into Canada during the year were reduced to 37,039 lbs. which indicates that since our export of mutton and lamb amounted to slightly less than our imports, our production is entirely dependent upon our domestic market. Breeders of pure bred stock report for some breeds an increased demand for rams from the United States. Generally speaking, the trade however has been rather dull.

SHEEP EXTENSION WORK

The sheep club work of the Ontario Live Stock Branch inaugurated in 1928 under which 729 flocks were placed on farms on which sheep were not previously kept, was discontinued in 1932, but supervision of these flocks has been given during the past year. These flocks were placed on a share basis and under the terms of the policy 260 contracts have been completed. Supervision of the remaining flocks will be necessary until such time as all contracts are complete or satisfactorily adjusted.

Under the Federal-Provincial Sheep Club Policy there are at present five clubs in existence. They are all located in the Orillia district in Simcoe County. This year a joint fair was held in Orillia for the boys and girls in these clubs and to which the Ontario Live Stock Branch contributed the sum of \$135.00 in prize money.

RAM GRADING AND RAM BONUSES

This Policy, operated jointly by the Dominion and Provincial Live Stock Branches, was continued through the past fiscal year. The grading service in the fall of 1933 was taken advantage of by 330 breeders who had 2,116 rams graded. They were classified as 808 XXX and 1,308 XX. Of the 2,116 rams graded, 451 were yearlings and 1,665 lambs. Assistance under the Bonus Policy in the purchase of the rams, as outlined in the 1932 report, was given to Ontario farmers purchasing these graded rams. During the fiscal year 1,039 rams were placed on private purchase and the assistance granted to purchasers under the Policy amounted to \$2,780.00. In addition, the breeders of XXX rams received assistance to the extent of \$826.00 on the sale of XXX rams to Ontario farmers.

The assistance offered to Ontario farmers on the purchase of graded rams was as follows:

On the Purchase of	Bonus payable by Ontario Department to Purchaser	Bonus payable by Dominion Department to Purchaser
XX Lamb.....	\$2.00	\$2.00
XX Yearling.....	3.00	3.00
XXX Lamb.....	3.00	3.00
XXX Yearling.....	4.00	4.00

The assistance offered to Ontario breeders of XXX graded rams when such rams were sold for use to Ontario farmers amounted to \$2.00 per ram.

In certain sections of the Province where graded rams were not conveniently available to commercial sheep raisers, ram clubs were formed under the terms of the Dominion Ram Policy in which the Ontario Live Stock Branch assisted jointly with the Dominion in the placing of these rams. The following clubs were formed:

Name of Club	No. of Rams	Breed
Algoma.....	11	Oxford, Shropshire, Southdown and Leicester
Renfrew.....	15	Oxford

The total expense to Ontario involved in the placing of these rams amounted to \$63.00. This policy has now been discontinued by the Ontario Department.

THE DOG TAX AND SHEEP PROTECTION ACT

During the fiscal year November 1st, 1933, to October 31st, 1934, ten appeals have been received under this Act from the following Counties: Prescott, Russell, Wentworth, Muskoka, Hastings, York and Grey. These appeals have been dealt with under the terms of the Act and awards made.

CATTLE IMPROVEMENT WORK

The work of the Ontario Live Stock Branch has been centered upon the advancement of the Federal-Provincial Bull Policy, under which bonuses were paid to purchasers of graded bulls. The grading service was provided by the respective breed associations. This Policy became effective in the spring of 1933 and has been carried forward by the Federal and Provincial Departments and breed associations until discontinued in July 1934.

Under the terms of the Policy the following summarizes the grading of bulls of beef breeding:

Breed	GRADE OF BULLS		
	X	XX	XXX
Shorthorn.....	580	698	24
Aberdeen Angus.....	89	43	17
Hereford.....	158	127	5

This grading service was maintained by the fees collected from the breeders.

During the fiscal year November 1, 1933, to October 31, 1934, a total of 1,164 bulls of beef breeding and 761 bulls belonging to the dairy breeds were purchased and approved under the terms of the Federal-Provincial Bull Policy. The total bonuses paid by Ontario during this period amounted to \$20,041.39. The bonuses paid by the Dominion Department during the same period amounted to \$29,110.00.

The following summarizes the purchases made by Ontario farmers according to grade and according to breed:

Breed	GRADE OF BULLS			Total Number of Bulls	Bonus Paid by Dominion Dept.	Bonus Paid by Ontario Dept.
	XXX	XX	X			
Shorthorn.....	10	507	362	878	\$ 9,170.00	\$12,265.78
Aberdeen Angus.....	7	27	51	85	855.00	1,183.40
Hereford.....	0	95	106	201	1,985.00	2,702.50
				1,164	\$12,010.00	\$16,151.68

Breed	GRADE OF BULLS				Total Number of Bulls	Bonus Paid by Dominion Dept.	Bonus Paid by Ontario Dept.
	AA or XX	A or X	3-8 mos.	Under 3 mos.			
Holstein.....	55	307	90	32	484	\$10,830.00	\$2,506.08
Ayrshire.....	12	79	34	6	131	2,860.00	768.05
Jersey.....	11	98	17	3	129	3,010.00	545.58
Guernsey.....	1	14	2	0	17	400.00	70.00
					761	\$17,100.00	\$3,889.71

CALF CLUBS

In co-operation with the Federal Department of Agriculture and the Agricultural Representatives Branch, Calf Club work has been carried on during the year. A total of forty-seven clubs completed their programme of work and the Ontario Live Stock Branch contributed a total of \$1,387.13 toward the prize lists of these clubs as well as providing prize ribbons. In addition prize money of \$45.00 was furnished to the Inter-Club Cattle Competition. This Calf Club work has developed much interest, particularly among the younger farmers, in better breeding and better feeding of cattle. Unquestionably, the training these boys are receiving is making them more interested in their job as live stock farmers and many of these boys will undoubtedly prove to be the cattle showmen of tomorrow.

In special cases the Ontario Live Stock Branch has also assisted in the payment of freight charges on calves for club work when such calves could not satisfactorily be purchased in the district where the club was organized.

WARBLE FLY CONTROL

Through the efforts of Dr. Lionel Stevenson, Provincial Parasitologist, in co-operation with Agricultural Representatives and leading farmers, vigorous campaigns for the control of warble flies have been conducted with results very

satisfactory to the cattle owners. The Ontario Live Stock Branch has been associated with this work and on Manitoulin Island, where experimental work has been carried on in this connection, assistance has been given to the extent of \$200.00 toward the purchasing of powder for the treatment of cattle. In all other localities the purchase of powder was either paid for by the cattle owners or jointly by the cattle owners and grants from the County Council or Township Councils.

RESTRICTED AREAS

Under the Restricted Area Plan of the Dominion Health of Animals Branch for the eradication and control of tuberculosis in cattle, work has been continued in the Province of Ontario. Under this plan the following areas have been created:

Prince Edward County—This includes the entire County of Prince Edward and also that portion of Murray Township in Northumberland County lying south of the Murray Canal.

District of Kenora—This area consists of the entire District which may more properly be defined as being bounded on the north by the District of Patricia, on the west by the Province of Manitoba, on the south by the District of Rainy River, and on the east by the District of Thunder Bay.

Eastern Ontario District—This area commences at the City of Kingston, proceeding north-east along the north shore of the St. Lawrence River, but including any islands in said river belonging to Canada, to the Quebec-Ontario boundary, north along the Quebec-Ontario boundary to the Ottawa River, thence west along the south shore of the Ottawa River, but including any islands in said river belonging to Ontario, to the City of Ottawa, thence south-west along the Rideau River and Rideau Canal to the City of Kingston, the area to include the whole of the Counties of Russell, Prescott, Glengarry, Stormont, Dundas, Grenville, and parts of the Counties of Carleton, Leeds and Frontenac.

District of Manitoulin Island—This area includes the entire Island of Manitoulin.

This work, under the regulations, has required the Ontario Department of Agriculture through the Live Stock Branch to assist in the transportation charges of the veterinarians in the general tests. During the fiscal year November 1, 1933, to October 31, 1934, there has been expended \$7,948.20.

The following summarizes the work carried on in the various districts from the week of January 3rd, 1934, up to and including the week ending December 26th, 1934:

Glengarry County—The 3rd General Test had already been conducted in Glengarry County and work during the period above mentioned has been confined to retests and special tests subsequent to the 3rd General.

Stormont County—Three General Tests had already been made in Stormont County and testing work has been confined to subsequent retests of reacting herds.

Prescott County—This County has already had two General Tests and work during the past season has been confined to a very small amount of testing on reacting herds.

Dundas County—During the past calendar year the 2nd General Test of the Cattle in Dundas County has been completed and subsequent tests on reacting herds have been carried forward. The 3rd General Test of the cattle

in Dundas County has been begun and up to the week of December 26th, 1934, 443 herds had been tested under this plan showing less than .1 per cent reactors.

Grenville County—Work has continued on the initial testing of the herds in Grenville County and up to December 26th, 1934, 1,898 herds with 26,764 cattle had been tested with 6.3 per cent. reactors and 436 infected herds. Sixty day retests on these infected herds have been continued and a 2nd General Test begun. In this 2nd General Test out of 674 herds tested only 24 herds contained reactors and the reacting cattle have been reduced to .5 per cent. of the total cattle tested.

Leeds County—During the period covered by this report the Initial testing of the herds in Leeds County has been completed and the 2nd General Test begun, together with subsequent sixty day retests of the reacting herds. Up to the week of December 26th, 1934, 999 herds had been given the 2nd General Test and the percentage of reactors had been reduced to .4 per cent.

Frontenac County—Only a small portion of the County of Frontenac is included in the Restricted Area Testing but that portion which lies within the area has had all the herds tested on the Initial Test, and work has been carried on with subsequent sixty day retests of the reacting herds.

Prince Edward County—This County, which was the first restricted area to be created in the Province of Ontario, has had the 4th General Test completed and during the period under review the work in testing has been confined to subsequent retests to the 4th General Test.

Kenora District—During the year this District has been gazetted a Restricted Area and work has been practically completed on the Initial Testing of the herds. Up to the week of December 26th, 1934, 779 herds comprised of 3,790 cattle were tested. 35 herds showed 79 reacting cattle or 2.3 per cent. of the total. The usual sixty day retests of the reacting herds have been carried on during the year.

Manitoulin Island—There has been no active work done in Manitoulin Island during the past fiscal year as there were general tests conducted in 1930 and 1931. The percentage of infection was found to be very small, there being only 1.2 per cent. of the cattle reacting in 1930 and .2 per cent. reacting in 1931. The total cattle tested in each of these years was 18,132 head in 1930 and 19,151 head in 1931.

Russell County—During the past fiscal year the 3rd General Test in the County of Russell was completed. 15,125 cattle were tested, 155 of which were classed as reactors.

Carleton County—The 3rd General Test in the Townships of Osgoode and Gloucester was completed. 10,016 cattle were submitted to test, from which 44 reactors were removed. The Initial Test was completed on all cattle in the Townships of Nepean and North Gower. A total of 13,781 cattle were tested, from which 416 reactors were removed.

BEEF AND DAIRY CATTLE SHOWS

These local shows, which were organized with the hope of encouraging community breeding and which were held in the Counties of Middlesex, Wentworth, Kent, Brant and Elgin, were not supported financially by the Ontario Live Stock Branch during the past year. However, three fairs, held during 1933, qualified for their grant during the fiscal year 1934 and \$300.00 was expended for this purpose.

ONTARIO BEEF CATTLE FEEDERS' ASSOCIATION

During the past fiscal year County Associations of farmers interested in raising and feeding beef cattle were organized in the following Counties: Grey, Bruce, Huron, Lambton, Kent, Elgin, Middlesex, Perth, Waterloo and Wellington.

The purpose of such Associations was to deal with such questions as the purchase of feeder cattle from Western Canada, the elimination of unnecessary expenses in connection with the purchasing and marketing of cattle and, in so far as possible, the obtaining of a reduction of stock yards and commission charges and other expenses in connection with the marketing of cattle, and if possible to arrange for a more even distribution of market supplies throughout the week. It was further believed that such Associations could do much to encourage the production of high quality market cattle and co-operate in obtaining improved transportation facilities and more equitable freight rates.

The President of each County Association then became a Director of the Ontario Beef Cattle Feeders' Association, which organization was formed to further the interests of beef cattle producers and feeders in the Province of Ontario. The following are the Directors of the Ontario Beef Cattle Feeders' Association:

J. G. Stewart	representing	Middlesex	County
Ernest Ackert	"	Bruce	"
R. D. Ferguson	"	Elgin	"
J. A. McGeachy	"	Kent	"
R. E. Cowan	"	Waterloo	"
Harry Armstrong	"	Wellington	"
Wm. Waldie	"	Perth	"
Boyd Porteous	"	Grey	"
D. K. Stewart	"	Lambton	"
Sheldon Bricker	"	Huron	"

ONTARIO CATTLE EXPORT ASSOCIATION

This Association represents both beef and dairy cattle producers interested in the export of cattle to Great Britain and other European Countries. The objects in the formation of this Association may be outlined as follows:

1. To endeavour to restore confidence and insure stability and some reasonable promise of profit to the cattle export trade.
2. To market for export only approved grades and classes of live cattle.
3. To form its own business organization in this country and to maintain an Overseas Commercial Representative on the British and other markets for the purpose of promoting sales or otherwise handling Ontario cattle for export. Such organization to include all facilities necessary for the proper assembling, shipping and transporting of cattle in this country as well as supervising in every detail their landing and final disposition on the overseas market.
4. To eliminate where possible all unnecessary charges and expenses and to reduce to a minimum all necessary charges and expenses at port of embarkation and at port of entry.

5. To arrange through the competition of buyers, brokers and other agents an open and better market for export of Ontario cattle at higher prices.
6. To promote generally better export marketing conditions.
7. To effect improved transportation facilities and more equitable freight rates on both live cattle and on feed stuffs.
8. To co-operate with the Federal and Provincial Governments for the purpose of effecting legislation beneficial to the cattle industry.
9. To co-operate with similar organizations that may be formed in other Provinces or any Federal organization that may be formed for the general good of the cattle industry.
10. To assist wherever possible in improving cattle conditions generally.

The Directorate of this Association is made up as follows:

- (a) Three Directors representing Holstein-Friesian clubs in the Province of Ontario.
- (b) Three Directors representing Ayrshire Breeders' clubs in the Province of Ontario.
- (c) Ten Directors representing the Ontario Beef Cattle Feeders' Association.

This Export Association has given considerable thought to the export trade of both beef and dairy cattle to Great Britain, and it has already submitted a scheme for approval to the Dominion Marketing Board under the Natural Products Marketing Act. Under this scheme it is hoped that this Export Association may set up its own business organization so that the quality and quantity of cattle being exported might be under some measure of control and that charges might be reduced and better selling arrangements made for Ontario cattle in Great Britain, with the hope that the reputation of Ontario cattle on the Old Country market would be improved and that the financial returns to the Ontario shipper would be more satisfactory.

ASSISTANCE TO EXHIBITORS AT FOREIGN EXHIBITIONS

During the past fiscal year assistance has been given on exhibits of sheep and beef cattle which went to the Chicago International Exposition. This assistance amounted to 50 per cent. of the freight charges. Payments were made to the Ontario Cattle Breeders' Association and to the Ontario Sheep Breeders' Association, under whose auspices these exhibits were organized. The total assistance granted amounted to \$714.18.

ASSISTANCE TO LIVE STOCK SHIPMENTS

The Ontario Live Stock Branch, during the past fiscal year, offered to Ontario breeders assistance in the payment of one-third of the freight charges on export shipments of carlots of breeding animals. This has been taken advantage of mostly by our sheep breeders in exporting sheep to Kentucky, California, and the Western States, where the trade in long wool rams has been revived to something near its former proportions. The trade in Kentucky calls most largely for Southdown rams, while in California the great demand seems to be for

Suffolks with a limited number of Southdowns included. This trade has materially assisted our sheep breeders in supplying a market for the surplus rams of the Province. This is particularly true of Cotswold and Lincoln rams, as the demand for these at home is largely confined to the trade among breeders. Under this heading the contribution made by the Ontario Department of Agriculture through the Live Stock Branch amounted to \$594.28.

Assistance has, in the past, been offered on a similar basis on shipments of breeding stock moving to Northern Ontario. Trade in this direction during the past fiscal year has been very dull and only a very limited amount of assistance was required.

The Ottawa Winter Fair, which now is a regional Show, was supported by the Ontario Department of Agriculture through the Live Stock Branch by the payment of one-half the freight charges on exhibits by Ontario breeders. This assistance has done much to encourage the smaller breeders in the district served by the Ottawa Winter Fair to make an exhibit, and the total contribution toward payment of freight charges to the 1933 Show amounted to \$904.04.

CO-OPERATIVE CARS

Under the terms of this policy where individual sales are made to breeders in Western Canada the Ontario Live Stock Branch assumes responsibility for the collecting of these individual animals at a central point, transporting them to Western Canada and distributing them to the nearest points of destination on the main line of the railway. During the past fiscal year one shipment was organized with the destination at Calgary, Alberta, and included four Shorthorn, two Ayrshire and four Jersey cattle, and two Oxford rams. Reasonable charges are made for the service.

ASSISTANCE TO AUCTION SALES OF PURE BRED STOCK

During the fiscal year ending October 31, 1934, assistance has been given to seventeen local associations holding auction sales of pedigreed cattle. A total of 399 head passed through these sales and the total assistance granted by this Department on the sale of these cattle amounted to \$1,436.00. In addition, where shows of bulls were held before the sale, assistance was given amounting to \$75.00, making a total contribution by this Department of \$1,511.00.

The following is a summary from the Order-in-Council under which assistance is given to these sales:

"An allowance of \$4.00 per head is made for tested cattle, providing all cattle at the sale have successfully passed the tuberculosis test and that an affidavit is taken by the contributors to the sale that their herds are free from contagious abortion and other infectious and contagious diseases. The maximum grant in such cases is \$150.00. In sales where the cattle are not all tested for tuberculosis, but are free from abortion or other infectious diseases, the grant remains at \$3.00 per head with a maximum of \$100.00 for any one sale."

SWINE WORK

FOREWORD

Ontario hog producers have reason to feel gratified with conditions in the swine industry in 1934. The years 1931, 1932 and 1933 marked periods of

very low hog prices, so low in fact that many producers became discouraged and discontinued swine production. 1934 saw a sharp upturn in hog prices due largely to a satisfactory export outlet for our surplus hog products. On the average, hog prices were from two to three cents a pound above the previous year. There was a slight decrease in the number of hogs marketed in Ontario for which the extremely low prices in 1933 were undoubtedly the cause. The quality of hogs marketed in Ontario in 1934 showed some improvement as indicated by the fact that 30.5 per cent. of the hogs were selects as compared with 27.1 per cent. for the previous year. Slightly over 85 per cent. of the hogs marketed in Ontario in 1934 graded as selects and bacons or, in other words, were of a quality suitable for the manufacture of Wiltshire sides. Ontario is still the largest hog producing Province in the Dominion and, with the exception of Prince Edward Island, is producing more than twice as high a percentage of good hogs as any of the other Provinces.

SWINE TESTING STATION

Pig testing has been carried on in this Province for five years under the Federal Government Policy of Advanced Registry for swine. Under this Policy feeding is done by the breeder himself on his own premises. During 1934 the first Pig Testing Station in Ontario was established at New Hamburg. The function of this station is to test pure bred hogs for their actual utility value by absolutely independent parties. The points considered in making tests are prolificacy of the sow, rate of gains of the pigs, and the actual commercial value of the carcass.

In the operation of this Policy, breeders may nominate their sows for test at least sixty days previous to farrowing. The litter is tattooed for identification purposes while still nursing the sow. Unless eight pigs are raised to weaning age the sow cannot qualify for a test. On the other hand, if the required number of pigs are reared four of them representing a cross section of the litter are nominated and sent to the Testing Station a few days before they reach the age of seventy days. The testing period begins when the pigs are ten weeks old. Standard rations are fed throughout the entire feeding period. When the pigs are of marketable weight, preferably from 200 to 210 lbs., they are slaughtered and the carcasses analyzed. The dam of the pigs is given her rating on her own production and on the record of her offspring, as measured by that section of it which passes through the test. The requirements for qualifications are:

- (a) At least eight pigs must be raised to weaning age.
- (b) Pigs must reach 200 lbs. in 200 days.
- (c) Every carcass must be up to certain standard specifications.

The present Test Station will accommodate thirty-seven litters so that a considerable number of pigs under test in the Province of Ontario are still being fed on the premises of their owners.

The administration of the Policy is carried on by the Advanced Registry Board. The Provincial Live Stock Branch contributed \$807.06 towards the cost of equipping the Station and has representation on the Committee in charge.

BACON HOG CLUBS

This policy was introduced in 1922. It was carried on as a Provincial policy until 1932, at which time an agreement was entered into with the Federal Live Stock Branch, whereby the cost of boars and of transportation of the same would be borne equally by each Department. The administration of the policy was and still is in the hands of the Provincial Live Stock Branch.

Under the terms of the policy, boars are loaned to clubs having a membership of not less than ten farmers owning a minimum of twenty-five approved sows. A caretaker is chosen by the club members. A boar is shipped to him, the expenses of same being borne by the two Departments. The boar, however, always remains the property of the Departments.

The object of the club policy has been to encourage the production of bacon hogs on a community basis. In the majority of cases it has attained its purpose. Grade boars have been eliminated from districts where clubs have operated, and whole communities have been transformed into bacon hog producing districts, where formerly an indiscriminate type of hog predominated.

A few years ago approximately four hundred such clubs were in operation in Ontario. With the introduction of the boar bonus policy many were disbanded. At the end of the fiscal year ninety clubs were functioning. Of this number thirty were formed during the year. Thirty-eight boars were purchased for the newly formed clubs and for replacement purposes in older clubs. The total cost to the Ontario Department of these boars was \$785.78.

BREEDERS' CLUBS

A number of bacon hog clubs have developed until they can now be classed as Breeders' Clubs, that is, clubs where the majority of members have registered sows. Most members are carrying on pig testing work. The main interest of the members is to raise better hogs, but the clubs are also serving a more useful purpose in that they serve as centres for the distribution of foundation breeding stock of known performance throughout the district where they are located and in some cases throughout the whole county. It has been the policy of the Department to place the best available Advanced Registry boars in such clubs.

Clubs carrying on this work most actively are,—the Waterloo Breeders' Club in Waterloo County, the Woodstock Industrial Club in Oxford County, and the Mount Pleasant Club in Perth County.

BOAR BONUS POLICY

This has been operated as a Federal-Provincial policy designed to assist individuals to purchase high class boars. The bonus on approved boars was \$10.00. If such boars were out of dams qualified in the Advanced Registry the bonus was \$15.00. One-half of the bonus was paid by each Department, the Federal bonus being paid at the time the boar was approved, the Provincial bonus paid at the end of the first breeding season and only after the boar had proven satisfactory as a sire. This policy was discontinued in so far as the Provincial Government is concerned on August 14th.

During the fiscal year bonuses amounting to \$2,700.00 were paid to the owners of 485 boars.

BACON LITTER COMPETITION

It is recognized that brood sows which are prolific and rear large litters of select hogs of good feeding qualities are valuable in the improvement of commercial hogs. The Bacon Litter Competition was established to identify and give prominence to such individuals in the hope that their female offspring might become more widely distributed among the commercial hog producers of the Province.

This Competition is open to any hog producer in Ontario. Entry must be made within fourteen days of date of farrowing. The litter is tattooed previous to weaning and is then fed by the entrant until it reaches market weight.

The litters are scored on the basis of the weight and grade of the carcasses. The points considered in making awards are size, weight, grade, uniformity and age of the litters.

For the purpose of awarding prize money the Province is divided into zones, the number of zones depending on the total number of entries in the Competition. The prize money is shared equally by Federal and Provincial Departments. The total prize money paid in 1934 by the Provincial Department was \$639.00.

Two Competitions were sponsored in 1934, one for litters farrowed in the spring, the other for litters farrowed in the fall.

In the Spring competition there were 183 entries, and in the Fall competition the entries totalled 68. The entries were distributed throughout the Province. The results of these competitions will not be available until 1935.

Two similar competitions were sponsored in 1933. These were completed in 1934, and were the Competitions on which the prize money was paid in 1934. The following is a summary of these Competitions.

	Spring Competition	Fall Competition
Number of prize winners	45	28
Average size of prize winning litters	10.8 pigs	10.6 pigs
Average per cent. selects prize winning litters	71.1%	63.2%
Average age prize winning litters	183.2 days	191.2 days
Average weight per pig prize winning litters	203.2 lbs.	204.7 lbs.

ADVANCED REGISTRY SOW CLUBS

These clubs were designed for the purpose of creating centres from which foundation breeding stock of known performance could be obtained for distribution, throughout counties where the same is not readily available at the present time. Clubs consist of three members, each of whom has been supplied with a young bred sow out of a qualified dam, by the Live Stock Branch. Each member is expected to enter the sow in the Advanced Registry. As payment for the sow he agrees to return to the Department two hogs at market weight. Clubs are operating in the following counties: Carleton, Dundas, Frontenac, Grenville, Lanark, Leeds, Lennox and Addington and Renfrew.

BOYS' SWINE CLUBS

These clubs are divided into two sections, A and B. Under Section A, each boy purchased a pair of weanling sows in the spring of 1934. He reared these and showed them at a special achievement day held in the fall. It was necessary for him to keep records of his pair of sows. Prizes for competition among the club members are awarded on the following basis:

40 points for award on pair sows.

30 points for judging competition, and answers to schedule of questions.

30 points for general proficiency in club work.

Following is a summary of the clubs operating in 1934:

County	Club	Number of Members	Amount of Prize Money Paid by Provincial Dept.
Peterboro.....	Lakefield.....	24	\$30.00
Renfrew.....	Beachburg.....	15	17.50
Victoria.....	Lindsay.....	15	17.00
Grey.....	Ayton.....	15	17.50
Middlesex.....	Glencoe.....	16	22.50
Ontario.....	Port Perry.....	17	12.00
York.....	Mt. Albert.....	15	17.50
Durham.....	Orono.....	13	17.50
		130	\$151.50

The organizing work in connection with these clubs is carried on by the Agricultural Representative. Considerable assistance throughout the year and at achievement days was given by members of the Live Stock Branch.

Project B is a second year competition. Boys who obtained weanling sows in 1933 were eligible to compete in this project in 1934. The boys were privileged to enter the litters farrowed by the sows secured the previous year. The scoring and awarding of prizes are similar to the system carried on under the bacon litter competition. There were 61 entries in Project B in 1934. A total of \$65.50 was paid out in prize money to this competition. Financial support was also given to the Inter-Swine Club Competition.

BACON HOG FAIRS

These fairs are designed to demonstrate market requirements in hogs and to study the type of breeding stock most desirable for the production of select market hogs. Classes in both market hogs and breeding stock are featured. A full discussion of the prize winners is given by the judge following the placing of each class.

The fairs are held mainly in districts where a poor class of hogs predominates. They have done much to break down the prejudice against bacon hogs, particularly the doubt that might exist regarding their feeding qualities, because of the fact that exhibitors and spectators have an opportunity of discussing feeding methods. Bacon Hog Fairs were held in 1934 at the following points: Kemptville, Almonte, Wheatley, St. Thomas, Bothwell and Eddy's Mills.

The market hogs were sold at all fairs by sealed tender and in all cases brought premiums ranging from 25c. to 65c. over current market prices. Two carloads of hogs were shipped from the Bothwell and Eddy's Mills fairs, while a carload was shipped from each of the other fairs.

Breeding classes were well filled at all fairs, in some cases running as high as forty entries. In addition, over fifty sows were purchased by farmers to be retained for breeding purposes.

The total prize money paid by the Ontario Department at the six fairs was \$406.00. This amount was duplicated by the Federal Department and also by the local organizations sponsoring the fairs.

SWINE BREEDERS' FIELD DAY

The annual field day of the Ontario Swine Breeders' Association was held at the O.A.C., Guelph, on June 21st and 22nd. A number of market hogs were sent from nominated and tattooed litters. These hogs were, in the opinion of the breeders, consigning them, the best pigs in their respective litters. These hogs were judged alive, then slaughtered, and the carcasses judged and discussed. Since the judging on the rail is the most accurate form of judging, this plan of correlating live hogs with carcasses proved quite an educational feature to the large number in attendance. Considerable assistance in connection with the field day was given by members of the Ontario Live Stock Branch.

SWINE PRODUCERS' ASSOCIATION

A meeting of representative swine producers from practically all parts of the Province was held in Toronto in February, 1934. These men felt that the best interests of the commercial hog raiser could best be served by an organization. They approved a constitution which outlines the following objects.

1. To promote confidence and stability in the swine industry.
2. To encourage the production of high quality market hogs.
3. To endeavour to stabilize production and marketing on a more even basis throughout the year, and over periods of years.
4. To regulate the marketing of the hogs produced in the Province.
5. To effect improved transportation facilities and more equitable freight rates on both live hogs and feed stuffs.
6. To issue a publication from time to time that will contain information of value to the members.
7. To co-operate with the Federal and Provincial Governments for the purpose of effecting legislation beneficial to the swine producer.
8. To co-operate with similar organizations that may be formed in other provinces or any Federal organization that may be formed for the general good of the swine industry.
9. To assist wherever possible in improving swine conditions generally.

A representative of the Live Stock Branch was loaned to the Producers to set up an association in the Province. To date organizations have been set up in thirty counties. This Association is considering the possibility of formulating a scheme for approval under the Natural Products Marketing Act whereby the sale of hogs in Ontario may be placed on a more satisfactory basis.

SPECIAL GRANTS

Canadian National Exhibition

A Carlot Competition is held at the Canadian National Exhibition. This Competition is open to drovers, shippers or clubs operating at country points. Prizes are offered for carlots of forty market hogs. The object of this Competition is to demonstrate good hogs to those directly engaged in marketing the producer's hogs, and to arouse greater interest so that they will carry on more active campaigns in their communities for the production of better hogs. The Ontario Live Stock Branch gives a grant up to \$400.00 towards the prize money in this Competition.

Royal Winter Fair

To stimulate greater interest in the production of better hogs in Ontario, Messrs. Sainsbury & Company, bacon importers of London, England, have donated an elaborate silver trophy to be awarded at the Royal Winter Fair for the best Wiltshire side. The Provincial Live Stock Branch has co-operated with Messrs. Sainsbury by sponsoring a competition for the best hogs entered in this class and granted in 1934 \$100.00 towards such a class.

ONTARIO PROVINCIAL WINTER FAIR, GUELPH

This Fair, supported substantially by grants from both the Ontario and Federal Governments, is managed and operated by the staff of the Ontario Live Stock Branch. The Directorate is composed of representatives from the following:

Ontario Horse Breeders' Association,
 Ontario Cattle Breeders' Association,
 Ontario Sheep Breeders' Association,
 Ontario Swine Breeders' Association,
 Ontario Poultry Breeders' Association,
 Ontario Seed Growers' Association,
 City of Guelph.

SUMMARY OF ENTRIES AND GATE RECEIPTS, 1924 TO 1933

	1924	1925	1926	1927	1928	1929	1930	1931	1932	1933

HORSE SHOWS

For the purpose of assisting spring horse shows a grant is given, on receipt of approved reports, of 50 per cent. of the prize money, but in no case shall the grant exceed \$200.00. The following is a list of grants paid during the fiscal year ending October 31st, 1934:

Clinton, 1933.....	\$200.00
Clinton, 1934.....	175.00
Brooklin.....	110.00
Eglinton.....	200.00
Linwood.....	113.50
Elora.....	93.00
Brantford.....	200.00
St. Clements.....	94.50

Grants to special shows were also made as follows:

Ottawa Horse Parade Assn.....	\$200.00
Toronto Open Air Horse Parade Assn.....	300.00
St. Catharines Riding and Driving Club Ltd.....	200.00

STALLION ENROLMENT

There were 1,189 stallions enrolled in the Province of Ontario during the season of 1934; 131 carrying A1 certificates, 106 Approved Form 1, 661 Passed Form 1, 159 Defective Form 2, and 132 Interim Certificates. Cash premiums under the Federal-Provincial Policy amounting to \$8,885.00 were paid by the Ontario Department of Agriculture to the owners of 173 stallions on account of their season of 1933. For complete information see the report of the Ontario Stallion Enrolment Board 1934.

ONTARIO BOYS' FOAL CLUBS

The Ontario Live Stock Branch, in co-operation with the Ontario Horse Breeders' Association and the Agricultural Societies, seeking to encourage horse improvement through the medium of Boys' Foal Clubs, organized twenty-seven clubs during the summer of 1934. All foals were exhibited by boys ranging in ages from twelve to twenty years, and were sired by a Registered Stallion, and so far as possible were fed, cared for, and fitted by the boy for at least two months previous to the date of exhibition. Foal competitions were held at the following Shows in 1934:

County	Name of Show	County	Name of Show
Essex.....	Leamington	Huron.....	Seaforth
Kent.....	Dresden	Huron.....	Brussels
Kent.....	Merlin	Perth.....	Stratford
Kent.....	Ridgetown	Brant.....	Paris
Lambton.....	Forest	Waterloo.....	Wellesley
Lambton.....	Brigden	Wellington.....	Erin
Elgin.....	Wallacetown	Peel.....	Brampton
Elgin.....	Shedden	York.....	Markham
Middlesex.....	Ilderton	Haldimand.....	Caledonia
Middlesex.....	Melbourne	Ontario.....	Oshawa
Middlesex.....	Glencoe	Durham.....	Millbrook
Bruce.....	Teeswater	Northumberland.....	Warkworth
Bruce.....	Lucknow	Northumberland.....	Campbellford
Bruce.....	Tara		

The owners of the best foals at the above fairs were invited to show at the Royal Agricultural Winter Fair where competitions were held, one for the foal and one for horsemanship. Forty-four boys with their foals competed in these classes.

LOCAL POULTRY ASSOCIATIONS

Local Poultry Associations received assistance from the Department through the supplying of judges, lecturers and grants to Associations during the fiscal year, November 1st, 1933, to October 31st, 1934, as follows:

Number of Associations holding a show during the fiscal year. . .	23
Number of Poultry Judges supplied.	21
Number of Lecturers supplied.	7
Total amount of grants paid to Local Associations.	\$952.50
Total expenditures in connection with Judges, Lecturers, etc. . . .	\$746.12

POULTRY CLUBS

These clubs were organized under the Boys' and Girls' Poultry Club Policy during the fiscal year ending October 31st, 1934. Prize money amounting to \$70.00 was paid to the members of the Poultry Clubs at Simcoe and St. Catharines.

WOMEN'S INSTITUTES BRANCH

The year 1934 continued to present problems to rural homemakers, for damage by frost to grain crops and fruit reduced the output, though prices of farm produce were somewhat improved. Interest and taxes remained high, while cash returns were low. Unemployment was widespread, and relief requirements made heavy demands on energy and resources. Sons and daughters, out of work, came home; this, however, had the compensating advantage of adding brightness to country neighbourhoods.

The difficulties were faced with resourceful self-reliance by Women's Institute members. Courage and cheer were kept alive by lectures and entertainments and plays put on largely by local talent free or for a very small fee in hall or home. An intensive pursuit of adult education was carried on, as perhaps never before. Departmental lectures, short course instruction and literature played a much appreciated part in this.

Young people's extension courses were supported, and co-operation was given to Agricultural Representatives and local schools.

Through an arrangement between the farm and village mills, low-priced wool was turned into articles of value,—rugs, blankets, clothing,—with little or no cash outlay.

Health was maintained at a fair level, due to more sanitary methods in the home, and the more scientific use of foods.

In brief, during a period of considerable unrest, the Institutes were a steady-force, progressive yet sane in outlook.

ORGANIZATION STRUCTURE

The foundation in the structure of the organization is the Branch Institute. In 1934, there were 1,269 branches, 53 of which were new units formed during the year. The total membership was 36,467.

These individual branches link up for mutual stimulus through 100 district organizations, then into 13 convention areas for the larger interchange of ideas, while a Provincial Board, to which each subdivision sends representatives, acts in an advisory capacity.

Adhering to their original objective "the dissemination of knowledge relating to domestic economy, household architecture, sanitation, a better understanding of food values, clothing, fuel, the more scientific care and training of children with a view to raising the general standards of health and morals, and the betterment of home and community life", the branches plan regular monthly programs of study, in co-operation with the Institutes Branch. These also provide channels for the spread of knowledge from all government departments and the Agricultural Colleges, to aid the development of local talent, and for the introduction and distribution of the accumulated knowledge of years of experience and research.

The branches have availed themselves of departmental literature and services in Health, Education, Child Welfare, Travelling and Loan libraries, Motion Pictures and the Archives.

STAFF

The work of this Branch is effected through office and field workers. There are ten members of the staff on full-time service, consisting of the superintendent, a general assistant and three special assistants in Nutrition, Clothing and Junior work respectively, and five secretaries and clerks.

In 1934, 96 field workers, including lecturers, demonstrators, leaders and instructors in special lines of work, were employed for periods of time varying from one day to seven months.

Having completed thirty years of service as Superintendent of Women's Institutes, Mr. Geo. A. Putnam was superannuated on October 1, 1934, and was succeeded by Miss Bess McDermand.

PROGRAMS

Preparation of branch, district and convention programs is a responsibility imposed largely upon the officers of these groups. The success of the local branch depends in no small measure upon the program provided, and the extent to which interest is sustained throughout. This is accomplished by careful and thorough canvassing of talent and possible assistance from members, and other residents of the community. The curriculum for the year is planned to provide that which shall be of the greatest educational value to the homemakers of the community, giving, if possible, an opportunity for every person to take some part, however small. It furnishes seasonable material, something practical, cultural and social, relative to the interests of all in the home, co-operating with community leaders and activities, and, at the same time, provides an opportunity for both variety and practical information.

District programs co-relate the work of the branches within the district, review activities, and plan for greater usefulness within the branches and extension of the work in the district; conventions present brief records of the work throughout the province under specific headings, and offer definite guidance for future development and advancement in addition to social contacts and group conferences.

STANDING COMMITTEES

For Uniformity in tabulating activities for presentation to various gatherings, and to facilitate execution and distribute responsibilities, these have been classified under Standing Committees with definite leadership, as follows:

Health and Child Welfare including: health education, medical and dental services, preventive measures, laws, conferences, exhibits and clinics.

Education: home and school co-operation, adult education, art, music, drama, debates, preparation of programs.

Home Economics: building, equipment and management of the home, studies in nutrition, clothing, family relationships and the care of children.

Agriculture: marketing, standards of products, weed eradication, vegetable and fruit growing, beautification, co-operation with research workers.

Historical Research: the study and preservation of records of local history.

Canadianization: welcome to newcomers, co-operation with Children's Aid Societies in care of orphan or neglected children, the establishment of Vocational Guidance in rural schools.

Legislation, Industry and Relief deal with matters of interest under these heads.

CONVENTIONS

The number of conventions has been increased during recent years, to enable busy women of limited time and means to meet with leaders and secure desirable information for more effective work in their respective units.

Conventions were held at the following places during the fall of 1934, with attendance totalling 3,760:

Place	Representing
Swastika	Temiskaming and Cochrane
Powassan	Muskoka and Parry Sound
Rainy River	Rainy River, Kenora, Thunder Bay
East Korah	Algoma and St. Joseph Island
Mindemoya	Manitoulin
Stratford	Bruce, East and West Huron, North Perth
Barrie	Simcoe
Kingston	Addington, Amherst Island, Brockville, Frontenac, Lennox
Ottawa	Dundas, Glengarry, Grenville, Stormont, Carleton, Lanark, Renfrew, Russell, Prescott
Belleville	Hastings, Northumberland, Prince Edward
London	Lambton, Essex, Kent, Elgin, South Perth, Middlesex, South Huron, Oxford
Hamilton	Haldimand, Brant, Lincoln, Norfolk, Welland, Wentworth
Toronto	Durham, Haliburton, Peterborough, Victoria, Ontario, York, Dufferin, Grey, Halton, Peel, Wellington

These have resulted in a rapid development of talent and executive ability in all parts of rural Ontario.

"HOME AND COUNTRY"

In 1933, an organization paper, "Home and Country", was published, financed through the co-operation of the Provincial Board and the Department of Agriculture. This is intended to carry news and information regarding progress to the branches.

Lists of available literature from the Departments of Agriculture and Health, and other authorized publications are furnished from time to time, and large quantities distributed through the Institutes.

MEMBERS' SERVICES

The two greatest services rendered by the Women's Institutes are rarely reported by themselves. The first of these two services is the steadily rising standard of personal efficiency, intelligence and ability among members, and the noticeably better-managed country homes, and the second, the formation of a sound public opinion due to thought-out conclusions arising from study and discussion at monthly meetings.

Practically all groups plan to meet in some measure the social needs of their communities in recreation and the wise use of leisure, but more visible in a material way are the results of instruction in housing, nutrition, clothing and health received in lecture, demonstration and short courses. These can often be translated into dollar values. Costs do not always show outstandingly, but values are returned tenfold to the homes and families of homemakers, trained to make the most of their own talents, resources and time.

The Institutes are an educational, and not a charitable or money-raising organization, yet the contributions in food, clothing, household supplies, and cash donations for the needy represent a goodly amount. Schools, Agricultural Representatives, and local men's societies feel their helping hand. Senior and Junior Institutes are a stimulus to Farmers' and Junior Farmers' Clubs, where they work together.

For a number of years the Institutes have advocated the establishment of Vocational Guidance in rural and urban schools, with a systematic survey of the resources, needs, and aptitudes of individuals as a means to help end unemployment.

GOVERNMENT SERVICES

Services were rendered by the Department of Agriculture through Demonstration Lecture Courses, Summer Series lecture work, special speakers and instructors, bulletins and other literature, Garment Club work, research information provided through assistants in nutrition, clothing, housing, nursing, crafts, junior leadership, conferences, conventions and similar means of assistance, which enabled the members to secure up-to-date information to aid them in solving their problems and provide newer methods of operation in home management.

The co-operation of other government departments has made possible a greater dissemination of knowledge, resulting in better home practices. These include Health and Child Welfare, Education, Libraries, Archives, Motion Picture Bureau and the Ontario Agricultural College, all of which have service and literature of value for the rural districts. Speakers from some of these departments have been available and were provided for special county of convention occasions where representatives of Institute leaders have been brought together, whereby the local groups have greatly benefited. Travelling libraries have been supplied to a large number of branches, and co-operative effort has been invaluable to the branches and of benefit to the members generally.

SHORT COURSES

Household Science courses, ranging in duration from three to ten days, have been arranged for busy women who find it difficult to attend the longer courses. Each one of these courses covered certain fields of subject matter, such as Health Education and Home Nursing, Sewing or Foods and Nutrition. Three-day courses in Housing were given in a few centres, and the newly organized course on Home Utilization of Wool was very popular in rural districts interested in sheep raising.

Number of Two Weeks' Courses (Home Science).....	88
Number enrolled.....	1,834
Number of Three-day to Five-day Courses.....	71
Number enrolled.....	1,703

Individual Institutes or a group of Institutes could obtain the services of a lecturer for one meeting during May or June. These lectures were given on miscellaneous topics, and were designed to be inspirational.

SUMMER SERIES

Number of Summer Lecture Series.....	503
Number of lecturers.....	21
Total attendance.....	23,845
Largest divisional attendance.....	2,118
Smallest divisional attendance.....	342
Largest single meeting.....	205
Smallest single meeting (in N. Ontario).....	9

LOAN PACKET COLLECTION

This service is intended to assist persons responsible for an address or paper on some specified subject, or an over-busy housewife, who may not have ready access to a library or other source of reliable information. It is not intended to take the place of personal effort, but to supply authoritative material from which facts or inspiration may be gathered. During the months of November and December, 1934, 718 helps were provided to 213 branches. Of these 79 related to Home Economics, and 68 to matters of legislation.

LITERATURE

Assistance is given by bulletin and leaflets, provided by the Department of Agriculture and other branches of the government, for personal and program use. These have been utilized to advantage.

THE JUNIORS

Girls take an active part in the Women's Institutes as officers, on the regular programs, in groups, and with a special annual Girls' Day. Here their help is particularly appreciated by mothers and friends, who feel they add vigour and brightness to programs and the social half hour.

JUNIOR INSTITUTES

Where there are considerable numbers of girls in a community, and frequently at the close of a short course, a Junior Branch is organized on the same basis as the Women's Institute. In 1934, there were 124 of these Junior Branches, with 2,295 members.

Regular educational meetings deal with studies in nutrition, health, clothing, housing, with additional subjects of special interest to girls. This makes for a

healthier, happier, more efficient young womanhood who enjoys the home and contributes more to it. These girls find a real place in farm life, in productive work, and in improved methods of doing it. Good results are apparent in the girl herself, in home and farm practices, and in the community. A capacity both to lead and to follow good leadership in the district is developed.

This was demonstrated in the recent forced retrenchment in departmental services, when senior girls, who had themselves been coached the preceding year, helped to coach new girls in Home Economics groups throughout the counties.

Teams of girls also contributed demonstrations at fall fairs, and district and area conventions in canning, table service, uses of home-grown wheat, good dressing, and flower arrangement. Here knowledge, correct deportment, and good speaking are essentials.

HOUSEHOLD SCIENCE COURSES

In co-operation with the Agricultural Representatives in the counties concerned, the Women's Institutes Branch has provided instruction in Household Science in various centres during winter months. Three months' courses held in seven centres had an enrolment of 295, with classes each morning and afternoon, conducted on academic lines of instruction, and demonstrations provided in nutrition, foods and cookery, household administration, house planning and decoration, sewing, home nursing and crafts. Students are put in touch with institutions and information, which can be of real value to them in after life.

One month courses were held in 34 centres, with total enrolment of 1,475. Instruction of a type similar to that given in the three months' courses was provided. The organization of Junior Institutes frequently follows, in which the girls continue study along the lines taken up in the courses.

The short courses give valuable training in self-development. "Were ever days so full of work with pleasure?" writes a Northern girl. "Bed-making, bandaging, sewing, cooking, laundry, English, bacteriology, banking, social affairs. If we do not make of ourselves better daughters, better wives, better mothers, and even better grandmothers, the fault is with ourselves, not the short course. It has helped me to realize, too, my duties as a homemaker and a citizen, in the family and the community."

COACHING

Counties availed themselves of coaching classes in clothing and nutrition, arranged through the Agricultural Representatives.

Institute members and other rural women co-operated, with the result that 3,436 girls attended classes held by departmental coaches at 270 places.

Following the classes in various centres, 1,339 girls attended 51 judging competitions, held at a central point in each county or district.

Inter-county competitions in Household Science were held at Ottawa, London, Peterborough and Toronto.

PROJECTS

Projects afford girls an opportunity to learn by a happy combination of study and the actual carrying out of the improved practices.

Clothing, Home Beautification, and Supper Projects were undertaken by different groups.

In *Clothing*, the three-year program covers selection, construction, style, care and purchase of garments, with a consideration of personal grooming and the achievement of beauty through health.

Home Beautification is carried on in co-operation with the Horticultural Department of the Ontario Agricultural College. Plans of home grounds, drawn to scale, are submitted for scoring and suggestions for improvement. In a number of farm houses the ideas thus received for planting and landscape gardening are being carried out this year.

The Supper Project comprises the actual selection, preparation, and service of various foods, family and club suppers, and is done by members.

Achievement Days were held at six centres, where girls exhibited the results of the year's work in garden, canning, garments, foods, charts and posters. They also put on a program representative of studies in connection with club programs.

At *County Conferences* the Juniors entertain the seniors with a similar program.

SUMMARY OF JUNIOR INSTITUTE ACTIVITIES, 1934

Short Courses:

Number of Three Months' Courses, 1933-34.....	7
Number of girls enrolled.....	295
Number of One Month Courses, 1934.....	34

Number of clothing clubs	30
Number of members completing project	166
Number of supper clubs	5
Number of members completing project	40

Junior Institutes:

Number of Junior Institutes	124
Number of members	2,295

THE OUTLOOK

The outlook is promising. There is opportunity to organize at more points as well as to increase the present membership.

Junior Institutes are likewise doing good work, but both seniors and juniors have suffered in recent years from restricted educational services. In some sections this is more noticeable than in others.

A clearer perception is arising among women of the place that industry occupies in national life, and of its connection with agriculture in achieving an equitable distribution of the products of rural and urban labour. A greater interest in marketing is evident in many rural localities. Many Institutes are studying the tastes and requirements of countries which offer markets for Ontario surpluses.

The extension and lowered rates of hydro are appreciated.

In 37 years of progress, the Women's Institutes have evolved into a rural university, whose students range in age from 16 to 80, and in attainments from public school to university standing. These students are anxious to gain a better understanding of how to promote greater community satisfactions and better health. In their quest for enrichment of living, their outstanding need and interest is the improvement of their own vocation,—the science and art of homemaking. They realize that new world conditions demand progress in homemaking, as well as in other professions; that the skill and knowledge used in homemaking will determine largely better living conditions to be instituted in Ontario. Practicing homemakers, whether members of the Institute or not, must look to the Women's Institutes Branch of the Department of Agriculture for this help. This problem means that the Department will have to develop economical procedures to increase their educational contacts with homemakers, and use sound principles of education in building an effective program. All this demands an experienced staff, well-trained in sociology, home economics and education.

The progressive attitudes of the leaders of Women's Institutes throughout the province, and the interest of young women in further education speak well for possible development in the future. As their demands for practical educational service are met, homes will afford greater satisfactions and happiness, and particularly will this be true of rural Ontario.

FRUIT BRANCH

The outstanding feature of the fruit industry during the past year was the disastrous effect of the winter of 1933-34 upon both trees and crops in practically all parts of the Province. The last severe damage to trees occurred in 1918, but was confined largely to the apple orchards in the Eastern counties. In 1914 the peach crop of the Niagara Peninsula suffered heavy damage from the preceding winter, but little injury resulted to the trees. This last freeze, however, was particularly severe to pear, sweet cherry and peach trees in all sections outside of the land below the escarpment in the Niagara District. The older apple orchards were badly affected in Prince Edward, Hastings and Northumberland counties along Lake Ontario, in Norfolk, Brant and Oxford Counties in the Lake Erie section, and Huron county along Lake Huron. In the Georgian Bay area the damage was most serious back from the water.

Variety had a great deal to do with losses in apple trees. Baldwin, Ben Davis, King, Wagener, and Ontario were often 100 per cent. dead or so badly damaged as to be worthless. Cranberry, Greening, Russet, Spy, Delicious, and Stark were, on the average, considerably better, but in some orchards also showed severe injury. McIntosh, Wealthy, Duchess and Fameuse were found to be hardiest both in tree and bud, and as a result gave the best crop.

Naturally, even where the trees were not injured, crops were light. Apples were about 25 per cent. of the previous year. Sour cherries and pears were a failure outside of the Niagara District, and even there the peach crop was extremely light except in the orchards near the Niagara River.

Ontario has shown steady planting of orchards every year over a long period, with the result that the losses will not be so severely felt in total crop as might otherwise be the case. Our commercial pack had doubled during the past ten years and many of the older orchards now dead had about reached the end of their profitable bearing. The orchards under twenty years of age, were practically uninjured in most sections, and the acreage is quite sufficient to give a good crop in a normal season. Planting will naturally be somewhat heavier for the next few years to replace the trees in those sections that suffered most heavily.

Officers of the Department from Vineland, Guelph and Toronto, were called to all parts of the Province during the season to estimate damage and advise on treatment of partially injured trees. As a result of surveys made, recommendations followed in regard to varieties for replanting and these were freely discussed at all winter meetings of growers. In apples, replacements will be largely Delicious, McIntosh, Spy, Salome, Cortland, and Jonathan, with the latter largely in the southwestern counties. Some plantings of Norwest Greening will be made in the Eastern counties, and of Rhode Island, Greening and Baldwin in the western counties.

Owing to certain readjustments in the Department, the staff at Vineland was called upon to assist both at the Agricultural College at Guelph and in the Fruit Branch in Toronto, in addition to the regular round of inspections and meetings in all parts of the Province. The spray service as carried out in 1933 was continued in the Niagara District and a letter service was also given in the outside counties in co-operation with the Guelph staff and the County Agricultural Representatives. Inspection for apple maggot control was also continued in all sections during parts of May, June and July, and again in August and September with officers of the Federal Department.

DAIRY BRANCH

During the past year there has again been a considerable decrease in the production of cheese in the Province of Ontario. In 1933 it was already 3,842,427 pounds less than in 1932, and in 1934 the total number of pounds produced was 6,390,445 pounds lower than the production of 1933. The following tables show a comparative statement of cheese production in 1933 and 1934:

(Figures were secured from factory secretaries).

Milk Distributing, Milk Condenseries, Milk Powder, and Casein plants.

The Dairy Branch staff checked the Babcock Testing at 470 milk distributing plants—22 milk condensing and milk powder plants, and 7 casein and skimming plants.

Field Staff of the Dairy Branch—

- 3 chief instructors,
- 33 cheese instructors,
- 11 creamery instructors,
- 7 milk test checkers,
- 1 herd tester.

Provincial Dairy Associations

Secretary

Western Ontario Dairymen's Association	Frank Hens, Bank of Toronto Chambers, London
Eastern Ontario Dairymen's Association	T. A. Thompson, Almonte
Ontario Creamerymen's Association	A. S. Thurston, Thornbury
Ontario Whole Milk Producers' Association	E. H. Clarke, 72 Avenue Rd., Toronto
Ontario Cheese Patrons' Association	S. L. Joss, 266 Front St., Belleville
Eastern Ontario Cheesemakers' Association	Walter Hargrave, Oxford Mills
Central Ontario Cheesemakers' Association	J. H. Dudgeon, 175 Front St., Belleville
Western Ontario Cheesemakers' Association	C. W. Hamilton, R.R. No. 1, Belton

In addition to these there are six Buttermakers' Clubs, which have been organized during the past two years.

No movement in the cheese industry has done more to improve the quality of Ontario cheese in recent years than the Cheesemakers' Associations, and the Buttermakers' Clubs are doing splendid work in improving the quality of Ontario cream and butter. The makers' organizations are carrying on some really worthwhile educational work, and should have the support and co-operation of every cheese factory and creamery patron.

EASTERN DAIRY SCHOOL, KINGSTON, ONTARIO

The course for cheese and buttermakers opened as usual on January 2nd and closed on March 22nd, 1934. Twenty students registered and wrote the examinations, nineteen of whom were successful and were given diplomas.

A special course for experienced cheesemakers was also held February 13th to 17th, but, owing to bad weather and snow storms, only 45 were able to attend. Another factor which has contributed to the falling off in attendance is the slowing up in production of cheese. Production is becoming smaller and smaller each year, with the result that many factories are closing up and makers are getting less and less returns and are employing fewer assistants.

The same service of furnishing instructors and makers with pure cultures was continued, as well as information of a helpful nature, all of which contributed much towards the maintenance of the high quality of Ontario cheese.

Butter and cheese continued to be manufactured as formerly. This particular feature of the School has contributed much to the value of the information collected, besides earning a considerable revenue.

The following is a statement of butter and cheese manufactured:

FROM NOVEMBER 1ST, 1933, TO OCTOBER 31ST, 1934

CREAMERY DEPARTMENT

Total lbs. of butter.....	107,798 lbs.
Total lbs. of fat in cream.....	87,504.1 lbs.

Average price paid per lb. fat.....	22.16 cts.
Average price per cwt. of milk.....	77.33 cts.

AGRICULTURAL REPRESENTATIVE BRANCH

FOREWORD

The year 1934 in Ontario Agriculture can be recorded as one of recovery. The general level of wholesale prices of farm products averaged approximately 15 per cent. higher in 1934 than in 1933, and this improvement in prices is reflected in the generally more optimistic attitude of those engaged in agricultural pursuits.

Two factors which have some bearing on conditions are that a favourable price prevailed for hogs and that a good demand developed for malting barley at a satisfactory price. The crop of fall wheat, however, was almost a complete failure, due to winter killing; hay crops were extremely light, due to the dry growing period early in the season. Fortunately to offset the shortage of feed, excellent crops of silage corn and roots were harvested.

The work of the Agricultural Representatives was largely confined to routine and regular duties, due to restricted financial assistance available for extension work. Very few new policies were inaugurated, but even so, the day to day demand for assistance with the many phases of farming created a volume of requests that entailed many long hours and busy days for the Representatives.

OFFICE WORK

The detailed summary of office work, as it pertains to requests and general extension work, is as follows:—

Number of letters received.....	104,396
Number of letters written.....	100,790
Number of circular letters mailed.....	429,491
Number of incoming telephone calls.....	87,974
Number of visitors at office.....	118,922
Number of meetings held in office.....	1,758
Number of bulletins and reports distributed through office.....	82,421
Number of miles travelled by automobile.....	869,195

Besides the detailed office work, the Agricultural Representatives addressed 3,234 meetings with a total attendance of 192,440. They also attended 1,258 additional meetings.

LIVE STOCK

The problem of reducing the losses in live stock due to internal and external parasites was a major one in extension during 1934. Marketing has also been an urgent matter, and various provincial organizations were sponsored, to which the Agricultural Representatives were obliged to give a great deal of time and effort. The co-operation of the Federal Department of Agriculture, the Ontario Live Stock Branch, the Ontario Veterinary College, the Ontario Agricultural College, the Kemptville Agricultural School, and the Ridgetown Experimental Farm has been appreciated.

HORSES

No class of farm stock has increased in value in the same proportion as horses, a condition brought about by the decrease in numbers and also the low cost of feed in comparison with gasoline for motive power.

Besides assisting in the purchase and selection of stallions on request from breeders, the Agricultural Representatives in the counties of Carleton, Elgin, Huron, Lanark, Manitoulin, Oxford, Perth and Rainy River conducted campaigns for the treating of horses for the control of Bot Flies. It is estimated that 8,100 horses were treated during the spring months.

CATTLE

An educational programme for the reduction of losses among cattle caused by the Warble Fly was carried out very intensively in practically every county and district in Ontario, and the Agricultural Representatives addressed 304 meetings with an attendance of 12,230. In a number of counties a county-wide campaign was carried on in co-operation with the County Councils and Live Stock Associations, with the result that it is estimated that 456,840 cattle received the treatment throughout the Province.

The testing of dairy cows for milk and butterfat production, under the Ontario Cow Testing Policy, was continued, and a still further increase over 1933, in the number of cows tested, was noted. Altogether, 10,362 cows were tested.

An increased demand for dairy cattle from tuberculin and blood tested herds induced many breeders to test their herds. In many cases the Agricultural Representatives assisted by securing these tests and advising the breeders where to secure breeding stock to build up their herds.

SHEEP

The very favourable prices received by farmers, who shipped their wool co-operatively in 1933, resulted in an increased number of sheep breeders reporting to the County Agricultural Representatives for their shipping forms, sacks and tags, which are carried at the local offices.

It is estimated that in 1934, 159,373 sheep were dipped in tanks established by the Agricultural Representatives, in co-operation with the Dominion Department of Agriculture. In co-operation with the Provincial Zoologist, 61 parasite control demonstrations were held, and it is estimated that 48,164 sheep received treatment, due largely to the educational work conducted.

SWINE

Hog prices were very encouraging to the producer, in comparison with other farm prices, and resulted in many small breeders requesting the assistance of the Agricultural Representatives in selecting breeding stock. The Representatives have also been active in inducing many breeders to enter their sows in Record of Performance work. In co-operation with the Dominion Department of Agriculture and the Provincial Live Stock Branch, 1,640 bred sows were distributed. Bacon Hog Fairs were also assisted in areas where held.

Many Agricultural Representatives made arrangements to have supplies of mineral mixtures, reduced iron and iodine, available for the treatment of swine ailments.

POULTRY

The science of brooding, hatching, feeding, and housing of poultry has rapidly developed, and with its development came many requests for information, which very often required a personal visit on the part of the Agricultural Representative to advise a change in management or to diagnose and recommend treatment for poultry diseases. Reports indicate that many broods of young chicks have been saved due to the prompt advice given by the local Representative. Poultry culling demonstrations were given on request, and last year 116 culling demonstrations were conducted. It is estimated that 784,260 birds were culled in the Province during the year.

SOIL AND CROP IMPROVEMENT

The severe winter killing of fall wheat and the dry weather during the growing period forced many farmers to adjust their crop production programme to meet conditions. The Agricultural Representatives were besieged with requests for recommendations concerning emergency hay and pasture crops. Seed cleaning and weed control were also everyday problems. During the spring, 114,467 bushels of seed grain and 1,506,684 pounds of small seeds were cleaned by the various seed cleaning plants.

Demonstration field plots were conducted in many counties in co-operation with the Dominion Department of Agriculture and the Ontario Agricultural College. Altogether 316 seed and fertilizer plots were included in the demonstrations, which were arranged and supervised by the Agricultural Representatives. Field days were conducted where the plots were laid down, with 3,648 farmers in attendance.

The continued recurrence of plant and potato diseases present annual problems, and each year educational lectures are given and circular letters and articles dealing with these diseases are prepared for the local newspapers.

Soil testing and information regarding commercial fertilizers required, very often entail a personal visit to individual farms to ascertain the advisability of applying certain fertilizers. A visit to any farm usually develops into a full discussion of the farm programme, which is greatly appreciated by the farmer.

FRUIT GROWING

The Agricultural Representatives, in co-operation with the Fruit Branch, distributed spray service letters, pertaining to proper mixtures and time of spraying, to apple and fruit growers. 3,704 farmers received this service in 1934.

MARKETING

The marketing of Ontario farm produce was a live subject in extension work. Farmers were anxious to improve the situation as to the selling of their products, and plans for the marketing of tobacco, cheese, potatoes, hogs and cattle were discussed in many counties. The arranging and advertising of meetings fell to the lot of the Agricultural Representatives. In all, 347 marketing meetings were held, with an attendance of 14,052.

JUNIOR EXTENSION

Agricultural extension work, as it applies to the rural youth of Ontario, has definitely established its place as a means of advancing agricultural education for the improvement of conditions relative to production, marketing and community life. The year 1934 can be considered the most outstanding year of achievements since the organization of this branch. The junior programme, through its various phases, covers an age range of from 8 to 30 years.

RURAL SCHOOL FAIRS

The continued and growing support which the rural people of Ontario have given to Rural School Fairs is indicative of the high esteem with which they are regarded as a method of co-relating practical methods and class room work. The year 1934 was the twenty-fifth anniversary of their inauguration, and was one of the most successful. From a very small beginning in 1909, at which time 58 pupils made 174 entries, at the first Rural School Fair, to the 1934 record of 507 fairs, with 111,522 pupils making 336,090 entries, can assuredly be considered a quarter of a century of progress.

In 1934, grain, vegetable and flower seeds were supplied by the Ontario Department of Education, while the distribution of these was taken care of through the local county offices of the Ontario Department of Agriculture. The Agricultural Representatives and Public School Inspectors co-operated in drafting the prize lists adapted to the agriculture of the community, and also in conducting the fairs. The close co-operation of these two departments plays an important part in the success of this educational feature of junior work.

Practically every line of farm and school work is represented on the prizes lists, and they allow for exhibition and competition in home and school projects. The agricultural classes include live stock, poultry, grain, seeds, roots, vegetables and fruit, while competitions in writing, art, public speaking, reading and numerous displays of collections for manual training, insects, weeds and plant diseases offer ample scope for every rural pupil to exercise initiative. They offer instruction and training to practically every rural boy and girl between the ages of 8 and 12 years.

Credit for the successful growth and continuance of Rural School Fairs in Ontario must be given to the support, time and effort devoted to this work by the rural teachers and parents of the children. They are a co-operative project to advance agriculture and education.

The following are statistics for the years 1933 and 1934:

	1933	1934
Number of School Fairs held	501	507
Number of Schools taking part	4,078	4,769
Number of Children taking part	106,555	111,522
Number of Entries at the fairs	304,888	336,090
Number of Children attending Fairs	136,774	141,290
Number of Adults attending Fairs	182,808	180,194
Total Attendance	319,582	321,484

BOYS' AND GIRLS' CLUB WORK

The opportunities offered to farm boys and girls between the ages of 12 and 20 years, through the Ontario Boys' and Girls' Club Work policies, resulted in an increased enrolment. The gratifying response to the project, as shown by the unstinted effort and financial support of the rural people and local organizations of Ontario, demonstrated that they have a definite place in the training of rural youth.

The Dominion Live Stock Branch and the Ontario Live Stock and Field Crop Branches assisted this project by the payment of grants for prize money.

The following statistics for the years 1933 and 1934, are indicative of their popularity:

Project	Number of Clubs		Number of Club Members	
	1933	1934	1933	1934
Boys' Calf Clubs.....	42	49	835	960
Boys' Swine Clubs.....	19	17	279	197
Boys' Grain Clubs.....	23	41	452	789
Boys' Potato Clubs.....	19	26	545	536
Boys' Home Garden Clubs.....	17	18	334	414
Girls' Garden and Canning Clubs.....	30	51	631	973
Boys' Sheep Clubs.....	53	31	653	412
Boys' Foal Clubs.....	21	27	273	447
Boys' Poultry Clubs.....	2	2	47	143
Miscellaneous Clubs.....	27	23	508	720
Totals.....	251	285	4,557	5,591

Provincial Inter-Club Competitions

The honour of representing the Province of Ontario in the Inter-Provincial Contests at the Royal Winter Fair is keenly contested. A team of two members is selected to represent their club in the Inter-Club Competition, the winners having the privilege of representing the Province in the Inter-Provincial Contests. The number of teams competing and the names of the winning club teams are as follows:

Project	No. Teams Competing	Winning Club Team	Team Members
Cattle.....	24	Markham Dairy Calf Club	Ronald Bagg, Unionville Lorne Petch, Milliken
Swine.....	10	Orono Boys' Swine Club	G. Rickard, Bowmanville W. Rowland, Newcastle
Grain.....	5	Durham County Boys' Grain Club	Harry Kennedy, Cavan John Holmes, Newcastle
Potatoes.....	11	Manvers Boys' Potato Club	Ralph Rowan, Bethany G. Fallis, Millbrook

National Club Contests

National Club Contests are conducted at the Royal Winter Fair under the supervision of the Canadian Council on Boys' and Girls' Club Work, and each

province of the Dominion may send representatives. Ontario's standing in the different projects, considering the number of entries, was indeed creditable. The standing of the teams was as follows:

Project	No. Provinces Competing	Ontario Standing
Dairy Cattle.....	7	First
Swine.....	8	Second
Grain.....	5	First
Potatoes.....	3	Second

SHORT COURSES IN AGRICULTURE AND HOME ECONOMICS

The opportunity for young people on farms to receive further education on agricultural subjects is offered to at least one and sometimes two communities in each county each year. The Short Courses are rotated from point to point at the request of the people, the result being that practically all points in the county receive a Short Course within 5 to 7 years.

The calendars are drafted to include the subjects that directly apply to the agriculture of the district. Besides Agriculture, instruction is given in English, Music and Community Recreation. The Ontario Department of Agriculture appoints competent lecturers for these courses, while the local municipal council or organizations support them by supplying accommodation. Since the inauguration of these Agricultural Short Courses, 28,750 students have attended.

If requested, short courses in Home Economics for rural young women are conducted at the same place and time as the agricultural course for the boys. At these courses, nutrition, sewing, hygiene, nursing and cooking are studied. Instructors for these courses are supplied by the Ontario Department of Agriculture through the Women's Institute Branch.

Besides the One Month and Three Months' Courses in Agriculture and Home Economics, a number of Special Courses, varying from one to two weeks in length, have been held principally in Northern Ontario.

The number of Courses, together with the attendance during the past year, is as follows:

Course	Number Held	Number Students Enrolled
One Month Courses in Agriculture.....	36	1,407
Three Months' Courses in Agriculture.....	7	300
Special Courses in Agriculture.....	12	508
One Month Courses in Home Economics.....	32	1,345
Three Months' Courses in Home Economics.....	7	295
Special Courses in Home Economics.....	20	748
Totals.....	114	4,603

JUNIOR FARMER ASSOCIATIONS

The Junior Farmer Associations organized in the various counties are made up mostly of young men who have taken a Short Course in Agriculture. By uniting the members into an organization, a medium is retained which enables them to continue their studies, and, at the same time, keeps them closely associated with the activities in their respective communities. They have accomplished a great deal in improving educational and social conditions in rural Ontario. There are now 146 associations, with a total membership of 4,609. Their programme consists of holding business and educational meetings throughout the year, but chiefly during the winter months. They also conduct a number of competitions under their own direction and management, such as live stock, seed and plowing competitions.

In a number of cases, County Junior Farmer Associations have been organized, with representatives from each of the local organizations. These county associations take charge of such work as concerns the whole county, and have been active in organizing and conducting inter-association debates, county judging competitions, inter-association baseball leagues, county banquets, public speaking contests and field days. There are at the present time 18 county associations.

In conjunction with judging competitions, special prizes were offered in a number of counties, consisting of a trip to the Boys' and Girls' Club Congress at Chicago, the Ottawa and Royal Winter Fairs, with all expenses paid by local organizations. During 1934, trips were awarded as follows:

	Number of Boys	Number of Girls
Ottawa Winter Fair, Ottawa.....	3	3
Royal Winter Fair, Toronto.....	5	..
Boys' and Girls' Club Congress, Chicago.....	9	8
Totals.....	17	11

Judging Competitions

One of the most popular features of the Junior programme is the judging competitions, offered to boys under 26 years of age. These competitions are designed to create a knowledge of the best types of live stock and best quality seed grain and small seeds. Competitions of this nature are divided into the following three classes.

- (a) County Competitions.
- (b) Individual Competitions at Exhibitions.
- (c) Inter-County Competitions.

County Competitions

During the past year, competitions of this nature were held in forty-five counties and districts. A total of 1,702 young men participated.

Individual Competitions at Exhibitions

At the large exhibitions, the fair boards provide remuneration, by offering cash prizes. They realize that each competitor may be a future exhibitor,

and are therefore anxious to offer encouragement. The Ontario Department of Agriculture undertakes to supervise and supply judges for the competitions.

Exhibition	Number of Entries
Canadian National Exhibition, Toronto	548
Central Canada Exhibition, Ottawa	207
Western Fair, London	117
Industrial Exhibition, Peterborough	241
Total	1,113

Inter-County Competitions

Inter-county competitions, open to three contestants from each county, in live stock and seed judging, were conducted at the Royal and Ottawa Winter Fairs. At the Royal Winter Fair, the Jeffrey Bull Memorial Trophy, offered to the county team scoring the highest number of points in live stock judging, was won by Middlesex County. At the Ottawa Winter Fair, the team from Prince Edward County annexed the Ottawa Winter Fair Live Stock Trophy, and the Nettleton Seed Trophy was awarded to the team from Renfrew County. The number of teams competing was as follows:

Exhibition	Type of Competition	Number of Counties Competing
Royal Winter Fair	Live stock	30
Ottawa Winter Fair	Live stock	12
Ottawa Winter Fair	Seed	13

Calf Club Classes at Exhibitions

Such competitions were an innovation in 1934 at the Canadian National Exhibition. Each club within a certain prescribed area was allowed to enter three calves. The classification allowed for the showing of individual calves by breeds and in groups. The total number of entries was 112.

A similar competition was conducted at the Central Canada Exhibition, with an entry of 122. At the Ottawa Winter Fair, classes for calves and yearlings were included, with a total entry of 57.

JUNIOR FARMER PLOWING MATCHES

There were 19 Junior Farmer Plowing Competitions conducted last year with 279 boys competing. These competitions were organized under the supervision of the Agricultural Representatives and the Agricultural Societies Branch.

As a result of the competitions, a number of young men have become interested in better plowing, and have competed at the local plowing matches. Each year a team of three boys has been selected to represent their county at the Provincial Plowing Match. The Department of Agriculture contributed to the prize lists for the competitions to the extent of \$371.75.

CROPS, SEEDS AND WEEDS BRANCH

Weed Control Act Administration, Field Crop Promotion work, Junior Extension, Community Hall work, Lime and Seed Cleaning Plant Subvention policies were the major activities of this Branch during the year. The Assistant Director and Feed and Fertilizer Specialist were transferred in October, and a new Director was appointed. This Branch is now known as Crops, Seeds and Weeds.

MARKETS

CONSUMER PROGRAMME

A radio broadcast was given daily at 12.25 noon over CFRB, featuring Ontario Farm Products, and advising consumers how to purchase to advantage. This programme was discontinued after August 1st.

In addition to a regular bi-monthly press release, a continual flow of special articles and news despatches were sent out to the daily, farm and weekly press.

Timely advertisements were inserted in the leading papers inducing the consumer to buy Ontario fruits and vegetables or other products. Each advertisement dealt with a specific product.

CONSUMER EXHIBITS

The Ontario Department of Agriculture Exhibit at the Royal Winter Fair in November, 1933, consisted of 115 feet of space at the North end of the West Annex, and 75 feet of refrigerated space at the left of the West entrance to the arena. This exhibit was designed largely to give the consumer a greater appreciation of the quality and value of Ontario grown products.

The main exhibit was divided into sections, with one product featured in each section. Products featured were potatoes, turnips, celery, carrots, tobacco and onions. This exhibit created much interest, as was evidenced by the great number of questions asked and the favourable comments made to the attendants.

The refrigerated space consisted of export bacon, dairy products, poultry, fruits, vegetables and honey.

Women's and Children's Contests were staged. The prizes offered were either in the form of bank accounts or farm products.

At the Dental Convention, held at the Royal York Hotel, an attractive exhibit, designed to encourage consumers of food to think in terms of Ontario Products, was presented. A suitable booklet was distributed, entitled "The Basket of Health."

The above exhibit somewhat enlarged was set up at the Hamilton Armouries during the latter part of May, in connection with the Manufacturers' Association Exhibition. A great deal of interest was taken in this exhibit, and approximately 15,000 booklets were distributed. Radio broadcasts over the Hamilton Station were included in this programme.

FARMERS' CHRISTMAS MARKET COMPETITIONS

In order to stimulate the demand and to establish an appreciation of the value of home-grown food products, Christmas Market Competitions were organized at every market across the Province in December, 1933. Fifty-three (53) competitions were held in 45 centres. One thousand seven hundred and

six dollars (\$1,706) in prize money was paid to 826 winners. Many hundreds of farmers competed. Competitions were under the direction of Agricultural Representatives. Posters, hand bills, prize cards and prize money were supplied by the Department of Agriculture. The press gave splendid support.

CO-OPERATIVE MARKETING

This Branch continues to give advice on organization and incorporation of co-operative companies. The Branch also collects annual returns, and, in co-operation with Ottawa, has them analyzed for the benefit of the co-operatives.

During the year the following new co-operatives were organized:

Sudbury Producers and Consumers Co-operative Dairy, Limited, Sudbury.
 Wentworth Co-operative Society, Limited, Hamilton.
 The Ukrainian Co-operative "Future" Limited, Toronto.
 P.D. Co-operative Corporation, Limited, Hamilton.
 Belleville Co-operative Cold Storage Company, Limited, Belleville.
 Aurora District Co-operative Society, Aurora.
 Co-operative Bakeries (Hamilton) Limited, Hamilton
 People's Co-operative Society (Port Arthur) Limited, Port Arthur

CO-OPERATIVE MARKETING LOAN ACT

Under the Co-Operative Marketing Loan Act the following organization was assisted:

Organization	Amount of Loan
Wellington Packers Limited	\$25,000.00

MARKETING OF GRAIN, HAY AND POTATOES

Due to the scarcity of seed grain and potatoes in Ontario in 1934, this Branch acted as an information bureau for buyers and sellers. During February, a list of available supplies of seed grain and potatoes was prepared and forwarded to all Agricultural Representatives, and in this way their movement was greatly stimulated.

Uncontrolled shipments of Eastern potatoes into Ontario markets and disastrous prices both to the Ontario and Eastern growers necessitated negotiations, which were instigated by the Crops Branch. These negotiations resulted in a conference of growers and dealers of the five Eastern provinces held at Ottawa. The potato growers of these provinces have since organized, and the formation of the Eastern Canada Potato Marketing Board is well under way. It is believed that compulsory inspection, the raising of minimum standards for grades, prohibition of consignment selling, compulsory registration of growers and licensing of dealers and truckers, along with ways and means of processing surplus potatoes in years of large yields, will go far towards stabilizing potato prices.

The shortage of hay in some counties and a surplus in others caused surveys to be made through Agricultural Representatives during February and August. Negotiations were entered into with the railroads, in an attempt to secure lower freight rates on hay moving within the province.

ONTARIO HONEY EXPORT ASSOCIATION

The secretarial work of the Ontario Honey Export Association for the shipping season 1933-34 was handled by one of the members of the Branch staff. During the season, 534,190 pounds of light honey were shipped to the United Kingdom through the Association. In addition, 11,220 pounds of dark honey were sold to Norway, and 428 dozen sections of comb honey were placed in England. The gross returns on the light honey shipped amounted to £11,607.12 8, which represents an average selling price of 48 8 per long hundredweight. On the basis of an average exchange value of \$5.00 per pound sterling, this represents an average selling price in the United Kingdom of 10.86 cents per pound. The average cost of handling, which included transportation from the farmer's station to the United Kingdom warehouse, insurance, selling costs warehousing and commission, which amounted to 2/- per long hundredweight, was 1.7 cents per pound. The average net price f.o.b. shippers' station was thus 9.16 cents per pound.

The Secretary spent four weeks in the United Kingdom during the Fall of 1933, as a follow-up to his work as commercial representative during the previous year. During his visit he completed an arrangement with a large firm of distributors to pack and sell Ontario honey under the "O Canada" Brand. This company purchased approximately seventy long tons for this purpose, and paid a handsome premium on fifty tons taking the balance at the market. The work of selling during the 1933-34 season was carried out by Mr. S. E. Percival, formerly Assistant to the Agent-General and later Marketing Representative of the Department. His work was well done, and it was to a large extent due to his efforts that the handsome average price above noted was obtained.

The future for Ontario honey in the United Kingdom has every appearance of being bright, providing the quality and continuity of supply are rigidly maintained, the merchandising properly improved, and the purchasers fairly dealt with.

CROP PROGRAMME

The Crops, Seeds and Weeds Branch was represented at the annual conventions of the "Brotherhood of Threshermen" at London and Peterboro.

Grants were made to county and district seed fairs at Chatham, Petrolia, Hamilton, Essex, Perth and Napanee. Increased grants were made to corn growers in Essex and Kent, for the purpose of carrying on a special corn competition with the object in view of creating a wider distribution in the seed corn producing areas, of the superior strains now being grown by certain individual growers and known to be pure and suitable for Ontario conditions.

SEED CLEANING PLANTS

The establishment of seed cleaning plants throughout the province continues to be an important feature of the crop programme.

Seed cleaning demonstrations were conducted at Alliston, Guelph, London, Dresden, Woodstock, Brinston and Vankleek Hill. These were attended by operators, farmers, and agricultural representatives.

During the year new plants were established under the subvention policy as follows:

Plant	Place	County or District	Grant
W. A. Jenkins Manufacturing Co.....	London.....	Middlesex.....	\$500.00
W. A. Coulter..... (additional machinery)	Foxboro.....	Hastings.....	23.79
Campbell & McNab.....	Douglas.....	Renfrew.....	500.00
Aurora Flour and Feed Mills.....	Aurora.....	York.....	500.00
J. T. Hemstock..... (additional machinery)	Chatsworth.....	Grey.....	140.43
E. T. Phrimmer.....	Ben Miller.....	Huron.....	267.55
Oxford Farmers' Produce Co.....	Woodstock.....	Oxford.....	294.32
St. Isidore Seed Growers' Association..... (additional machinery)	St. Isidore.....	Prescott.....	30.66
C. L. Hartley..... (additional machinery)	Athens.....	Leeds.....	31.18
Howard Boyd.....	Brinston.....	Dundas.....	430.82
Dresden Flour Mills.....	Dresden.....	Kent.....	445.46
Carp Flour Mills.....	Carp.....	Carleton.....	498.34
Ottawa Valley Grain Products, N. E. Lindsay.....	Renfrew.....	Renfrew.....	496.00
Total.....			\$4,158.55

WEED CONTROL

Good seed is the foundation of weed control. More interest is shown and better crops are found in areas where seed cleaning plants have been established.

County weed meetings were held in every county in Old Ontario with the exception of Bruce. Four meetings were held in Northern Ontario. These were attended by Weed Inspectors, Road Authorities and Municipal Officers. At these meetings, Inspectors were fully informed as to their duties, and were equipped with the best information on ways and means of combating troublesome weeds.

The Weed Control Act was revised somewhat, so that the administration would be more effective.

Five part time men were employed by the day to act as District Inspectors.

There was a marked improvement in the work done on Provincial and County roads as compared to last year, but work on Township roads was hampered due to lack of funds.

Sow Thistle experiments were conducted at Queensville in York County, St. Isidore in Prescott, and Kinburn in Carleton county.

The Botany Department, Ontario Agricultural College, Guelph, carried on extensive experiments with chemical weed killers. Demonstrations with Atlacide and Sodium Chlorate were conducted on Sow Thistle and other weeds in various points of Eastern Ontario.

A "Weed Week" was held in Haldimand county.

Due to the increase of Clover Dodder in South-western Ontario, a special campaign was launched to eradicate this parasitic weed, which was seriously endangering the whole Red Clover export business. A special Weed Inspector was appointed for the counties of Elgin, Essex, Kent and Lambton. County and Township Councils co-operated. Twenty-five thousand copies (in colour) of the Clover Dodder circular were printed and distributed. Hundreds of Clover and Alfalfa fields were inspected in the fall. Only six outbreaks were

found in the four counties, and these fields were plowed or cut for hay. One more season of careful supervision should completely eradicate Dodder from South-western Ontario.

Lessons on Dodder and Sow Thistle were prepared, and taught in all the rural schools of the four counties. Many news articles were prepared and printed, and several radio talks were given over local stations in the infested area.

Nine hundred and eighty-eight Municipal Weed Inspectors were appointed in 1934.

BOYS' AND GIRLS' GRAIN AND POTATO CLUBS

In order to encourage Grain and Potato Club work in the Province, the Crops Branch paid 50 per cent. of the prize money offered on Achievement Day.

Clubs taking advantage of the offer were:—

GRAIN CLUBS

Name	County or District	Grant
Hastings Grain Club.....	Hastings.....	\$15.00
Zurich Grain Club.....	Huron.....	13.00
Micksburg Grain Club.....	Renfrew.....	16.50
Bonnechere Valley Grain Club.....	Renfrew.....	16.50
Elmvale Grain Club.....	North Simcoe.....	15.50
Kimberley Grain Club.....	Grey.....	16.50
Durham Grain Club.....	Grey.....	16.50
Lucknow Grain Club.....	Bruce.....	16.50
Verulam Grain Club.....	Victoria.....	13.50
Lombard Grain Club.....	Leeds.....	13.50
Brockville Grain Club.....	Leeds.....	16.50
Durham Grain Club.....	Durham.....	14.50
Hillsburg Grain Club.....	Wellington.....	16.50
Wentworth Grain Club.....	Wentworth.....	16.50
Dunchurch Grain Club.....	Parry Sound.....	16.50
Bonfield Grain Club.....	Nipissing.....	16.50
Jarvis Jr. and Sr. Grain Clubs.....	Haldimand.....	26.00
Oxdrift Grain Club.....	Kenora.....	14.00
Blenheim Grain Club.....	Kent.....	13.50
South Mountain Grain Club.....	Dundas.....	15.00
Rainy River Grain Club.....	Rainy River.....	15.50
Welland Grain Club.....	Welland.....	7.50
Perth Grain Club.....	Perth.....	16.50
Verner Grain Club.....	Sudbury.....	16.50
York Jr. and Sr. Grain Clubs.....	York.....	31.00
Oxford Grain Club.....	Oxford.....	13.00

\$418.50

CORN CLUBS

Name	County	Grant
Aldborough Corn Club.....	Elgin.....	\$16.50
Kent Yellow Dent Corn Club.....	Kent.....	16.50
Kent White and Yellow Flint Corn Club.....	Kent.....	15.50
Lincoln Sweet Corn Club.....	Lincoln.....	13.50

\$62.00

POTATO CLUBS

Name	County or District	Grant
Hastings Potato Club.....	Hastings.....	\$16.50
South Yarmouth Potato Club.....	Elgin.....	16.50
Manvers Potato Club.....	Durham.....	16.50
Kenora Potato Club.....	Kenora.....	12.50
Middlesex Jr. and Sr. Potato Clubs.....	Middlesex.....	33.00
Norfolk Potato Club.....	Norfolk.....	14.50

Sturgeon Falls, Sections A and B Potato Clubs.....	Sudbury.....	33.00
Verner Potato Club.....	Sudbury.....	16.50
Ontario Potato Clubs—2 Jr., and 1 Sr.....	Ontario.....	30.00
		\$296.25

The Branch also paid prize money amounting to \$100.00 to winners in the final Provincial Grain and Potato Club Competitions, held at the Ontario Agricultural College, Guelph.

THE ONTARIO ADVISORY FERTILIZER BOARD

As an outcome of repeated requests on the part of Representatives of the Fertilizer Trade, growers, and others, the following were appointed by Order-in-Council in February, 1934, and comprise The Ontario Advisory Fertilizer Board:

- R. Harcourt, Professor of Chemistry, O.A.C., Guelph.
- W. R. Reek, Superintendent, Ridgetown Experimental Farm, Ridgetown.
- W. J. Bell, Principal, Kemptville Agricultural School, Kemptville.
- R. S. Duncan, Director, Agricultural Representative Branch, Toronto.
- G. R. Paterson, Fertilizer Specialist, Dept. of Agriculture, Walkerton, Ont.
- W. J. W. Lennox, District Inspector, Dominion Seed Branch, Toronto.
- J. K. Perret, Tobacco Specialist, Simcoe.
- Fruit Growers of Ontario—F. Palmer, Vineland Experimental Station, Vineland.
- Vegetable Growers' Association—C. Delworth, Weston.
- Seed Growers' Association—J. J. Tierney, Brockville.
- A. L. Smith, Scottish Fertilizer Company, Welland, President, Eastern Canada Fertilizer Assn.
- A. M. Mooney, Canada Packers Limited, Toronto Secretary, Eastern Canada Fertilizer Assn.
- E. K. Hampson, Potash Company of Canada, Hamilton.

At the inaugural meeting held in February, Dr. Robert Harcourt was elected Chairman, E. K. Hampson, Vice-Chairman and G. R. Paterson, Secretary of the Board.

The objects of the Board are as follows:

1. To act as liaison between all fertilizer interests in Ontario, both manufacturer and consumer, and those charged with the administration of the Fertilizer Act of the Dominion Government.
2. To bring together representatives of farmer users, manufacturers, and government officials, in order that the trade may be informed with respect to analyses most suitable for the various crops and soils of Ontario.

3. To make recommendations to the Dominion Government officials, charged with the administration of the Fertilizer Act, respecting analyses which in the opinion of the Board should be legally sold in Ontario.

4. To recommend new analyses, when sufficient experimental evidence shall be submitted, as in the opinion of the Board shall warrant their introduction.

5. The creation of the proper perspective in relation to the use of fertilizer as a factor in a system of permanent soil fertility.

6. Nomination of necessary committees to undertake any investigation having to do with special crops in particular and any other problems arising, which require special attention.

7. That before fertilizer recommendations are made, experimental and demonstration data be placed before the Board.

8. To guard the interests of the users of the fertilizer by any other means, which in the concerted opinion of the Board shall be advisable.

Three Board Meetings were held during the year, as well as a number of committee meetings. As a result, recommendations for the use of fertilizers on various crops were drawn up. These recommendations contained concrete suggestions, determined after discussing thoroughly all of the available experimental and demonstration data compiled from tests in Eastern Canada and corresponding sections of the United States. The reports of the recommendations include the following crops:

Tree Fruits, Vegetable Crops, Spring Grains and Fall Wheat, Roots and Potatoes, Tobacco.

Perhaps one of the most important achievements of the Board during its first few months of existence was the arrangement of an agreement with the Fertilizer Manufacturers to discard three similar Phosphorous Potash analyses 0-12-4, 0-12-5 and 0-14-6, and to offer in their place, a new analysis 0-12-6, which is comparable to the three discarded and also similar to a well known complete fertilizer, 2-12-6.

INTERNATIONAL GRAIN AND HAY SHOW, CHICAGO

The total number of entries forwarded from Ontario to Chicago were not as high as in 1933, but the number of prizes taken were greatly increased. The following table will indicate that this show is becoming increasingly popular with Ontario exhibitors:

Year	Number of Entries	Number of Prizes	Championships	Reserve Championships	First Prizes
1929.....	46	27
1930.....	111	37	2	1	3
1931.....	112	80	1	..	3
1932.....	172	108	3	2	6
1933.....	200	130	1	1	6
1934.....	172	150	1	3	11

All exhibits were collected at Guelph and forwarded to Chicago under the supervision of an official of the Department of Agriculture, at the expense of this Branch. All corn exhibits were heat treated at Windsor, before crossing the border.

Fifty-dollar specials, offered by the Department of Agriculture to exhibitors winning first prize, were won as follows:

Class	Winner	Prize
White Winter Wheat.....	Walter Nagel, Fisherville.....	1st in Class
Barley, Six-rowed.....	D. L. Scott, City View.....	1st in Class
Soybeans, Yellow and Greenish Yellow.....	W. Davison, Blenheim.....	1st in Class and Reserve Championship
Field Peas, Small Yellow.....	Seraphine Schmidt, Formosa.....	1st in Class
Field Peas, A.O.V.....	Louis Robbins, Orangeville.....	1st in Class and Reserve Championship
Alsike Clover.....	Elson Richert, Cayuga.....	1st in Class
Alfalfa Seed, East.....	Thos. J. Brownridge, Georgetown...	1st in Class and Reserve Championship
Corn, White Dent, Region 1.....	A. S. Maynard & Son, Chatham....	1st in Class
Corn, White Dent, Region 2.....	John G. Crozier, Belle River.....	1st in Class and Regional Championship
Flint Corn.....	James Brisley, Thamesville.....	1st in Class
Hay, Timothy and Clover.....	A. Charbonneau, Alfred.....	1st in Class

Fifteen-dollar specials, offered to Ontario exhibitors standing highest in Alfalfa seed, Six-Rowed Barley, Red Clover seed, Soy Beans, Navy Field Beans, A.O.V. Field Beans, Large Yellow Field Peas, Small Yellow Field Peas, A.O.V. Field Peas, Early Oats, Late Oats and Corn, providing such exhibitors did not win a first prize, were won as follows:

Class	Winner	Prize
Late Oats.....	Thos. J. Brownridge, Georgetown...	9th
Early Oats.....	D. L. Scott, City View.....	3rd
Field Beans, Navy.....	Albert C. Gohn, Emo.....	5th
Field Beans, A.O.V.....	Tony Berberich, Mildmay.....	3rd
Field Peas, Large Yellow.....	Roy Goltz, Falkenburg.....	4th
Red Clover seed.....	Cecil House, Hagersville.....	4th
Corn, Yellow Dent, Region 1.....	Ellis C. Jones, Merlin.....	2nd
Corn, Yellow Dent, Region 2.....	Albert Smith, Woodslee.....	3rd

LIME SUBVENTION POLICY

The lime subvention agreement between the Provincial and Dominion Departments of Agriculture, the Canadian National, Canadian Pacific, Pere Marquette, Michigan Central, and associated railways, which was inaugurated in 1931, was continued this year. A subsidy of \$949.76 was paid by the Provincial Government. Movement was as follows:

1931.....	91 cars
1932.....	122 cars
1933.....	56 cars
1934.....	80 cars

COMMUNITY HALLS

During the year, four Community Halls and Parks were established under the Community Halls Act, R.S.O. 1927.

Hall or Park	County or District	Total Cost	Grant
Arden Community Park.....	Frontenac.....	\$2,425.50	\$606.38
Hudson Community Hall.....	Kenora.....	2,420.80	605.20
Springvale Community Hall.....	Haldimand.....	2,000.00	500.00
Teck Township Community Sports Field, Kirkland Lake.....	Timiskaming.....	12,647.68	2,000.00
		\$19,493.98	\$3,711.58

AGRICULTURAL DEVELOPMENT BOARD

The past year has been an unusual one in the Board's history. It was decided that the work of the Board should be reviewed, and toward the end of July all unfinished loans were suspended. An audit and investigation followed, and for the space of several months no new loans were granted. In October, the Board was re-organized, and the work of checking over all unfinished loans was immediately undertaken. Of these unfinished loans, some were cancelled, others were cut down, and still others were completed at the amount formerly offered. Up to the end of October, 1934, the Board passed 2,215 loans, representing an investment of \$4,939,225.00, but of these only 1,275 were completed.

The following table shows the business done by the Board for the past five years:

Year	Number of applications passed	Amount of loans passed	Value of Security	Number of loans paid out	Amount
1930.....	2,764	\$ 8,969,225.00	\$20,293,918.24	1,887	\$7,000,000.00
1931.....	3,361	9,701,420.00	21,913,130.45	2,329	7,900,000.00
1932.....	4,157	10,861,975.00	25,296,724.48	2,647	8,500,000.00
1933.....	3,415	7,576,750.00	17,940,680.09	2,478	6,700,000.00
1934.....	2,215	4,939,225.00	11,453,228.78	1,275	3,800,000.00
	15,912	\$42,048,595.00	\$96,897,682.04	10,616	\$33,900,000.00

The Board took sale proceedings in 63 cases, and acquired 75 farms by Quit Claim Deeds. The number of farms sold during the year was 131.

On the farms sold, a loss of \$163,271.40 was sustained, and this loss may be increased by reason of the fact that a substantial payment was not always obtained.

Weather conditions were not too favourable in many parts of the Province, and this, of course, has a direct bearing upon collections. However, generally speaking, better prices were obtained for the commodities which the farmers had to sell, and it was felt that a general improvement in farm conditions was noticeable. This was substantiated by the fact that collections were found to be better than during the previous year.

COMMISSIONER OF MARKETING

Too often in marketing the producer, the trade and the consumer are regarded as separate and opposing interests. In reality they are involved and inter-dependent.

In times of prosperity their relations get out of adjustment. The producer is careless as to his arrangements with the handlers of his products and the importance of marketing his produce at a minimum of cost. Dealing in farm produce under such conditions becomes enormously profitable. Expensive and duplicate marketing machinery is set up, the marketing agencies become over-capitalized, and an unreasonable share of the consumer price is absorbed. When consumer prices fall these inequitable handling arrangements continue, and the suffering of the producer, until they are adjusted, is out of all proportion to the price drop.

Over and above all this, however, it must be remembered that neither the farmer, nor the handler of farm produce, nor the consumer can get along without one another. Although the farmer has first to bear the full brunt of falling prices and pay dearly for neglecting the management of his marketing, the handlers of his produce must also readjust their capital structures as well as their costs and methods of distribution to save themselves from ruin. The consumer, too, soon realizes that uneconomic and unduly low prices for farm products are the surest method of retarding his own recovery to more prosperous conditions.

The tragic contradiction of poverty amidst plenty, as a result of ill-distributed abundance, has shaken all lines of industry in this country to the foundations of its economic structure. Nearly everyone admits to-day that the inequalities of distribution have to be rectified.

The whole world has been faced for some time with the necessity of adjusting itself to many changes in its economic structure as the result of new conditions. The imperative need of solving the problems of farm industry has been approached in many different ways, with a view to bettering conditions through the elimination of waste, uneconomic competition, and particularly re-adjusting the system of marketing and distribution.

In Ontario the method of approaching these problems in agriculture has been through discussion and understanding. For this purpose the Ontario Marketing Board was set up to study the conditions surrounding every phase of agricultural marketing, and to offer leadership towards rectifying and adjusting inequalities in marketing conditions through farmer organization.

The work started by this body is being carried on under the new administration in simplified form by a Commissioner of Marketing, who supercedes the former Board. Many thousands of dollars have been added to the income of distressed agriculture in this Province as a result of its efforts.

Efforts to better farm marketing conditions, through discussion and conference with those most interested, have been heartily welcomed by farmers everywhere. The Commissioner of Marketing, having even wider powers and possibilities of usefulness, has been able to make rapid progress in ascertaining the causes of depressed prices and poor returns to the farmer. Once all the facts are ascertained, logical, even obvious solutions present themselves. Visionary and impracticable schemes are unable to stand the light of careful examination, but, on the other hand, no change or adjustment in the marketing of farm products has been felt to be too radical if it could stand the test of usefulness.

In past years Ontario's position in domestic and world markets has been so favourable, that co-operative organization of farm industry has perhaps been more backward than in any other province. The need being less acute, organization languished. This was the case, in spite of the fact that it was universally recognized that only through farm organization and active participation in the management of their own affairs can agriculture resist and recover from such shocks to the economic structure, as Canada has experienced in the depression still with us.

During the year ending October 31st, 1934, work towards improvement in marketing conditions in agriculture went steadily forward. Some of the activities of the year will stand brief reference.

CHEESE

Cheese is the key problem of the dairy products industry of Ontario. Any so-called surplus of milk products in this Province seems absurd. The dairy industry in Ontario is not over-extended. In fact, very slight changes in the present marketing system and in export conditions would cause milk shortages. It has been conservatively estimated that Ontario could double its production of dairy products profitably, if its marketing problems were solved. If the cheese industry were in a healthy condition, if it were absorbing normal quantities of milk, there would be no butter problem nor any whole milk problem within the cities of Ontario.

It has been the low price obtained by the farmer from cheese milk that has led to his withdrawal from that industry. At the present time, Ontario is not making nor exporting a quarter of the quantity of cheese it marketed some few years ago.

In this case it has been the unequal share of suffering resulting from falling prices and passed on to the farmer that has disrupted the industry. If our farmers were getting their fair share of the consumer price of the product, our cheese industry would be in a healthy position to-day. The problem, stripped of all non-essentials, is to bring back the price of cheese milk to the farmer to a reasonable figure. Steps have been taken to bring this about through organization, and that it can be done, even under the present depressed conditions of export and domestic markets, seems beyond reasonable doubt.

To this end, all cheese factories in the Province have joined in forming a Cheese Patrons' Association to take over the management and re-organization of the domestic and export marketing of their product on a restored competitive basis. Powers have been asked for, under the new Federal legislation, to restore to the cheese patron the control of his marketing machinery. A businesslike commercial organization has been set up among the cheese patrons for this purpose, and under the same legislative powers a toll is to be collected in the marketing of the product to enable the producers to maintain and carry out their plans in an orderly manner.

No radical or visionary methods are contemplated, merely the assumption of full responsibility for re-organizing the marketing of their product.

FRUITS AND VEGETABLES

Progress has been made towards organization for the purpose of re-adjusting the marketing practices of this industry. The amalgamation of the Fruit Growers' Association and the Vegetable Growers' Association is contemplated.

These two bodies, it is planned, will co-operate in a common Marketing Council, which will attempt to solve for the various groups of vegetable growers the problem of low prices and seasonal price fluctuations, which have rendered their position so difficult during the last three or four years. Particularly do they plan to improve relations between Growers, Canners and Jam Manufacturers.

The changing world of motor truck versus railroad transportation is one that is disrupting all the old channels of trade. Commission and jobbing houses are vitally interested in this move on the part of the producer, to reorganize their fresh fruit and vegetable marketing and regulate itinerant trucker activity.

HOGS AND BACON

The hog producers of the Province have taken steps to organize themselves county by county, and have federated Provincially for the purpose of improving breeding methods and increasing the production of a higher grade bacon type hog most suitable to the export trade. The problem of local marketing through drovers, truckers and stockyards to better advantage is also engaging their attention. A census of the hog population, and the availability of hog supplies month by month for market, it is felt, will lead to new methods of orderly marketing, that will iron out the fluctuations of prices that cost farmers many thousands of dollars yearly.

Experiments in bacon export, conducted by the Commissioner of Marketing in conjunction with efforts to put the First Co-operative Packers of Ontario, Ltd., Barrie, Ont., on a sound prosperous basis, have indicated that Canada's bacon prices in Great Britain, on which depend our hog prices in Canada, could be improved. Attempts have been made to form a Bacon Export Association of packers, and move towards a new system of bacon marketing on British markets to compel price recognition of our best grades of product. Most packers are tied up under consignment agreements, which, however, do not include adoption of other methods. Independent packers are very much interested in the proposal.

CATTLE MARKETING

Believing that a healthy cattle export trade with Great Britain was possible, even under 1933-34 depression conditions, a series of enquiries, coupled with a demonstration shipment, was undertaken that led to most interesting results. The completed enquiry only convinced the Board that the live stock interests of the Province should take a more active interest in the management and regulation of their export to the Old Country, in order to make it satisfactory.

A normal export outlet for Ontario cattle is of utmost importance, not only to take care of an apparent surplus which is at present demoralizing the domestic market, but also to substitute for the important southern market on this continent which has largely been cut off. On the other hand, an acute situation exists, whereby our cattle raisers have no confidence in the British market under present conditions, and only turn to it as a last resort.

With a view to solving the problem, a form of organization on a county basis, and including both the commercial beef cattle raisers and dairy cattle breeders, was suggested to the industry and warmly endorsed by it. Two organizations were proposed.

The first is the Ontario Beef Cattle Producers' Association, which proposes to undertake many activities to improve and regulate domestic marketing conditions, and to purchase satisfactory and uniform supplies of better class feeder stock from Western ranches and ranch organizations.

The second and farther reaching is the Ontario Cattle Export Association, representing both beef and dairy cattle interests. It proposes to maintain its own shipping organization in Montreal, Que., and also a Commercial Representative overseas, to whom Ontario cattle would be shipped. This step is planned so as to obtain competitive prices from a large section of the British import cattle trade, who, under present conditions, have no opportunity to bid for Canadian supplies. Establishment of compulsory grading for export is also urged by the Association to prevent large numbers of inferior stock being exported by speculators. Most important in the Association programme is the matter of obtaining cattle shipping space. The Association in this regard proposes to apply to the Dominion Government for authority to have cattle exports regulated by export license, and then to have the administration of these licenses turned over to it so that space may be fairly allotted.

The whole aim and object of the Association is to organize on a basis that will restore confidence, and insure stability and some reasonable promise of profit to the cattle export trade.

TURNIPS

The Ontario table turnip, grown in favoured limestone areas and marketed largely in the United States as "Rutabagas", is an important feature in Ontario agriculture. Normal export in some years to the neighbouring republic runs as high as 4,000 carloads annually.

Consumer demand for highest quality turnips on our local markets has been largely decreasing in recent years, and an effort was made some time ago to popularize the product again through an experiment in washing, topping, paraffining and branding, which was singularly successful. Only turnips were branded that graded up to the Canada No. 1 standard, and which were otherwise trimmed and packed according to the best accepted practices.

Prices which are now being realized for table turnips marketed in this manner are double former returns for this crop when handled in the old haphazard fashion.

EGG MARKETING

The amendments to the Dominion Livestock and Livestock Products Act this year, respecting egg grading, contained provisions for the establishment of a new grade termed Grade A-1 and intended to be the highest quality of egg obtainable. In order to pack this top grade, poultry producers have to apply for a permit from the Dominion Department of Agriculture, and eggs must be graded, candled, packed in cartons and sealed on the farm.

The three chief requirements for the A-1 permit are: Satisfactory production conditions, facilities for, and ability to grade and candle eggs properly, and a suitable market outlet.

In the case of most producers it is the third condition that causes concern. To meet this situation, the Board, after circularizing and receiving the approval of the industry, organized the Ontario A-1 Co-operative Egg Producers' Association. The Association is voluntary in character, and composed entirely of licensed producers.

The Association has appointed distributing agents in Montreal, Toronto and Ottawa to handle its members' eggs at a premium of 10c. per dozen wholesale over graded "A" prices, and 12c. per dozen wholesale over ungraded "A" prices. Other markets will be opened as occasion demands. The eggs are sold under the Provincial Big "O" Brand of quality, licensed to the Association by the Ontario Department of Agriculture. All necessary packing and shipping supplies are secured for members at cost by the Association through collective purchasing.

Preliminary difficulties in getting under way, have been overcome, membership is growing rapidly, and the volume of eggs handled is constantly increasing. Most important, the consumer acceptance of this high quality product has been found most favourable. The future success of the Association, providing constant care is exercised by the members towards guaranteeing a high quality product, seems assured.

The success of this enquiry into egg marketing conditions has led to further investigation into the entire egg and poultry industry. While work thus far is just underway, results to date indicate that this important branch of Ontario agriculture also desires to assume an increased responsibility in the management of the different channels of trade between the producer and consumer. Steps being contemplated are the registration of producers, licensing of distributors, and the establishment of some form of a Produce Exchange to facilitate price agreement.

NATURAL PRODUCTS MARKETING ACT, 1934

This Dominion Act "to improve the methods and practices of marketing of natural products in Canada and in export trade . . ." marked the first concerted effort to re-organize the marketing methods and practices of natural products, which the legislation admits are undesirable at present, and to enable producers to resume the management and regulation of their respective industry they formerly held. Two of the four principal features of the Act include:

(a) provision for the formation of local commodity boards, for regulating the marketing of natural products produced or owned by those who come within the control of such boards.

(b) provision for the regulating of marketing, and the marketing of natural products in inter-provincial or export trade.

The Act, while Federal in scope, immediately had far-reaching effects on Ontario agriculture. Within four months of its adoption, three leading Ontario cash crop farm groups had moved to take advantage of the powers provided by the new legislation. In the organization work leading up to the establishment of these three local self-governing commodity boards, this Board was requested and was privileged to be of every assistance possible.

The three Ontario farm groups voluntarily having taken advantage of the new marketing legislation to date are the Export Apple and Pear Growers, the Flue-Cured Tobacco Growers, and the Field or Dry Bean Producers.

Fruit Board of Canada:

This was the first marketing scheme affecting Ontario to be put into operation under the new Federal legislation at the request of the industry concerned. The purpose of the scheme is to regulate the marketing for export from Canada

of fresh apples and pears. The powers of the Fruit Board include the regulation of the movement of apples and pears exported, and the prohibiting, during any period, of the exportation of any quantity, size or quality of fruit. Ontario, together with Nova Scotia and British Columbia, is particularly concerned, since from these provinces practically all the fruit of this class is exported. The situation with respect to the marketing of fruit in the United Kingdom was such, that the regulation of the marketing of fruit from Canada became imperative.

Ontario Flue-Cured Tobacco Marketing Board:

As the name indicates this scheme is entirely Provincial, and confined practically to the counties of Essex and Norfolk. Its purpose is to ensure more adequate returns to producers, and to place manufacturers and packers on a fairer basis of competition.

The commodity local board set up has power to register producers, to license buyers, to fix appraised values on all crops, in relation to a negotiated average appraisal for the entire tobacco production, and generally to regulate the primary marketing of tobacco. Provision is made for the compensation of producers whose marketable leaf may be withheld from sale because of the exigencies of the situation. Under a provisional board of fourteen members, the greater part of the 1934 crop of 22,000,000 pounds has already been marketed, and general satisfaction has been expressed by both producers and buyers over the operation of the scheme.

Western Ontario Bean Marketing Board:

Similarly to tobacco, this scheme is entirely Provincial in character, embracing all of the south-western counties of Ontario.

Lack of effective organization among producers and dealers, which led to price cutting and demoralized marketing, had lowered returns to the growers to less than the production cost of the regulated product. Under the scheme, bean dealers will be licensed, growers will be registered, and sales of beans on consignment will be discontinued. The scheme also contemplates the orderly marketing of all beans through a marketing agency, and the adoption of promotional efforts to increase the consumption of dry beans in domestic and foreign markets.

CONCLUSION

As another fiscal year closes, it is worth reviewing the rapidly mounting interest which is being taken by farmers and farm industry in the marketing problems facing agriculture. That this movement is still in its infancy is self-evident from the constantly growing number of marketing projects or schemes, either in the final stages of preparation, or which are as yet being merely discussed on the back concessions. Schemes now already include potatoes, cheese, cattle, poultry and eggs, honey, and manufactured milk. These marketing projects were especially highly beneficial to the primary producers in Ontario, to whom markets for their agricultural products mean so much, and who, in the face of growing organization and control in modern commerce, seem themselves to be moving towards taking steps to regulate the marketing and business conduct of their industries.

PROVINCIAL ENTOMOLOGIST

The following is a statement of the total expenses incurred in the Province of Ontario during 1934 in the enforcement of the Corn Borer Act. The amount payable to the counties by the Government in 1934 was \$5,092.59 $\frac{1}{2}$, as compared to \$5,091.17 $\frac{1}{2}$ in 1933; \$8,551.32 $\frac{1}{2}$ in 1932; \$9,834.14 in 1931; and \$12,909.00 in 1930. In 1930 the cost to the Government to maintain this branch of agricultural work was more than double that of 1934.

This year's total is about \$1.50 higher than last year, but in 1933 the counties of Northumberland and Durham were not under the Act, while Ontario County was at the time under it. In 1934 Northumberland and Durham came back, and Ontario dropped out. Hence there was one more county under the Act this year than last. The counties east of Toronto were given the option of coming under the Act or not. York, Northumberland, Durham and Hastings entered this year; Prince Edward, Ontario and Lennox and Addington did not join.

Following is a table showing the corn borer situation at the end of 1934, as compared with that in 1933. It is worthy of note that there are only about one-third as many borers in the Province this fall as there were in the fall of 1933. This great reduction was brought about partly by a better clean-up during the past year than in the preceding one, and partly because of the weather, which was very unfavourable to the borer during 1934.

TABLE SHOWING THE PERCENTAGE OF CORN PLANTS ATTACKED BY THE BORER
IN THE DIFFERENT COUNTIES IN 1933 AND 1934 RESPECTIVELY

County	Number of fields inspected		Average per cent. infestation in 1933	Average per cent. infestation in 1934	Highest per cent. infestation in any field	
	1933	1934			1933	1934
Lambton.....	40	43	23.3	7.5	79.0	28.0
Essex.....	41	53	29.5	7.8	96.0	44.0
Kent.....	42	53	35.0	7.5	98.0	35.0
Pelee Island.....	16	18	12.0	3.8	39.0	8.0
Elgin.....	30	30	16.6	6.6	43.0	25.0
Middlesex.....	40	40	20.0	4.6	51.0	22.0
Norfolk.....	30	30	9.4	3.3	22.0	17.0
Oxford.....	28	28	17.0	6.0	60.0	17.0
*Haldimand.....	..	16	not inspected	5.6	26.0
*Welland.....	40	22	7.5	1.5	19.0	8.0
Lincoln.....	29	20	20.0	5.3	58.0	28.0
Wentworth.....	29	22	18.5	7.7	70.0	43.0
†Halton.....	20	20	16.6	11.0	56.0	27.0
†Peel.....	20	20	39.0	11.0	80.0	33.0
‡Ontario.....	..	20	not inspected	15.2	62.0
Durham.....	..	20	not inspected	9.4	37.0
Northumberland.....	..	21	not inspected	5.0	17.0

* Much of the early corn in Haldimand and Welland in 1934 had been cut; hence the percentages in these two counties are probably too low for this year.

† Only the southern half of these counties was inspected in 1933 and 1934. The northern half has less sweet corn and is more lightly infested.

‡ Ontario county was not under the Corn Borer Act this year, but it would not be safe to assume that this alone caused it to be the most heavily infested county.

PROVINCIAL ZOOLOGIST

The work of the Provincial Zoologist and Assistant during the year was divided between field service, laboratory, lecture room and office. The field work, having to do with disease control in domestic animals, occupied the major portion of the time. The lecture room with its required teaching of Physiology and Anatomy to veterinary students was also a major activity.

Numerous field investigations were made at the request of Agricultural Representatives and Veterinarians to determine the cause of animal loss in various sections of the Province. Nutritional diseases, forage poisoning or botulism, and parasitic diseases were the most common troubles.

Lecture demonstrations, relating to animals health and parasitism as affecting animal health, were given on farms in many counties where trouble occurred. These meetings were generally well attended.

Agricultural Short Courses were attended in all counties of the Province, and four lecture hours, covering the parasitic diseases of domestic animals, were given at each course. Special stress was placed on awakening interest in the control of Bot Flies and Warble Flies. Lectures on unsoundness in horses were given at the Agricultural Short Courses of three months' duration.

Exhibits were created and staged at the Royal Winter Fair (1933), the Ontario Provincial Winter Fair (1933), the International Plowing Match, 1934, and at 28 School Fairs, in three counties (Ontario, Dufferin, Carleton). Great interest was shown in these exhibits, especially at the School Fairs, where a lecture was given during the afternoon. A contact was made with some 30,000 people at the school fairs attended. Co-operation was given to the Agricultural Representatives Branch, the Ontario Live Stock Branch and the Ontario Veterinary College in all related work.

The Counties of Oxford and Elgin were given considerable assistance with the Warble Control campaign. Twenty-four organization meetings were held in each county in order to get the work under way, and general supervision was given to the work. Other counties were given similar assistance in a smaller way, the result of which was that considerable Warble Control work was undertaken in Lambton, Middlesex, Haldimand, Carleton, Muskoka, Parry Sound, Ontario, Simcoe, Perth, Huron, Waterloo, Durham, Manitoulin, Dufferin, Grey and Bruce.

A number of cases where loss of live stock had taken place were investigated. In Grey County serious loss occurred among work horses from forage poisoning during the spring, and cases of cattle poisoning resulting from animals grazing in swampy areas.

Continuing the work started in 1932 in Barrie Island Township, all the cattle were treated during March, April, May and June, for Warble and Heel-fly control. The result of the 1933 treatment was obtained and recorded, and a decided improvement was noted in most herds. The examination of 34 herds on the first of May, 1934, showed that 16 herds were free of grubs. An examination on the same herds made on the 5th of June, 1934, showed 17 herds to be free of Warble larvae. The average Warble larva infestation per animal for the Township was reduced considerably from that of the previous year, namely from 9.21 to 5.86 grubs per animal. These results, while quite marked, are not as good as had been hoped for. Some indifferent people brought untreated

grub infested cattle into the township, and permitted them to mix with the treated cattle. A marked improvement was, nevertheless, shown, in spite of the lack of co-operation on the part of some cattle owners. The progressive decrease in Warble larvae infestation of cattle on Barrie Island Township is shown in the following figures:

In 1932	the	average	number	of	grubs	per	animal	was	22.75
In 1933	"	"	"	"	"	"	"	"	9.21
In 1934	"	"	"	"	"	"	"	"	5.86

The infestation count on the 1934 work will not be obtained until the spring of 1935, when a further reduction is anticipated.

In co-operation with the Agricultural Representative for Manitoulin, some 18,000 cattle were given treatment for Warble Control as a continuation of the work started in 1933. The material cost was undertaken by the Department of Agriculture and the Ontario Cattle Breeders' Association. The results of the work have been entirely satisfactory to the cattle owners, who, having had this demonstration of the practicability, low cost and ease of control of Warble Flies, should now be able to carry on without further aid from the Department.

The horses on Barrie Island Township were treated with carbon disulphide during the last week of December. This was second year of treating for control of the Bot Flies on this Island. Very few Bot Flies were reported from the area during the past summer.

Routine laboratory work consisted of the examination and autopsy of animals sent in, the examination of fecal matter and tissue for evidence of parasitism, the mounting of specimens, the making of photographs, and the making of charts for lecture work and for use in connection with the Departmental Offices in various counties. As a faculty member of the Ontario Veterinary College, the Provincial Zoologist has been responsible for the teaching of the course in Veterinary Physiology to the second and third year students. Commencing October 1st, the Assistant to the Provincial Zoologist undertook full time College work as Demonstrator in Anatomy and Lecturer in Veterinary Science to students of the Ontario Veterinary College.

Bulletin 350 on Warble Flies was revised and reprinted, and a new bulletin on Bot Flies and Their Control was prepared for the printer. Twenty sets of charts (36 x 42 inches, cotton) were made and placed in county Agricultural Representatives' offices.

Enquiry by correspondence has been very heavy during the year.

FIELDMAN FOR NORTHERN ONTARIO

Generally speaking, the season of 1934 was reasonably favourable for crop production. It is true that over such a large area there is bound to be considerable variation in time of seeding, rainfall, nature of weather for haying and harvesting, etc., but, taking the North Country as a whole there is little room for complaint this year insofar as the season has been concerned.

At Kapuskasing the spring was later than normal and it was not until May 19th that any work was done on the land. In other sections, however, for example in the Rainy River District, the crops were seeded quite early. Over the greater portion of Northern Ontario, the yields of both hay and grain crops were well up to the average. In some sections, wet weather was a distinct handicap in cutting and curing the grain crops, and in these locations the growing of early maturing varieties proved to be of great advantage.

Owing to abundant moisture and mild weather, late summer and early autumn pasture were plentiful, so that most live stock went into winter quarters in fairly good condition.

During the past year efforts have been made to familiarize as many of the settlers as possible with the work that is under way at the Kapuskasing Experimental Station, and with the results obtained to date. It is hoped through this medium to assist materially in the general advancement of agriculture over the entire area served by the Station. To accomplish this, it was necessary to make contacts with the farming public in a widely varying number of ways, some of which were as follows: The settlers were encouraged to make personal visits to the Station as often as they can; the Station worked in the closest possible co-operation with the various Agricultural Representative Offices; inquiries and correspondence were solicited on all problems associated with agriculture in Northern Ontario; the settlers were visited on their own lots where their individual problems could be discussed and dealt with as seemed best; press articles were sent out and lectures given at short courses and agricultural meetings and at many other agricultural functions, such as fall fairs, ploughing matches, field days, etc. In fact the Station took advantage of any and every opportunity which presented itself to spread the message of improved agriculture to those who were interested. Such were the features emphasized by this Office during the past year.

On July 25th over 75 members of the Hearst Women's Institute and their friends spent a very enjoyable and profitable afternoon looking over the buildings, lawns, flowers, shrubbery, garden, poultry and experimental plots of the Station.

August 2nd was designated as Field Day, and, although the weather was wet, about 300 visitors came by train, in cars and on foot, from all parts of the district to spend the day in going over the Institution and endeavouring to learn something of the work which is being carried on. The various phases of the experimental projects were explained by members of the staff. It is felt that as time goes on, this means of contact can be materially and advantageously strengthened. This plan might perhaps be carried out by having a number of smaller Field Days, when more time could be given to an explanation of the actual experiments under way and the purpose of each.

Following is a brief summary of the principal activities of the Station during 1934:.

Short Courses were attended at Kentvale, Iron bridge, Warren, Port Arthur, Kenora and Stratton. Agricultural meetings were addressed at Porquis Junction, Harmony Corners, Kentvale, Fort William, Slate River Valley, Rice Lake, Wabigoon, Dinorwic, Bedworth, Develin, Carpenter School, Bergland, Burriss, Barwick, Shenston, Sleeman, Stratton, Fisher's School, Emo, Harris Township Hall, and Bruce Station. Field days on Illustration Stations were attended at Dryden, Verner, Mindemoya and Thessalon. Judging was done at the Fort William, Kenora, Rainy River, Emo, Sault Ste. Marie, Desbarats, Kagawong, Gore Bay and Manitowaning Fall Fairs. Assistance was also given at two School Fairs. A Field Crop Competition in oats was judged in the Dryden District. A Ploughing Demonstration was put on at the Field Day at the Industrial Farm, Fort William, and matches were judged at Sault Ste. Marie, St. Joseph Island, Verner, and Bruce Mines. Assistance was also given at a judging competition on Barrie Island and at several others held in connection with the Fall Fairs. Considerable time was spent both in driving weed inspectors and getting in touch with municipal weed inspectors, in an endeavour to have cut the almost alarming quantity of perennial sow thistle that could be seen in blossom at various places and times. Markets were located for beef, pork, mutton, poultry, eggs and small fruits. Much thought and indeed tangible assistance was given to the marketing of the settlers' farm products.

Those who wished to purchase seed grain, seed potatoes, grass seed, etc., were put in direct touch with those who had these products for sale. As an illustration of this, one settler in Kenora District had about 500 bushels of No. 1 Alaska seed oats, which were quickly disposed of at a satisfactory price as a result of showing a sample to several interested parties. It seems evident that the average Northern Ontario business man would be only too pleased to purchase northern products, provided that these products were of the grade and quality desired by his customers.

There is undoubtedly a real opportunity for further development along the line of instructing the settlers in studying the needs of their various local markets, and then meeting those needs with properly graded quality products.

MILK CONTROL BOARD OF ONTARIO

A report of any Body that has been in operation for less than one complete year can be only a report of progress and not a report of work completed, but this report of the Milk Control Board of Ontario can indicate very considerable progress in its work of enforcing the Milk Control Act, 1934.

The primary purpose of the Act was the improvement of conditions among milk producers who supply milk for consumption in the urban sections of the Province, and the achievement in this direction can best be indicated by referring to statements made by officials of the Ontario Whole Milk Producers' Association. These officials have expressed the opinion that the degree of control in the market milk business of Ontario so far attained under the Milk Control Act has meant at least two and a half millions of dollars (\$2,500,000) in actual cash to Ontario Milk Producers and at the present time their product is bringing in at least five hundred thousand dollars (\$500,000) per month more than it did two years ago.

The Milk Control Act, 1934, was proclaimed by Order in Council to be in effect on April 18, 1934, and on May 1, 1934, a Milk Control Board of Ontario was appointed. The Board immediately commenced its work of attempting to bring some order out of the chaos found in the market milk business and this work has engaged almost the constant attention of the Board since that date.

The operations of the Board will be reported under the following main headings:—

- A. Meetings of the Board.
- B. Investigations conducted by the Board.
- C. Enforcement of the Milk Control Act and its Regulations.

A. MEETINGS OF THE BOARD

1. Meetings Held:

(a) Meetings of the Board held in the office of the Board	43
(b) Meetings of the Board held at outside points	45
(c) Meetings held in the office of the Board and attended by the Board or its representatives	63
(d) Meetings held at outside points and attended by the Board or its representatives	56
Total Number of Meetings	207

2. Business Conducted:

The meetings of the Board held in the office of the Board were for the transaction of the following business:

- (a) Discussion and approval of regulations.
- (b) Reception, discussion and approval of agreements submitted by producers and distributors.
- (c) Consideration of applications for licenses.
- (d) Checking of evidence regarding matters submitted to the Board for decision.

- (e) Reception of delegations appearing before the Board in connection with various matters affecting the milk business.

The meetings of the Board held at outside points were mostly for the purpose of receiving evidence and discussing matters in connection with agreements between producers and distributors.

The whole Board, individual members of the Board, or the Secretary of the Board attended large numbers of meetings in various parts of the Province, for the purpose of meeting groups of producers, distributors and others whose problems were of sufficient importance to justify a visit to outside points.

Many of these visits were in connection with the arbitration of disputes between producers and distributors in local milk markets.

During the year, meetings were held in practically every important milk market in the Province and through these meetings it was possible for the Board to explain its work to those interested, to secure a true picture of conditions in the dairy business throughout the Province, and to eliminate many of the difficulties confronting those interested in the production and marketing of fluid milk.

(B) INVESTIGATIONS MADE BY THE BOARD

The Milk Control Act gives the Milk Control Board authority to make enquiry regarding any matter relating to market milk business. Some enquiries have been instituted by the Board in various parts of the Province, chiefly including the following:—

(1) *Auditing the Books of Milk Distributors to Determine Whether or Not Producers are being paid in accordance with Agreements Entered Into.*

At the request of the Producers' Associations, the Board required audits to be made of the books of milk distributors in several markets of the Province, and as a result of this work, certain irregularities regarding the payments made to producers for milk have been corrected.

(2) *Auditing of Books of Milk Distributors to Determine Actual Distribution Costs:*

This work had just been arranged for at the end of the year and no definite report can be made on it as yet.

(3) *Securing of Information from Other Places:*

The Board has been in close correspondence with bodies doing similar work in the other Provinces of the Dominion, in several of the United States, and in Great Britain. Through this correspondence much information has been obtained regarding milk control operations in other places, which information has been of great value and considerable guidance to the Board in its work throughout Ontario.

In accordance with this policy of studying milk control operations in other places, representatives of the Board attended two conventions in the United States:—

(a) National Co-operative Milk Producers' Federation—Syracuse, N.Y.

(b) International Association of Milk Dealers—Cleveland, Ohio.

At these conventions mutual problems were discussed with representatives of Milk Control Boards, which have been in operation for some years. Opinions of producers and dealers were also obtained.

The Board, therefore, is now reasonably well equipped with information, and its value to the Dairy Industry of Ontario during coming years should be even greater than in the past.

C. ENFORCEMENT OF THE MILK CONTROL ACT AND ITS REGULATIONS

The practical application of the Milk Control Act to the market milk business of the Province has been carried forward to the point where very considerable results have been obtained.

The work of the Board in this connection has been along four definite lines:—

- (1) The licensing of milk distributors.
- (2) The bonding of milk distributors who purchase their supplies of milk from milk producers.
- (3) The approval of agreements arrived at between producers and distributors.
- (4) The handling of certain miscellaneous problems that are constantly claiming attention.

(1) THE LICENSING OF MILK DISTRIBUTORS

(a) *Statistics:*

- a. Temporary licenses issued during 1934— 1335
- b. Applications pending at the end of 1934— 21

(b) *Remarks:*

The Regulations passed under the Milk Control Act require that all persons, except storekeepers and peddlers, who sell milk to consumers in Ontario must hold a license from the Milk Control Board.

The first move toward the control of the Industry was the licensing of milk distributors. By the end of 1934 practically all of the important distributors had been licensed, and in addition a large number of producers who are also distributors.

At the start no effort was made to require licenses from the following:—

- (1) Peddlers.
- (2) Storekeepers.
- (3) Producer distributors who sold less than 25 quarts per day at their farms.
- (4) Owners of one or two cows, who sold only a few pints of milk per day to neighbours.

The Regulations provided for the issuance of temporary licenses during 1934 so that a certain amount of control of the business could be obtained at as early a date as possible. Licenses were issued to all who applied for them and

who were distributing milk previous to May 1, 1934, even through all the requirements of the Regulations had not been complied with. These temporary licenses made possible a rapid licensing of distributors and gave those distributors a reasonable time to conform to other regulations, such as the deposit of proof of financial responsibility. The Regulations do not provide for the issuance of temporary licenses after December 31, 1934.

(2) THE BONDING OF MILK DISTRIBUTORS

The Regulations under the Milk Control Act require that all milk distributors who purchase their supplies of milk from producers must provide proof of financial responsibility in accordance with the Regulations. Up until the end of 1934 such proof of financial responsibility had been deposited with the Board in amounts shown in the following table:—

PROOF OF FINANCIAL RESPONSIBILITY IN THE HANDS OF THE BOARD, DECEMBER 31, 1934.

1. Bonds of Surety Companies.....	\$704,408.00
2. Government bonds and other negotiable securities...	330,722.14
3. Cash.....	6,625.00
4. Other bonds.....	1,635.00
	\$1,043,390.14

Remarks:

This "bonding" of milk distributors has been considered a very important work of the Board and already it has had a very great stabilizing effect on the industry.

Previous to the enactment of this regulation, milk producers over the whole province had suffered very considerable losses every year when distributors to whom they shipped milk failed to pay for these supplies.

The large percentage of milk distributors have caused producers no loss, but there has been a sufficient number of cases where loss has come, that the "bonding" requirement became necessary.

Under present conditions the situation is improved chiefly along the following lines:—

1. No new milk distributor who purchases milk, may secure a license until he has deposited security for at least \$500.00.

This regulation prevents a person starting in the milk business until he has sufficient financial backing to give reasonable protection to farmers who supply him with milk.

2. All distributors now doing business cannot secure a license until they had deposited sufficient security to cover the milk purchased from farmers.

This regulation may gradually eliminate distribution businesses which are without the proper financial backing necessary to give reasonable protection to farmers

Milk Accounts Paid by the Milk Control Board:

During 1934 one milk distributor went into bankruptcy who had provided the Board with proof of financial responsibility, and in this particular case the Board had on hand for distribution to producers, over five thousand dollars (\$5,000.00).

Had this security not been on file the producers would have received very little, if any, payment for the milk they had delivered.

(3) APPROVAL OF AGREEMENTS ARRIVED AT BETWEEN PRODUCERS
AND DISTRIBUTORS

During the last few years practically every milk market in the Province has been subjected to milk wars and price cutting, to such an extent that prices paid to producers became so low that the quality of the milk supply was endangered.

Immediately after the appointment of the Milk Control Board, producers and distributors in the various markets of the Province began to take advantage of the powers given to the Board, and to arrange for more stabilized condition in their markets.

At meetings attended by milk producers and milk distributors for individual markets, agreements were arrived at which include clauses covering fair business practices and price schedules.

After an agreement is made it is submitted to the Board for approval. In every case when an agreement was being considered, the Board exercised every care to see that the interests of the consumers were safeguarded. In all, sixty-two agreements had been approved by the end of the year. The advantages to the producer from the operation of these agreements are chiefly as follows:—

1. Increase in price of from 15c. to 60c. per hundred pounds of milk delivered.
2. Establishment of a uniform system of purchasing milk in a market.
3. Elimination of "Boot-leg" milk.
4. Elimination of the danger of severe price fluctuations due to extreme price cutting.

Many of the agreements gave decided advantages to the milk producer without any increase in price to the consumer. In some cases, however, a slightly increased price to the consumer was considered necessary in order that the position of the producer might be improved. This was particularly true in those sections where producers were in very great need because of drought conditions or ridiculously low income.

It can be noted that in no case was an agreement approved which called for an increased price to the consumer unless the producer secured benefits equal to or greater than this price increase.

These agreements have resulted in reasonable stability in the markets concerned and uneconomic practices in the business have been reduced to a minimum at decided advantage to milk producers.

(4) THE HANDLING OF CERTAIN MISCELLANEOUS PROBLEMS THAT HAVE ARISEN

Almost daily the Board is called upon to study and to make recommendations regarding miscellaneous problems affecting the market milk industry and which problems cannot be solved by general regulations. Some of the more important of these which have received the Board's attention are here discussed individually.

(a) *Milk Price Wars:*

At various times during the season ridiculous price competition has resulted in so-called price-wars in the markets concerned, and the Board has been called upon to act as an arbitrator in settling these disputes. Most of the less important disputes have been settled between producers and distributors when an agreement had been arrived at between themselves, but in one case, that of the Hamilton market, the Board was required to arbitrate the dispute.

After very considerable study and effort the Board was able to end the disagreement and the decisions of the Board gave general satisfaction.

(b) *Prices for Hospital Milk:*

The ordinary agreement between producers and distributors usually was not sufficiently comprehensive to cover the question of milk supplies for public institutions and hospitals, and it was necessary for the Board to give this matter special consideration and study.

After consulting with producers, distributors and public officials, particularly interested in hospital management, the Board laid down a policy regarding the prices for milk supplied to hospitals, the main points of which policy are as follows:—

- (1) Hospitals are entitled to preferred treatment in the matter of milk requirements.
- (2) Hospitals are urged to use the regular channels of trade for their milk requirements.
- (3) Where milk is purchased directly from a producer-distributor, it was recommended that this milk be paid for on a basis of at least 10 per cent. above regular producers' prices delivered to dealers.

The above decisions clarified a number of contentious points in connection with prices of milk for hospital use.

(c) *Border Problems:*

Because of milk passing from one Province to another particularly on the Ontario-Quebec border, and with the milk business in both Provinces more or less under control, certain problems have arisen regarding the prices of inter-provincial shipments. This is particularly true in the Ottawa-Hull district, and in that section where milk goes from Ontario to Montreal. The Milk Control Board of Ontario and the Dairy Commission of the Province of Quebec have held certain conferences on the matter, and even though a complete uniformity of prices has not been arrived at, the situation in connection with the

Border problems has been considerably clarified. The Board would like to express its appreciation for the very helpful co-operation given to it by the Dairy Commission of the Province of Quebec. The Quebec Commission was ever ready to give any assistance it could to the Ontario Board.

(d) *Milk Trucking:*

The movement of milk by truck to the large consuming centres has introduced a large number of problems which have been given attention by the Board. Milk truckers have in many instances become milk salesmen and peddlers and their actions have done much to disrupt conditions in the larger markets, particularly in Toronto.

The duplication of trucking services in hauling milk has been one of the causes of low producer returns for milk.

The Ontario Milk Producers' Association has sent strong recommendations to the Board that the Board use its power to control milk truckers by means of a license. Up until the present time no decision has been arrived at regarding this matter. It merits further study.

In this connection great credit can be given to the Ontario Department of Highways for their effort to assist in solving this problem by giving very careful consideration to the licensing of milk truckers. The Department of Highways has worked very closely with the Board and the Dairy industry in this connection.

(e) *Regulation of Milk Producers from a Health Standpoint:*

Up until the present time no effort has been made by this Board to regulate the producers of milk, and this important matter has been left with the Local Health Authorities.

Strong representations have been made to the Board by both distributors and organized producers that the Board should take the responsibility for the inspection and regulation of producers from a health standpoint. This is a matter for further study by the Board.

(f) *Bottle Costs:*

One of the important expenses in milk distribution is the cost of bottles, and the high cost of bottle losses is given as one cause of high distribution costs.

The Board has given this matter considerable attention, but as yet have no conclusion to report.

Suggestions have been made to the Board that if milk bottles were charged for, much of this loss would disappear.

(g) *Duplication of Services:*

It is generally considered that there is an excessive duplication and overlapping of assembling, processing and distribution services in the marketing of milk throughout the Province, and it is generally felt that this overlapping of services places a great toll on both the producers of milk and the consumers of this very necessary food product.

This problem is receiving the serious attention of the Board but as yet no definite conclusions have been arrived at.

(h) *Efforts to Increase Sale of Milk:*

Any effort made to increase the use of milk could be justified from two important points of view:

(1) Increased use of milk would improve the general health of our population, particularly the children.

(2) Increased sales of milk would materially improve the condition of the farmer.

For these reasons the Board has given this important subject considerable attention and at the end of the year certain definite projects are being considered.

(i) *Other Problems:*

Other problems that have received the Board's attention deserve mention in this report:—

(1) Consideration of individual cases where producers were not paid for milk or where payments were made at dates much after the regular payment date.

(2) Consideration of cases where unjust amounts of milk were paid for on a surplus basis.

(3) Consideration of cases where producers have been cut off from a market without just cause.

(4) Consideration of cases where producers have been coerced into buying stock in a dairy in order to secure a market for their milk.

CONCLUSION

(a) *Summary of Achievements 1934:*

Even though the Milk Control Board of Ontario has been constituted less than one year, it can claim to have accomplished a number of things which are of benefit to the Market Milk Industry in Ontario:—

(1) It has in operation a fairly complete licensing system for all milk distributors.

(2) It has on deposit over one million dollars (\$1,000,000) of bonds and other securities as guarantees that producers who ship milk to milk distributors will be paid.

(3) It has approved marketing agreements in sixty-two major markets of the Province, which agreements have eliminated or minimized a number of the unethical practices which were to the detriment of both the producer and consumer of milk.

(4) The position of the milk producer has been substantially improved.

(b) *Some Objectives for 1935:*

The Milk Control Board of Ontario is now in the position that the first year of preliminary work is finished. With the preliminary investigations

reasonably complete and some work such as the licensing and bonding of milk distributors reduced to a routine, the Board can look forward to increased accomplishments during 1935.

Some of the objectives for the new year are as follows:—

- (1) A sufficient supply of high quality milk for the consumers in the urban centres of Ontario.
- (2) A close co-operation between Producers' and Distributors' Associations in all important markets.
- (3) Prompt payment of accounts due milk producers by distributors.
- (4) A close check on the accuracy of records of milk distributors.
- (5) A complete study of the costs of production and distribution of milk.

The Board is strongly of the opinion that it would be in the interest of the milk consumer and of the whole dairy industry if the following points were stressed:—

- (1) That everything possible should be done by the Board to co-operate to the fullest extent with the Department of Health and Local Boards of Health in any effort made to make certain that the cleanest and highest quality of milk possible is produced for the consumer's use.
- (2) The Board should endeavour to point out to producers of milk for fluid use that if their position regarding the price of their product is improved, they have the responsibility of doing everything they can to produce clean, safe milk and to bring to them the realization that the quality of their product directly affects the health of the citizens of the Province. The fact should also be pointed out to them that any improved quality of milk produced by them would go a long way towards increasing the consumption of milk.
- (3) The practice of thorough pasteurization of milk should be more widely adopted and enforced.
- (4) That there be more rigid inspection of dairies from a health standpoint, particularly in places where there is no attempt at pasteurization of the milk supply.

Finally it may be stated that the Board is fully aware of the fact that its responsibility is more than settling present disputes between producers and distributors and protecting farmers' interest. The Board realizes that in the final analysis whatever system of reorganization is adopted, it must be one which duly recognizes that the public interest is paramount and that there should be no combination to exploit the milk business at the expense of the consumer.

PART I — AGRICULTURAL STATISTICS

The improvement in agricultural conditions which commenced in the spring of 1933 continued during 1934. Although the volume of production was reduced during 1934 the rise in farm prices was of such magnitude that the total value of agricultural output showed a considerable gain over 1933.

The acreage sown to the principal field crops in Ontario declined from 9,194,900 acres to 9,000,000 acres, representing a reduction of 194,900 acres or 2.2% from the preceding year. Oats, barley, peas, fall rye, flax, buckwheat, corn, sugar beets, potatoes and mangolds showed an increase in acreage over 1933.

The area under fall wheat and hay and clover crops was reduced by the most extensive winter-killing in years. Other crops having a lesser acreage in 1934 than during the preceding year were mixed grains, dry beans and turnips.

The yield per acre of fall wheat, fall rye, buckwheat, dry beans, sugar beets, alfalfa and hay and clovers, was less than in 1933. Spring grains, fortunately, withstood the dry growing season much better than anticipated and yields per acre generally exceeded 1933, except in the southern part of Western Ontario where the summer drought was the most pronounced. Corn and roots benefited from excellent growing conditions during the latter part of the season and good crops were harvested. The total hay crop amounted to only 4,286,500 tons compared with 6,182,900 tons in 1933. The shortage of hay supplies was supplemented by heavy yields of corn and root crops and a surprising improvement in the condition of late pastures. Following heavy rains in late August and early September pastures quickly improved and hay supplies were conserved by the unusually late freeze-up which did not take place until the first week in December, permitting beef cattle to graze from five to seven weeks later than usual. Dairymen, however, in some counties found it necessary to purchase a greater supply of concentrates. Prices of most secondary products were not high enough to warrant the purchase of hay at prevailing quotations and farmers carried their stock through the winter by feeding increased quantities of straw, stooked corn, roughages and molasses.

The value of the production of principal field crops in Ontario in 1934 is placed at \$143,734,000 compared with a revised figure of \$135,813,000 for 1933, an increase of \$7,921,000 or 5.8%. The price per unit of all field crops except potatoes and sugar beets was higher. In the case of hay and clover, wheat, and beans, the increase was substantial. It must be borne in mind, however, that the value of the hay crop is estimated from the market price of the relatively small proportion of the entire crop which enters into commerce. The bulk of this crop is fed on farms, and the returns depend upon the price received for what we may term secondary products. In Ontario 70% of the net agricultural

income is derived from the sale of dairy products, live stock, and poultry and eggs. The prices of these products determine largely the economic position of Ontario farmers.

The price of cheese during the months of May to November averaged about one-third cents per pound under the corresponding price for the same months of 1933. The price of butter was 4 to 6 cents a pound higher in January, February, and March of 1934 than in 1933, but during the balance of the year prices averaged practically the same as a year ago. Producers of whole milk for human consumption benefited from a substantial rise. Toronto dairies in December, 1934 were paying producers \$2.10 per cwt. for milk delivered, as compared with \$1.81 at the beginning of December, 1933. The production of butter in Ontario for the year increased approximately 5% over the output in the preceding year. This increase was, however, at the expense of a reduction in the make of cheese which decreased by slightly more than 8% from 1933. The output of cheese has declined so steadily in recent years that some concern over the situation is expressed in many quarters.

The price trend in live stock was mixed. Bacon hogs, w.o.c. Toronto, rose from \$3.75 in January, 1933, to \$6.93 per cwt. in December, 1933. The advance continued in 1934 until a high of \$9.87 was reached at the beginning of March, but from this level the price fluctuated downward to around \$8.00 at the end of the year. The price of calves ranged from 75 cents to \$1.50 per cwt. higher during the first five months of this year over corresponding months of last year. The price fell rapidly in June and from July onward the price was practically the same to slightly better than in 1933. In the case of lambs, prices during the first half of the year were considerably stronger than in 1933, but after June 1st were very close to prices prevailing a year earlier. Prices of choice quality steers under 1,050 pounds were consistently better. The appreciation in price of choice steers above 1,050 pounds over the preceding year did not, however, range as great as for those under 1,050 pounds, and gradually diminished until during November prices were at the same level as in November, 1933.

All classes of live stock on farms in Ontario, according to our June Survey, showed decreases from the previous year. The total number of horses on June 1st, 1933, was 567,100 and on June 1st, 1934, the number reported was 563,700. Cattle holdings declined from 2,522,200 to 2,494,500; swine from 1,257,900 to 1,177,900; and sheep and lambs from 1,000,900 to 962,300.

Returns from poultry raising showed a slight improvement over the year 1933. The price of eggs averaged 3 cents per dozen higher during the first eleven months than during the same period last year. During the month of November, however, prices were about 7 cents per dozen less than a year ago on account of the milder weather and larger production in 1934 as compared with very cold weather and limited production during November, 1933.

Poultry prices showed practically no changes from last year and producers continued to receive discouraging returns. Exports of both eggs and dressed poultry practically doubled during the year. A development which deserves comment was the introduction during the past year of a Grade A1 egg packaged by commercial producers. This egg realized about 6 cents per dozen more than prevailing prices for Grade A eggs. The number of hens and chickens showed a small reduction from last year, with 21,729,400 reported on farms in 1933 and

21,567,000 in 1934. Both these years show a huge increase from a few years earlier. In 1920 the poultry population of the Province was 11,031,000.

The gross annual agricultural revenue of Ontario for the years 1930 to 1934 is set out in the table below. The estimates for 1934 are preliminary and subject to revision. No allowance has been made in these calculations for the portions of crops used for seed and in feeding of live stock. Because of these duplications the totals represent gross values:

GROSS ANNUAL AGRICULTURAL REVENUE
OF ONTARIO, 1930-1934

Totals 1934	9,000,000	143,756,000	15.97
" 1933	9,194,900	124,679,700	13.56

The acreages devoted to other crops in 1934 were as follows:—Orchards, 196,612; strawberries, 8,253; vineyards, 15,106; other small fruits, 13,126; summer fallow, 210,525; pasture (cleared), 2,908,275.

TOBACCO.—It is estimated that 32,300 acres of tobacco were grown in 1934, yielding 31,400,000 pounds, or 940 per acre. Of this, Elgin had 2,473 acres, Essex 4,826, Kent 5,130, Norfolk 17,068, and Oxford 2,561. Burley accounted for 6,740 acres, bright flue-cured 24,260 acres, and dark types 1,300 acres.

RAPE.—The estimate for 1934 was 14,988 acres of which 5,422 are in Wellington, 1,863 in Grey and 2,250 in Dufferin.

THE WEATHER

TEMPERATURE.—The following table gives the temperature of the Province for each month during the last five years, together with the mean annual temperature for the six months, April–September, practically the growing season, together with the average for the five years, 1930–1934, and fifty-three years, 1882–1934.

Months	1934	1933	1932	1931	1930	1930-1934	1882-1934
January.....	21.4	28.6	31.1	19.9	17.8	23.8	18.5
February.....	5.4	21.3	24.7	22.9	22.5	19.4	17.3
March.....	24.0	27.9	25.7	30.6	28.0	27.2	27.6
April.....	39.6	43.1	38.1	43.0	41.1	41.0	41.7
May.....	55.5	55.1	54.2	54.6	55.9	55.1	53.5
June.....	65.5	66.0	63.7	63.8	65.7	64.9	63.6
July.....	68.4	70.0	66.0	71.8	67.6	68.8	67.4
August.....	63.3	67.3	67.7	67.7	66.9	66.6	65.8
September.....	62.2	61.8	59.8	63.8	60.9	61.7	59.4
October.....	46.4	46.2	49.2	51.9	47.2	48.2	47.6

December.....	19.6	18.4	26.2	30.0	25.0	23.8	23.5
Annual Mean.....	42.6	44.5	44.9	47.0	44.8	44.7	43.4
Mean for six months April-September.....	59.0	60.5	58.3	60.8	59.7	59.7	58.6

The mean temperature for 1934 was 42.6 degrees or 1.9 degrees lower than preceding year, and 0.8 degree below the normal of the fifty-three years, 1882-1934.

The mean of the six months, April-September, was 59.0 or 1.5 degrees below preceding year and 0.4 degrees above the fifty-three year normal.

Six months were above normal and six below with November having the greatest departure above with 5.0 degrees, and February the greatest below with 11.9 degrees.

SUNSHINE.—In the following the averages of sunshine are derived from the records of the weather stations at Woodstock, Toronto, Lindsay, Kingston and Ottawa.

Months	Sun above horizon	1934	1933	1932	1931	1930	1930-1934	1882-1934

November.....	286.9	61.1	76.8	107.9	76.5	82.2	80.9	77.7
December.....	274.3	65.6	67.3	74.1	79.9	52.8	67.9	62.7
For year.....	4463.3	2003.6	1965.2	1932.4	1996.4	1921.6	1963.8	1941.6
For six months April-September.....	2614.9	1400.2	1367.4	1347.9	1366.4	1350.0	1366.4	1338.6

The year 1934 had 2,003.6 hours of sunshine, 62.0 hours more than the average for the last fifty-three years, the six growing months, April-September, had

1,400.2 hours or 61.6 more than the average. Seven months were above normal and five below. May had the greatest departure above with 73.5 hours and September the greatest below with 62.7 hours.

PRECIPITATION.—The fall of both rain and snow for the five winter months including November, 1933, and March, 1934, is given in the following table for five years, together with the average for the fifty-three years, 1882–1934. Ten inches of snow is equivalent to one inch of rain.

Months	1934	1933	1932	1931	1930	1930–1934	1882–1934
	in.	in.	in.	in.	in.	in.	in.
November, 1933:							
Rain	1.59	2.12	2.85	1.07	2.18	1.96	1.99
Snow	20.8	11.5	2.4	9.6	9.6	10.8	7.7
December, 1933:							
Rain	1.20	1.73	1.57	0.39	0.34	1.05	1.22
Snow	20.5	11.8	8.6	11.7	26.0	15.7	15.2
January, 1934:							
Rain	0.78	0.97	2.56	0.09	1.51	1.18	0.92
Snow	14.7	6.8	13.2	20.2	18.7	14.7	18.6
February, 1934:							
Rain	0.00	0.64	1.11	0.22	0.74	0.54	0.69
Snow	12.4	16.3	14.5	10.4	11.8	13.1	15.4
March, 1934:							
Rain	1.31	1.20	0.50	0.61	1.11	0.95	1.17
Snow	12.1	11.7	19.2	14.9	12.2	14.0	11.1
Five Months:							
Rain	4.88	6.66	8.59	2.38	5.88	5.68	5.99
Snow	80.5	58.1	57.9	66.8	78.3	68.3	68.0

The total amount of rainfall for the five months was 4.88 inches or 1.11 below the average for the fifty-three years, 1882–1934. The total amount of snowfall was 80.5 inches or 12.5 inches above normal.

The rainfall for the six months, April–September, comprising what is regarded as the growing season for most crops, is given in the following table covering the last five years, 1930–1934, and the normal for the fifty-three years, 1882–1934.

Months	1934	1933	1932	1931	1930	1930–1934	1882–1934
	in.	in.	in.	in.	in.	in.	in.
April	2.02	2.53	1.49	1.87	1.49	1.88	1.89
May	1.19	2.66	2.53	2.48	2.92	2.36	2.72
June	2.96	1.94	1.94	2.17	4.01	2.60	2.79
July	1.99	1.77	3.52	3.47	2.44	2.64	2.87
August	1.89	2.74	4.03	1.78	1.58	2.40	2.64
September	4.34	2.50	3.71	4.07	2.29	3.38	2.78
Total for six months . . .	14.39	14.14	17.22	15.84	14.73	15.26	15.69

The rainfall for the six months, April–September, was 14.39 inches or 0.25 inches above the preceding year, and in comparison with the fifty-three years 1.30 below. Three months were above average and three below. September with 1.56 above and May 1.53 below had the greatest departures during the growing season.

TEMPERATURES, 1934

York.....	9,668	6,080,709	9,271	5,642,851	10,229	6,321,346
Total:						
All occupations.....	32,639	38,045,494	32,161	35,224,863	31,829	32,600,918
Farmers as given.....	10,647	19,831,625	10,667	18,204,647	10,186	14,966,786
*Occupations not given.....	12,840	6,266,597	12,322	7,320,292	11,174	6,030,483

*A number of these may be "farmers." Nearly every clerk reports a number of instruments as unclassified as to occupation. Certain finance corporations have adopted the practice of filing chattel mortgages instead of liens on automobiles. This is very noticeable in Essex and Middlesex Counties (included in unclassified).

PART III.

Comparative Farm Statistics for
Fifty-Three Years — 1882-1934

STATISTICS OF FARM CROPS
FALL WHEAT AND SPRING WHEAT

The following table gives the area, produce and market value of fall wheat and spring wheat for the years 1882 to 1934, together with the annual averages for the various periods of ten years and the average for the fifty-three years.

Years	Fall Wheat				Spring Wheat			
	Acres	Bushels	Per acre	Market Value	Acres	Bushels	Per acre	Market value
				\$				\$

*Including Flax, 1918-1921.

No statistics of "mixed grains" were taken previous to 1907, when an acreage of 443,100 was estimated.

STATISTICS OF FARM CROPS

The following table gives the area in Cleared Pasture, Summer Fallow, Orchards and Small Fruits, for the years 1909 to 1934. Strawberries and Vineyard for the years 1925-1934.

Years	Pasture (cleared)	Summer fallow	Orchard	Small fruits	Straw- berries	Vineyard
	acres	acres	acres	acres	acres	acres
1934	2,908,275	210,525	196,612	13,126	8,253	15,106
1933	2,995,468	215,126	197,246	13,547	8,565	15,328
1932	3,012,529	221,696	203,794	14,059	8,719	15,189
1931	3,039,026	221,174	203,231	14,206	8,012	15,793
1930	3,149,460	247,067	212,232	12,376	7,286	11,586
1929	3,134,614	247,802	214,370	12,367	7,613	11,255
1928	3,000,172	211,015	207,003	12,733	7,773	8,855
1927	3,012,786	212,906	211,225	13,437	7,836	7,905

THIRTY-THIRD ANNUAL REPORT
OF THE
Temiskaming and Northern
Ontario Railway Commission

ONTARIO GOVERNMENT RAILWAY
Hon. Mitchell F. Hepburn—Premier

FOR THE YEAR ENDING OCTOBER 31st

1934

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO
SESSIONAL PAPER No. 23, 1935

ONTARIO

TORONTO

Printed and Published by T. E. Bowman, Printer to the King's Most Excellent Majesty, 1935.

TO THE HONOURABLE DR. H. A. BRUCE,
Lieutenant -Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

The undersigned has the honour to present to Your Honour the Thirty-third Annual Report of the Temiskaming and Northern Ontario Railway Commission, for the fiscal year ended October 31st, 1934.

Respectfully submitted,

M. F. HEPBURN
Prime Minister and President of the Council.

TEMISKAMING AND NORTHERN ONTARIO RAILWAY

A review of the results of operating the Railway during the fiscal year just closed, indicates that an upward trend has been reached. With passenger and freight receipts both showing an increase, the Railway is able to show an increase in Operating Revenue and Net Revenue as shown in the following brief comparative statement of the Railway's operations for 1933-34;

	1934	1933
Revenue—Transportation	\$3,401,325.25	\$2,962,415.53
Revenue—Incidental	340,241.03	275,809.07
	3,741,566.28	3,238,224.60
Increase 1934 (15.5%)		503,341.68
Expenditures—Operation	2,769,187.63	2,541,162.58
Increase 1934 (8.973%)		228,025.05
Income Account—Balance	726,731.40 Dr.	664,523.82 Dr.
Increase 1934 (9.36%)		62,207.58 Dr.
Net Results	245,647.25	32,538.20
Increase 1934	213,109.05	

An increase of \$503,341.68 (15.5%) is shown in Gross Receipts over the previous year with an increase of \$213,109.05 in Net Results compared with the preceding year.

The increase in number of passengers and tons of freight carried, is indicated in the following figures;

Total Passengers Carried	245,451	314,047
Increase 1934 (27.9%)	68,596	
Number of tons freight carried	823,946	930,433
Increase 1934 (12.9%)	106,487	

During the year under review Commission paid the sum of \$240,000.00 to provide for matured interest on its debenture bond issue of \$6,000,000.00 and \$326,164.39 being carrying charges on \$7,000,000.00 loan advanced by the Ontario Government on Investment account, making a total of \$566,164.39 interest for the year.

The Commission faces the new year with high optimism, confident that by putting into effect greater economies in the operation of the Railway, together with the continued increase in mining activities in the territory served by the Railway; the prospect of paper mills working at greater capacity, resulting in the increase in movement of pulpwood and other forest products and the ever increasing popularity of Northern Ontario with the Tourists, the results at the end of the year will show a decided increase in net earnings at the same time maintaining adequate train service to the public.

M. LANG,
Chairman.

Edwards, Morgan & Co.
Toronto, Ont.,

January 12th, 1935

The Commissioners,
Temiskaming and Northern Ontario Rly.,
North Bay, Ont.

Dear Sirs:

We have audited the accounts of the Treasurer of the Temiskaming and Northern Ontario Railway and the Nipissing Central Railway for the year ending October 31, 1934, and have satisfied ourselves that receipts have been properly accounted for, and that satisfactory vouchers are on hand to cover disbursements. We have checked the balances in the hands of the Treasurer and find them to be in agreement with the accounts as shown by the general ledgers.

The accounts of the Treasurer are in good order and well kept. All information asked for has been cheerfully given. We also wish to acknowledge the courtesies of the Commission and its employees at all times.

Yours very truly,

Signed EDWARDS, MORGAN & CO.

TEMISKAMING AND NORTHERN ONTARIO RAILWAY

Mileage operated at the close of the fiscal year 1934 was as follows:

Twenty-Ninth Annual Report

OF THE

ONTARIO MUNICIPAL
BOARD

To December 31st, 1934

PRESENTED TO THE LEGISLATIVE ASSEMBLY
BY COMMAND

SESSIONAL PAPER No. 24, 1935

TORONTO

Printed and Published by T. E. Bowman, Printer to the King's Most Excellent Majesty

1935

TO COLONEL, THE HONOURABLE HERBERT A. BRUCE,

Lieutenant-Governor of the Province of Ontario, in Council.

MAY IT PLEASE YOUR HONOR:

The undersigned has the honour to transmit herewith the Twenty-ninth Report of the Ontario Municipal Board for the year ending December 31st, 1934.

Respectfully submitted,

DAVID A. CROLL,

Minister of Municipal Affairs.

Parliament Buildings,

Toronto, March 25th, 1935.

March, 23rd, 1935.

Dear Sir:

I have the honour to send you herewith the Twenty-ninth Annual Report of The Ontario Municipal Board, to December 31st, 1934.

I have the honour to be,

Your obedient servant,

J. DOUGLAS PECK,

Secretary.

The Honourable the Minister of Municipal Affairs,
Parliament Building,
Toronto.

ORGANIZATION

The Organization of the Ontario municipal Board of the Province of Ontario is as follows:

C. R. McKEOWN, K.C.	<i>Chairman</i>
W. M. BRODIE,	<i>Vice-Chairman</i>
H. L. CUMMINGS,	<i>Commissioner</i>
J. DOUGLAS PECK,	<i>Secretary</i>
F. DAGGER,	<i>Supervisor of Telephone Systems</i>
J. A. McDONALD,	<i>Inspector of Telephone Service</i>

TWENTY-NINTH ANNUAL REPORT
OF THE
Ontario Municipal Board
To December 31st, 1934

In pursuance of Section 162 of the "The Ontario Municipal Board Act, 1932", The Ontario Municipal Board beg leave respectfully to submit their Twenty-ninth Annual Report.

SITTINGS OF THE BOARD

The Board held meetings for the transaction of routine business every juridical day throughout the year. The record of the sessions of the Board and an abstract of the proceedings, together with the Judgments and Opinions of the Board appear in the Appendix.

In this connection it should be stated that about 80 per cent. of the Board's work is not conducted at formal sessions of the Board shown in the abstract of proceedings above mentioned. This office work of the Board is transacted usually upon written applications and not in the way of formal hearing of parties interested. A classified abstract of the office work of the Board disposed of in the way of formal applications without formally hearing the parties, will be found in the Appendix. In addition to this there is the usual office work of considering and replying to inquiries and other routine correspondence. A short reference is hereafter made, under different subheadings, of the applications dealt with by the Board 'ex parte' or without a formal hearing of the parties interested.

APPLICATIONS TO THE BOARD

There were 497 formal applications made to the Board in 1934. Of the formal applications all those in which the parties were ready have been heard and disposed of, except in a few cases where adjournments were granted to the parties at the request of Counsel or in order to procure further evidence or to obtain reports from experts in connection with technical matters in question.

Some of the formal applications are still standing, as in the more important matters the parties interested are showing an increasing disposition to take advantage of the opportunities afforded them by the Board's rules for obtaining discovery and production, thus, to some extent, delaying the final dates of the hearing of the applications, but in reality facilitating the final disposition at the hearings of all the matters in question between the parties.

PROVINCIAL RAILWAYS

An alphabetical list (under the names of the railway systems affected) of applications to the Board during 1934, affecting Provincial Railways, is contained in the Appendix to this Report.

Extensions of and improvements to provincial Railways during 1934, as reported to the Board, will be found in the Appendix (arranged alphabetically) under the names of the several Systems reporting.

A tabulation (arranged alphabetically) of railways under the Board's jurisdiction will be found in the Appendix.

ANNEXATIONS OF TERRITORY

There were two applications made in 1934 by urban Municipalities for annexation of additional territory thereto. An alphabetical list of these annexation applications is contained in the Appendix.

VALIDATION OF MUNICIPAL DEBENTURES

(Part V. of Chapter 27, Ontario Statutes, 1932)

There were 59 applications in 1934 to the Board under the above legislation, involving debentures of a total value of \$5,273,656.93. Acting under the powers conferred by such legislation, the Board was able to grant relief in nearly all of these cases, included in which were thirty-four by-laws affected by irregularities which would otherwise have probably required special Acts of the Legislature to make the debentures thereunder valid and saleable.

Municipalities are showing an increasing disposition to have their by-laws and debentures validated under said Part V. even in the cases where no irregularities occur requiring the curative powers of the Board, as they have found that such validation facilitates the marketing of their debentures.

An alphabetical list of these applications filed in 1934 is given in the Appendix, and will be found indexed under the word "Validation".

FLOATING INDEBTEDNESS

(Section 78 (d) of Part V. Chapter 27, Ontario Statutes, 1932).

Since the coming into effect of this legislation on the 29th of March, 1932, seven Municipalities in 1932, twenty-three in 1933 and nineteen in 1934 have taken advantage of same and with few exceptions obtained Orders of the Board authorizing the issue of debentures to take care of their floating indebtedness, thereby saving considerable expense in the obtaining of special Acts of the Legislature which would otherwise have been necessary.

The total amount of such debentures authorized by the Board in 1934 was \$3,253,410.68. An alphabetical list of these applications will be found in the Appendix indexed under "Floating Indebtedness".

UNEMPLOYMENT RELIEF WORKS

(Section 4, subsection (2) of the Unemployment Relief Acts (Ontario), 1931 and 1932, and Section 8 of the Act of 1933).

Since the Unemployment Relief Acts came into force on the 2nd day of April, 1931, the 29th March, 1932, and the 18th April, 1933, respectively, the Board, in 1931, considered 74 applications involving debenture issues amounting to \$1,383,498; in 1932, 122 applications involving debenture issues amounting to \$3,085,644.84; in 1933, 27 applications involving debenture issues of \$4,594,002 for Unemployment Relief Works and 12 applications totalling \$2,432,437 for Direct Relief; and in 1934, 17 applications for Unemployment Relief Works involving a debenture issue of \$1,150,048 and 18 applications respecting Direct Relief with a debenture issue amounting to \$4,721,869.88.

ARBITRATIONS

In 1934 the Board officiated as arbitrators in respect of three applications which were made to it under "The Highway Improvement Act" and amendments. A list of these will be found in the Appendix, indexed under the word "Highways".

ASSESSMENT APPEALS

There were 31 assessment appeals to the Board during the year 1934. The assessed value of the property affected by these appeals was \$10,315 573.00.

ACCIDENTS

A tabulated summary of Accident Reports received by the Board from Provincial Railways during the year 1934 appears in the Appendix, and shows that 14 persons were killed and 907 injured during the year.

PLANS

(Land Subdivisions).

Under "The Planning and Development Act" (Chapter 236, R.S.O., 1927), "The Land Titles Act" (Chapter 158, R.S.O., 1927) Section 110, and "The Registry Act" (Chapter 155, R.S.O., 1927), Section 80, (subsections 14 and 18), the Board considered during the year 28 applications for approval of plans, deeds of conveyance, etc. An alphabetical list of the owners of property in question in these applications will be found in the Appendix.

EXTENSION OF MUNICIPAL UTILITIES, &c.

(Section 399 (2) of "The Municipal Act").

An alphabetical tabulation (under the names of the Municipalities) of extensions to public utilities made by Municipalities and approved by the Board under the above subsection (2) will be found in the Appendix, and is indexed under the word "Approval".

The total of the debenture issue under these By-laws approved in 1934 amounts to \$1,644,424.01.

TRUCK LICENCES AND PUBLIC COMMERCIAL VEHICLE LICENSES

In or about 1933 it became quite apparent that truck licenses were being granted by the Department of Highways in excess of the public demand, and as a result a policy was adopted to grant only such licenses in the future as the service of the public required. The result of this policy was that every application for truck license or for a bus license must be enquired into specially, to ascertain whether or not there was a public service to be rendered by the granting of the license requested.

That the granting of licenses might be taken entirely out of politics, and inasmuch as the Ontario Municipal Board was probably better equipped than any other Board connected with the Government to make the necessary enquiry, the Legislature passed an Act, being Chapter 49 of the Statutes of Ontario for the year 1933, directing that every application for a bus or truck license should be referred to the Ontario Municipal Board, and upon enquiry by the Board as to whether or not there is a necessity and convenience to the general public, the said Board may grant or refuse a Certificate. If the Certificate be granted the Department of Highways can then, in its discretion, issue the license applied for.

This new and additional work given to the Ontario Municipal Board required that two days a month should be set aside for the consideration of the applications sent in, and accordingly the first and third Mondays of each month are taken up by the Board in connection therewith.

During the year 1934 the Board heard 100 applications for bus licenses and 1442 applications for Public Commercial Vehicle licenses.

In pressing an application before the Board the applicant may appear either personally or by his Solicitor, or, if unable to appear in person, may send to the Board such information as he thinks will entitle him to the Certificate asked for, and the Board endeavors, to the best of its ability, to get at the facts of each particular application, and, taking into consideration only the necessity and convenience of service to the general public, to decide accordingly.

SUPERVISED MUNICIPALITIES

(Chapter 27, Ontario Statutes, 1932). (Part VI)

Since the enactment of this legislation Twenty-six Municipalities have taken advantage of same and, on application to the Board, have been made subject to the provisions thereof. The control and management of the financial affairs of twenty-four such Municipalities were vested in Committees of Supervisors, and in respect to the other two the provisions of the Act were invoked as to Stay of Proceedings.

PUBLIC UTILITIES

Applications respecting Public Utilities will be found in the Appendix, indexed under the names of the Parties thereto.

FORMS

The Board has, (for distribution to parties interested) the following forms and specifications, namely:—

- (1) The Board's Rules of Practice and Procedure and Practice Forms.
- (2) Regulations, Specifications and Forms respecting Railways.
- (3) Standard Specifications for Bridges, Viaducts, Trestles or other structures.
- (4) Forms under "The Planning and Development Act", with directions for guidance of applicants thereunder.
- (5) Forms for submission of a By-law or question to a poll, under "The Municipal Act".
- (6) Form for Money By-law.
- (7) Forms of affidavits in support of applications under Part V. of "The Ontario Municipal Act, 1932".
- (8) Preliminary Resolution under Section 8 of "The Local Improvement Act".
- (9) Forms for Annual Reports by Railway Systems.
- (10) Forms for Reports as to Examination of Motormen.
- (11) Forms for Reports of Accidents by Railway Systems.
- (12) Directions for guidance of applicants under Subsection (2) of Section 399 of "The Municipal Act".
- (13) Tariff of the Board's Fees.
- (14) Memorandum respecting approval of By-laws under "The Unemployment Relief Act (Ontario).
- (15) "The Telephone Act".
- (16) Pamphlet containing information regarding Provincial Telephone Systems, and including
 - (a) Specifications for construction and equipment of telephone systems;
 - (b) Form of By-law providing for the establishment of a telephone system under Part II of "The Telephone Act";
 - (c) Form of By-law providing for the issue of debentures to pay for the cost of establishing a telephone system under Part II of "The Telephone Act";
 - (d) Form of By-law to regulate the management and operation of a telephone system established under Part II of "The Telephone Act";
 - (e) Form of Annual Report to be furnished to the subscribers to a telephone system established under Part II of "The Telephone Act";
 - (f) Sample form of Annual Report and Balance Sheet for Telephone Companies;

- (g) Form of Account for use by Telephone Companies using the "Discount System of Collections";
- (h) Form of Municipal Debenture—Instalment Plan;
- (i) Form of Constitution and By-laws for a Telephone Company;
- (17) Forms of Petition praying for the establishment or extension of a Telephone System, under Part II of "The Telephone Act".
- (18) Forms of By-laws granting to a Telephone Company the right to use the highways of a Township.
- (19) Regulations and specifications for telephone or telegraph wires crossing railways.
- (20) Form for Return by Municipality operating a Telephone System.
- (21) Form for Return by Company, etc., operating a Telephone System.
- (22) Form for Tariff of Tolls for Telephone System.

MISCELLANEOUS MATTERS UNDER THE BOARD'S JURISDICTION

A classified analysis of miscellaneous matters dealt with in 1934, under the jurisdiction of the Board, will be found in the Appendix. These include Annexations under "The Municipal Act"; Arbitrations; Assessment Appeals under Section 83 of "The Assessment Act"; Audit of Affairs of a Municipality; Extension of Debenture Issue Period, under Section 296 (11) and (12) of "The Municipal Act"; Floating Indebtedness, authority to Municipalities to issue debentures to pay, under section 78 (d) of Chapter 27, Ontario Statutes, 1932; Highways (County), abandonment of part of—Section 457 of "The Municipal Act"; Highways, Department of, Claims against—Applications under Section 77*a* of "The Highway Improvement Act"; Highways (Narrow) approved under Section 490 (2) of "The Municipal Act"; Increased borrowings by Municipal Councils—Section 334 (7) of "The Municipal Act" as re-enacted by section 10 (2), Chapter 37, Ontario Statutes, 1933; Interest Increase and Interest Decrease By-laws, approved under Section 300 of "The Municipal Act"; Lane, Claim for reduction or exemption of assessment of properties for opening of, Section 27*a* of "The Local Improvement Act" as re-enacted by Section 2, Chapter 26, Ontario Statutes, 1933; Lanes, opening and paving of, Section 27*a* of "The Local Improvement Act" as re-enacted by Section 3, Chapter 26, Ontario Statutes, 1933; Legislation (Special), approval of By-laws under, &c.; Local Improvements, Petitions against, under Section 9 of "The Local Improvement Act"; Local Improvements, approval of the passing of Construction By-laws therefor, under section 8 of "The Local Improvement Act" as re-enacted by Section 2 of "The Local Improvement Amendment Act, 1932" (Chapter 30); Local Improvements, abandonment of part of work, under Section 18 of "The Local Improvement Act"; Apportionment of cost of Local Improvement Work, approval of By-laws, under Section 26 (3) of "The Local Improvement Act"; "The Ontario Municipal Board Act 1932" (Chapter 27), Approval of By-laws under Sections 78 (*b*) and (*c*) and 103; "The Power Commission Act", Section 24, (Chapter 57, R.S.O., 1927, as enacted by Chapter 13, Section 3, Ontario Statutes, 1931), respecting Public Utilities; Repeal of Money By-laws as to residue

not raised, Section 301 (2) of "The Municipal Act"; Restrictions as to use of land or buildings, etc., approval of, under Section 398 of "The Municipal Act"; Sinking Funds, approval of By-laws for investment of, under Section 317 of "The Municipal Act"; Supervised Municipalities, under Part VI of Chapter 27, Ontario Statutes, 1932; Tax Rate, approval of further debt, etc., under Section 306 (2) of "The Municipal Act"; The Unemployment Relief Acts (Ontario), 1931, 1932 and 1933; Waterworks,—approval of Extensions to Water Areas; Weigh Scales and Weighing of Coal, etc.—Section 400 (11) of "The Municipal Act"; and works ordered by the Dominion Railway Board,—approval of By-laws for, under Section 297 (2) (f) of "The Municipal Act".

J. DOUGLAS PECK,
Secretary.

REPORT OF THE SUPERVISOR OF TELEPHONE SYSTEMS
FOR THE YEAR 1934.

The following applications under the provisions of "The Telephone Act" were dealt with by the Board in 1934.

Under Section 24:	For the approval of municipal debenture by-laws to meet the cost of establishing or extending telephone systems	3
Under Section 31:	For approval of the purchase of an existing telephone system by a municipality, or any portion thereof	2
Under Section 52:	For an Order approving appointment of Commissioners to fill vacancy	1
Under Section 57:	For the approval of the by-laws of a municipal telephone system	1
Under Section 58:	For authority to transfer control from Commissioners to Municipal Council	1
Under Section 59:	For an Order prescribing the date for holding the annual meeting of subscribers	10
Under Section 80:	For the approval of municipal by-laws granting the right to erect poles and wires upon the highways	11
Under Section 88:	For the approval of by-laws of a telephone company	10
Under Section 94:	For an Order preventing the duplication of pole leads upon the same highway	1
Under Section 97:	For the approval of agreements providing for interchange of service	8
Under Section 102:	For the approval of the sale of telephone systems	1
Under Section 104:	For the approval of charges for telephone service	47
Under Section 105:	For authority to furnish free telephone service	2
Under Section 109:	For an Order re maintenance of reserve for depreciation	6
Under Section 110:	For authority to expend a portion of the moneys set aside for depreciation upon new construction or extensions or in the purchase of securities	8
Under Section 123:	For an Order directing an audit to be made of books and accounts of Municipal Telephone Systems	3
Under Section 127:	For the approval of by-laws regulating the management of Municipal Telephone Systems	1
	Total number of applications	116

The continued policy of the Board in endeavouring to secure an amicable settlement of matters indispute between the applicant and respondent has, with the assistance of the Board's Supervisor proved successful in the majority of such cases.

In addition to the applications and complaints referred to, a vast amount of correspondence relating to telephone matters has been dealt with by the Board's Supervisor, through the medium of which much information and assistance has been given to municipalities, companies and other persons interested, and many difficulties which might otherwise have necessitated a formal application and public hearing have been satisfactorily adjusted.

A number of points were visited by the Board's Inspector of Telephone Service during the year for the purpose of investigating complaints made by subscribers, and upon his report and recommendation the Board has been enabled to secure considerable improvement in the telephone service furnished by the systems coming under his observation.

The following change in the ownership of telephone systems was made during the year.

W. H. Taylor purchased from William Gillies, Lions Head, the system operating as The Gillies Telephone System comprising 262 telephones.

There was a decrease in the number of telephones in service of only five as compared with a loss of 4,779 stations in 1933 and 6,005 in 1932. Statistics furnished by The Bell Telephone Company of Canada show the total number of telephones on December 31st, 1934 to be 546,743 an increase of 2,859 as compared with a loss of 31,957 in the previous year.

The number of telephone systems within the jurisdiction of Ontario of which the Board has record is 606 operating 103,153 telephones, 33,987 miles of pole lead carrying 186,627 miles of wire and representing an investment of approximately \$10,250,318.

There are eleven systems owned and operated by municipalities under the provisions of Part I of the Act, viz: the Cities of Fort William and Port Arthur, the Towns of Cochrane, Dryden, Fort Frances, Kenora, Keewatin and Rainy River, and the Townships of Alberton, Caledon and Hilliard.

One hundred and twenty-one systems are now established and operating under Part II of the Act and furnishing service in two hundred and seventy six towns, villages and townships.

In addition to the before-mentioned systems the Forestry Branch of the Department of Lands and Forests is operating an extensive system in connection with its work of fire prevention. This system comprises 641 telephone stations, 2525 miles of pole lead and tree attachments and 4989 miles of wire, the total investment being \$305,340.

Detailed statistics and other information relative to these systems will be found in the appendix to this report, entitled "Telephone Systems, 1935".

FRANCIS DAGGER,
Supervisor of Telephone Systems.

PROCEDURE FILE A-3485

Application by the Township of York, under Section 11 of "The Township of York Act, 1931, (Chapter 134), for approval of its By-law No. 10869—Governing the location of buildings on Vaughan Road.

October 10th Notice of Motion for Order rescinding the above By-law 10869, filed: returnable October 12th, 1934, at 10.30 A.M., at the Board's Chambers.

October 12th Hearing, 10.30 to 11.30 A.M. Motion adjourned 'sine die'.

PROCEDURE FILE A-4713

In the matter of "The Northern Development Act", and "The Public Works Act", and

In the matter of the Claim of Thomas Archibald Bebee against the Department of Northern Development of the Province of Ontario, for compensation in respect to certain lands expropriated in the Township of West Ferris, for the purpose of the Trans-Canada Highway in the Pembroke-North Bay Section.

January 26th Draft Order filed (by the Department of Northern Development).

January 27th Order issued.

14th December, 1933

ORDER

Having heard the evidence in this arbitration adduced and after having heard counsel for the Department of Northern Development and counsel for the claimant, it is by this Board ordered that the sum of Five hundred (\$500.00) be paid to the claimant for his full claim and One hundred dollars (\$100.00) to be paid for costs and that the claimant be further allowed interest at the rate of five per cent. (5%) per annum upon the said sum of Five hundred dollars (\$500.00) from the date of the expropriation until the date of the arbitration, namely, 14th day of December, 1933.

(Sgd.) C. R. McKEOWN,

Chairman.

(Seal)

PROCEDURE FILE A-4765

BETWEEN:

Canadian International Paper Company,

Appellant,

--and--

The Corporation of the Town of Hawkesbury,

Respondent.

—ASSESSMENT APPEAL—

(Mill Property—\$818,880.00).

Jan. 22nd. Judgment delivered — Appeal dismissed with costs on Supreme Court Scale, to be paid by Appellant forthwith after taxation.

Jan. 31st. Approved draft Order filed.

Jan. 31st. Order issued.

IN THE MATTER of an Appeal from the Judgment of His Honour, Judge Constantineau, Judge of the County Court of the United Counties of Prescott and Russell.

BETWEEN:

Canadian International Paper Company,

Appellant,

—and—

The Municipal Corporation of the Town of Hawkesbury,

Respondent.

(ASSESSMENT APPEAL)

A. W. Greene, K.C., appeared for the Appellant.

T. A. Beament, K.C., appeared for the Respondent.

J U D G M E N T.

The Appellant, the Canadian International Paper Company, with head office in the City of Montreal, in the Province of Quebec, is, with the International Paper Company (of the United States), the owner of large pulp and paper plants in different parts of Canada and the United States, and as regards the present appeal, the Appellant is the owner of a large pulp mill in the Town of Hawkesbury, in the County of Prescott.

This said mill, with a daily capacity of about one hundred and fifty tons, consists of large number of buildings covering some twenty-four acres of land in the Town of Hawkesbury, and while owned by the Appellant in conjunction with other plants, is worked and used by the said Appellant as a separate unit for the manufacture of pulp.

For a number of years in the Town of Hawkesbury the Appellant or its predecessor had a fixed assessment, and the term of that fixed assessment having expired, the Appellant for some time past has been paying on an assessment presumably made in accordance with "The Assessment Act".

While the Hawkesbury Mill is composed of some fifty or more different buildings, most of which are undoubtedly assessable, some of which may be or may not be assessable, and there are others which the corporation is not asking to have assessed to the Appellant. The Assessor instead of assessing the particular buildings which he considered properly assessable on their several assessment values, has assessed the land and plant practically en bloc, the twenty-four acres of land owned by the Appellant being assessed for \$15,550, and the fifty or more buildings, and what might be called taxable equipment, at \$496,250, making a total assessment of \$511,800, to which of course must be added the business assessment of \$307,080, making a total assessment of \$818,880. To the course thus pursued by the Assessor the Appellant has apparently never objected heretofore.

Against the amount of this assessment the Appellant appealed to the Court of Revision for the Town of Hawkesbury, and from the Court of Revision to His Honour the County Judge of the United Counties of Prescott and Russell. On the 29th day of July, 1933, His Honour Judge Constantineau, delivered the following judgment:

"This appeal having come on for hearing before me on the 26th day of July, 1933, at the Town Hall, at the Town of Hawkesbury, pursuant to my appointment, and the parties having produced before me a written agreement bearing date the 20th of July, 1933, duly signed by their respective solicitors, whereby they agree and consent to a dismissal of this appeal with costs.

It is therefore this day adjudged that this appeal be and the same is hereby dismissed with costs.

Dated the 29th day of July, 1933.

(Sgd.) A. CONSTANTINEAU,
Judge"

From this judgment the Appellant, by Notice of Appeal dated the 18th day of August, 1933, appealed to this Board and, pursuant to appointment, the Board sat at Ottawa on the 16th and 17th of November, the 30th of November, the 1st of December, and the 27th, 28th and 29th days of December, 1933, and heard the appeal.

The decision of His Honour Judge Constantineau, appealed from herein, having been given by consent of the parties, and it not appearing in the Judgment itself that there was any reservation in connection with that consent, the question might have arisen as to whether or not an appeal could be taken from this decision, but inasmuch as the arrangement for the said dismissal by consent reserved to the Appellant the right to appeal to this Board, as evidenced by the correspondence between the Parties, that question was not raised by the Respondent or gone into, and the appeal against the assessment was heard on its merits.

By reason of the assessment having been made by the Assessor en bloc it became necessary for the Board to hear evidence as to the different buildings said to be assessable, as to whether or not they were properly assessable against the Appellant, and as to the proper value or amount at which the assessment for each particular building should be fixed.

The Respondent filed with the Board as Exhibit No. 11, a tabulation of the valuation of the buildings, and a tabulation of the valuation of assessable equipment so called, thereby enabling the Board to consider each particular item separately, and arrive at a decision in connection therewith.

The Appellant accepted Exhibit No. 11 as a true statement of its buildings and equipment, with the exception of Items Nos. 52 and 53 of the buildings, and Items (f) and (g) of the equipment, but did not accept the valuation of the several buildings and equipment therein mentioned, nor did they admit that all of these were properly assessable.

Since the hearing of the appeal Counsel for the Respondent has filed with the Board a letter withdrawing from the items mentioned in Exhibit No. 11:

Item No. 52, Sub Station	\$ 2,170
Item No. 53, Electric Boiler Room	11,580
Item No. F. Sub Station, High Tension Equipment	11,360
Item No. G. Sub Station, Low Tension Equipment	29,160

the reason assigned being that the above mentioned buildings and equipment are not in reality the property of the Appellant, and accordingly the Board has disregarded these items in arriving at a decision.

Items Nos. 14 and 15, being Blowpits, were contended by the Appellant to be non-assessable, as being machinery used in the process of manufacture of pulp, or if not machinery then chattels not attached to the realty and therefore not assessable. The Board, however, is of the opinion that these Blowpits are properly assessable, and cannot be classed in the category of fixed machinery or chattels.

Item No. 32, designated as a "Bleachery", has in it what are called "Bellmers", of very heavy construction, but which Bellmers are admitted by Counsel for the Respondent to be non-assessable. In considering Item No. 32, therefore, the Bellmers are excluded.

Items Nos. 30-A, 30-C and 30-D, referred to as "Acid Towers", "Acid Tanks Concrete", and "Acid Tanks Wood", were, it was argued by Counsel for the Appellant, non-assessable as being machinery used in the process of manufacture of the pulp, but the Board concludes that these several items do not pass under the definition of a machine, and are properly assessable.

Items Nos. 54, 55 and 56 are by the Board held to be assessable.

In connection with the assessable equipment:

Item (b), the Mill Water Supply

Item (c), the Fire Protection System and Pumps

Item (d), Sanitary and Mill Sewers

the Board is of opinion that they are assessable.

Item (e), being the Steel Trestle used to carry part of the machinery of the Appellant, is a structure about which there might be some doubt as to its assessability, and without making any finding as to this item, and for the purpose of this appeal only, the value of that steel structure has not been included by the Board as part of the assessable plant and equipment.

Item (i), Steam Electric Turbo-Generator, was objected to by Counsel for the Appellant, he contending that it was not in use, of no value to the Appellant, and should not be assessed in any way. The Board, however, is of the opinion that while it is not in operating use it is in the possession of the Appellant and may be used by it, and is therefore assessable.

Items (j) (k) (m) (n) (o) are all thought to be assessable by the Board.

Item (1), about which there was some discussion, is omitted by the Board in its calculation of the amount of assessable equipment.

As to Items (n) and (o), being the New and the Old Digester-Room equipment, there was much discussion, the Appellant contending that these large structures were

machinery used in the process of manufacture. These Digesters are large concrete receptacles, some fifty or more feet in height, into which is poured the chips and the acid and other ingredients required for the conversion of the chips into pulp. There is no motion in the Digester itself, nor in any contrivance within the Digester other than the motion of the chips and acids, etc., while being processed into pulp, and therefore the Board cannot find that these Digesters are machinery. By reason of their great weight they were constructed to rest either on the ground as a building separate, or upon steel or concrete pillars three or four feet above the ground, some times bolted at the side for bracing purposes, and some times resting there from their sheer weight, but in any event the Board is of the opinion that these Digesters are assessable.

The Appellant argued, and much evidence was offered, to establish that the several buildings were worth nothing by reason of their age, obsolescence, and broken down condition. They could not be sold to any concern wishing to set up a pulp mill, and that the best course to pursue would be to pull them down, and if thought desirable, erect new buildings. Their location, the one building to the other, was said to be bad, having been constructed from time to time as the Company saw fit to erect here or there a new building.

It was further contended by the Appellant that, while the buildings and equipment were of no value for purposes of sale, they were likewise of no value to the Appellant itself, as no profit was being made by it in connection with the use of them.

But Counsel for the Respondent having asked for production of the books of the Appellant, to ascertain whether or not the operations at the Hawkesbury Mill had been profitable or otherwise as contended, and the Appellant being unwilling to produce such books, and admitting the justice of the request, preferred to abandon any contention that for purposes of assessment the plant as a whole had no value because of unprofitable operations, and asked permission to reopen its case and put in further evidence as to the physical value of the buildings and assessable equipment, which permission was granted on consent of counsel for the Respondent.

The Appellant took the position that a building having been erected in a given year was subject to depreciation of a certain percentage per annum, and that in accordance with the number of years the building had been erected, the depreciation should be figured upon the percentage set out in certain depreciation tables set forth by text book writers, some of which were submitted to the Board, and that the depreciated value of the building be arrived at accordingly. For example, Item No. 1, being the Office, had, so contended the Appellant, fifty years of life at the time of construction, and that the replacement depreciation should be calculated at the rate of 2% per year. The building having been erected in 1912, and having been in existence twenty years in 1932, the 2% depreciation rate would mean that the building was depreciated to the extent of 40%, and that if the replacement cost was \$6,000 as suggested by the Appellant, the proper depreciated value would be 60% of \$6,000 or \$3,600.

The evidence offered by the Respondent, however, was from a different viewpoint, and while acknowledging the possibility of the rate of depreciation being fixed at a certain percentage each year looking forward, this had to be considered

when looking backward in connection with the renewals and repairs made to the building from year to year, and what the proper method of getting at the actual depreciated value is to look at the building itself as it now exists, comparing it with a new building, and value it as its condition and worth would compare with the cost of its replacement by a new building; for instance the Office, Item No. 1 above referred to, is by the Respondent put in at a replacement cost of \$6,385, and looking at the old building that is there now, its present condition and state of repair, its past history and probably life in the future, and its future usefulness, the Respondent says that the correct present depreciated value is \$4,790, and not as contended by the Appellant. The fact that renewals and repairs have been undertaken, so that the building has been kept in a good condition, is an essential element to be considered in arriving at present value, and any theoretical basis for depreciation is at fault if such fact is not taken into account.

The Board accepts the practical basis of valuation adopted by the Respondent for the purpose of arriving at the value for assessment of the Appellant's Mill and is of opinion that the correct value hereof cannot be arrived at by taking the depreciated value as being in accordance with any theoretical basis calculated upon an arbitrarily set percentage per year.

The Schedule hereunder written sets forth the assessable value placed upon the buildings, plant and equipment by the Board for the purpose of determining the amount at which the Appellant should be assessed.

S U M M A R Y

Value of Assessable Buildings	\$399,892.00
Value of Assessable Equipment	389,750.00
Value of Land	15,550.00
Total	\$805,192.00

The above is the value of the land, buildings and equipment as set out by the evidence of the Respondent, and as found by the Board to be the true value of the individual buildings and equipment and land.

The Board, however, realizes that while this may be the value of the individual buildings the plant must be taken into consideration as a whole, as many of the buildings would be worthless for any purpose whatsoever unless taken in conjunction with the other buildings to constitute the plant in question.

The full value, therefore, of \$805,192.00, as set out in the above Schedule, cannot be considered as the actual assessable value of the plant, but is only an item in assisting the Board to arrive at the figure at which the said property might well be assessed.

The assessment as fixed by the Assessor for the buildings and equipment, amounting to \$496,250, and for the land \$15,550, making a total of \$511,800, and taking into consideration the Schedule as above set out, the evidence offered by the Appellant, and the evidence offered by the Respondent, the Board is unable to say that the assessment fixed by the Assessor is too high, and this appeal is therefore dismissed with costs on the Supreme Court scale, to be paid by the Appellant to the Respondent forthwith after taxation.

Dated at Toronto the 22nd Day of January, A.D., 1934.

ORDER

22nd. Jan. 1934

UPON THE APPLICATION of the above-named Appellant to this Board at Ottawa upon the 16th, 17th and 30th days of November and the 1st, 27th, 28th and 29th days of December, 1933, by way of appeal from the Judgment of His Honour Judge Constantineau, Judge of the County Court of the United Counties of Prescott and Russell, dated the 29th day of July, 1933, dismissing the appeal of the Appellant from the Court of Revision of the Town of Hawkesbury, in the presence of Counsel for both parties, upon hearing the evidence adduced and what was alleged by Counsel aforesaid, and this Board being pleased to direct that the appeal stand over for judgment and determination and the same coming on this day for judgment and determination,

1. THIS BOARD ORDERS that the appeal of the above-named Appellant be and the same is hereby dismissed.

2. AND THIS BOARD DOTH FURTHER ORDER that the Appellant do pay unto the Respondent its costs of and incidental to the Appeal to this Board upon the scale applicable to the trial of actions in the Supreme Court of Ontario forthwith after taxation thereof.

Order signed this 31st day of January, 1934.

(Sgd.) C.R. McKEOWN,

(Seal)

Chairman.

In the matter of the Application of the Corporation of the City of St. Catharines, under section 8 of "The Local Improvement Act" as re-enacted by section 2 of "The Local Improvement Amendment Act, 1932", for approval of the undertaking of the construction of an asphalt pavement on Trafalgar Street, from Yates Street to Ontario Street, pursuant to Notice of Intention dated June 15th, 1934, and the passing of a By-law therefor, AND IN THE MATTER OF the Objection of A. A. Widdicombe and others thereto.

July 3rd Application and material filed.

July 3rd Objection by A. D. Widdicombe—for indefinite postponement of the work.

July 27th Hearing, pursuant to Appointment — Council Chamber, St. Catharines—(Mr. Commissioner Cummings authorized under section 17, Chapter 27, Ontario Statutes, 1932).

PROCEDURE FILE A-4787

In the matter of "The Municipal Act", (R.S.O., 1927, Chapter 233), Section 20, and in the matter of the Petition of the H. J. Heinz Company, of the Town of Leamington, in the County of Essex, and Province of Ontario, for annexation of part of Lots Numbers six (6) and seven (7) in the First Concession of the Township of Mersea, in the County of Essex, to the Corporation of the Town of Leamington.

June 27th Approved draft Order filed.

June 28th Order issued.

19th December, 1933

ORDER

Upon the Application of the said Petitioner, being all the Municipal Electors in that part of the Township of Mersea proposed to be annexed, upon reading the said Petition, and the affidavit of William Elmer Selkirk as to service of Notice of Petition and Resolution of the Council of the Corporation of the Town of Leamington upon the Clerk of the Corporation of the Township Mersea, and certified copy of the Resolution of the Council of the Corporation of the Town of Leamington declaring it expedient to annex the lands hereinafter described; And this application having been heard by the Board this day, upon due Notice to all Parties affected.

The Board Orders and Directs that part of Lot six (6) and seven (7) in the First Concession of the Township of Mersea in the County of Essex and Province of Ontario, and more particularly described as follows:—

"Parcel '1'—Commencing at the intersection of the west boundary of the Town of Leamington on said Lot Number six (6) with the south side of the Leamington and St. Clair Railway lands on said lot; thence south in said boundary one hundred and sixty-eight (168) feet; thence west parallel to the North boundary of said lot five hundred and seventy-six (576) feet to the west boundary of that part of said

lot owned by Louisa Todrew; Thence in this last mentioned boundary one hundred and eighty-one (181) feet to the south side of the said railway lands; thence south-east and east in the south side of said railway lands five hundred and seventy-eight (578) feet to the place of beginning; containing by admeasurement $2 \frac{23}{100}$ acres.

"Parcel '2'"—Commencing at a point in the west boundary of the Town of Leamington on said lot six (6) at the distance of one hundred and sixty-eight (168) feet south from the south side of the Leamington and St. Clair Railways lands on said lot; thence west parallel to the north limit of said lot five hundred and twenty-six (526) feet; thence south parallel to said boundary of said town one hundred and seventy-eight (178) feet more or less to a line drawn west at right angles to the west limit of Erie Street in said Town, from a point in said limit of said street which is six chains south of the northeast angle of the original Lot six (6). thence east in this last mentioned line five hundred and twenty-six (526) feet, more or less, to the said boundary of said Town; thence north in said last mentioned boundary one hundred and seventy-eight (178) feet, more or less to the place of beginning, containing by admeasurement ninety-three thousand six hundred and twenty-eight (93628) feet, be the same more or less.

"Parcel '3'"—Commencing at the southwest corner of the land conveyed by the said Grantor to the Grantee by deed dated the 15th of March, 1913, and being the thirdly described parcel in the said deed, and which said point is six (6) chains south measured in a line with the east limit of the lot from the north limit of the lot and is five hundred and twenty-six (526) feet west from the west boundary of the Town of Leamington measured in a line with the north limit of the said lot; thence west parallel to the north limit of the lot fifty (50) feet, more or less to the western boundary of the lands of the Grantor in the said lot; thence north in the westerly limits of the lands of the Grantor one hundred and seventy-eight (178) feet to the lands of the Grantee; thence east parallel to the north limit of the said lot fifty feet (50) more or less to the northwesterly limit of the lands sold by the Grantor to the Grantee, by deed of the 15th of March, 1913, and being the thirdly described parcel therein; thence southerly along the westerly limits of the lands lastly herein referred to one hundred and seventy-eight (178) feet more or less to the place of beginning.

"Parcel '4'"—Lots Number 104-105-106-107-108-109-110, according to registered Plan Number 751, which said plan is a sub-division of part of the north east part of Lot Number six (6) in the first Concession of the Township of Mersea.

"Parcel '5'"—Lots Numbered 111 and 112 on the west side of Chestnut Street in the said Township of Mersea according to registered plan 751, being a sub-division of the north part of Lot Number six (6) in the First Concession of the Township of Mersea.

"Parcel '6'"—The north part of Reserve "B" as shown on registered plan Number 751, of a part of the north east part of Lot Number Six (6) in the First Concession of the Township of Mersea and which said parcel of land may be more particularly described as follows:

Commencing at the northwest angle of Lot number 111 in said registered plan; thence running south along the western limits of the said lots 111 and 112 to the southwest boundary of said lot 112 one hundred and two (102) feet; thence west parallel with the southern boundary of said lot one hundred and twelve, thirty-three (33) feet to the westerly limit of said reserve "B"; thence north along the last mentioned limits one hundred and two (102) feet to the northerly boundary thereof; thence easterly along said northerly boundary thirty-three (33) feet to the place of beginning.

"Parcel '7'—Lots 113 to 124 inclusive on the west side of Chestnut street in said Township of Mersea according to Plan 751 and that part of reserve "A" lying westerly of the west side of Chestnut street produced southerly to the lands of Wm. S. Settrington and also the balance of the reserve "B" lying immediately west of said lots number 113 to 124 inclusive.

This property includes all the property lying west of Chestnut Street and south of the Grantee's lands west to property owned by Vernor Fox and north of the property owned by the said Wm. S. Settrington.

"Parcel '8'—The premises now owned by H. J. Heins Company east of the Town of Leamington, the said premises being a part of Lot Number Seven (7) in the First Concession of the Township of Mersea, and being more particularly bounded and described as follows, to wit:

Beginning at the point of intersection of the east limit of the Town of Leamington with the north easterly line of the property of the H. J. Heins Company, the said line being also the south westerly boundary of the right of way of the Michigan Central Railway Company; thence south along the said east limit of the Town of Leamington to the southerly line of H. J. Heins Company property; the said line being also the northerly line of property now or late of Gordon Curtis; thence east along the said southerly line of H. J. Heins Company property to the south westerly line of the said right of way of the Michigan Central Railway Company. thence by an arc in a north westerly direction along the said right of way and the north easterly boundary of H. J. Heinz Company property to the place of beginning, be and the same is hereby annexed to the Corporation of the Town of Leamington upon the terms and conditions as follows:

1. That the said annexation shall take effect on, from and after December 31st, 1933.

2. All adjustments pursuant to the provisions of Section 38 of "The Municipal Act" shall be made as of the thirty-first day of December, A.D., 1933.

PROCEDURE FILE A-4825

In the matter of the Application of the Corporation of the City of Ottawa, under section 398 of "The Municipal Act", for approval of its Restricted Area By-law Number 7748, being a By-law to restrict the use of land and the erection or use of

buildings on land for any purpose other than that of a detached private dwelling house, within that area in St. George's Ward in the said City, therein defined, as amended by By-law Number 7786.

February 8th Amending By-law No. 7786 filed.

February 8th Application granted. By-law 7748 as amended by By-law 7786 approved. City Solicitor to draft Order.

February 13th Draft Order filed.

February 14th Order issued.

November 16th, 1933

ORDER

THE APPLICATION of the Corporation of the City of Ottawa, under Section 398 of "The Municipal Act", for approval of its By-law No. 7748 restricting the use of land and the erection or use of buildings on land for any purpose other than that of a detached private dwelling house within that area in St. George's Ward in the said City therein defined, having come on to be heard at the Court House, Ottawa, on Thursday, the 16th day of November 1933, pursuant to an appointment given the Board and dated the 19th day of October, 1933, in the presence of Counsel for the Corporation and of Counsel for one owner of property affected by the said By-law, and it appearing that notice of the said Application had been duly served on all the owners of property affected by the said By-law by mailing thereto a copy of the said appointment and of the said By-law by registered letter at least ten clear days before the date fixed for the hearing of the said Application; and upon hearing what was alleged by Counsel aforesaid both in favour of and in opposition to the said By-law, and it appearing to the Board to be desirable that the Council of the Corporation should amend the said By-law by excluding from the area of land therein defined the westerly half of the block bounded by Templeton Street, Blackburn, Mann and Coulburn Avenues and the northerly 100 feet and the southerly 100 feet of the easterly half of the said block, and the Board having directed that this Application should stand over until the said amendment should be made, and the said Council having duly passed By-law Number 7786, a By-law amending By-law Number 7748 by excluding therefrom the westerly half of the block bounded by Templeton Street, Blackburn, Mann and Coulburn Avenues and the northerly 100 feet and the southerly 100 feet of the easterly half of the said block, a certified copy of which has been filed with the Board.

(1) THE BOARD HEREBY APPROVES of By-law Number 7748 as amended by By-law 7786.

(2) AND THE BOARD DIRECTS that its fee for Law Stamps to be affirmed to be affixed to this Order shall be Fifteen Dollars.

(Assessment Appeal)

(Re: Property Nos. 18 to 22 Dundas Square)

(\$93,600.00)

Jan. 8th. Notice of Appeal filed.

Nov. 8th. Hearing, 10.00 to 11.45 A.M., at the Board's Chambers.
Hearing concluded; Judgment reserved.

Nov. 26th. Judgment delivered— Assessment reduced to \$58,500.

Dec. 28th. Draft Order filed by the City of Toronto.

Dec. 29th. Order issued.

JUDGMENT

This appeal is with respect to the property situate and facing upon Victoria Street, and Dundas Square, and backing upon O'Keefe's Lane. The appeal is upon the grounds that the property is over-assessed in respect of land value. Upon the Assessment Roll the land divided into two lots was assessed at \$93,600.00. The Court of Revision reduced the assessment by \$14,000.00, to a total sum of \$79,600.00. The owner appealed for a further reduction to the County Judge, and from his refusal to alter the decision of the Court of Revision the appeal is continued to the Board.

The property in question is an irregularly shaped lot, result of the diversion of Dundas Street easterly from Yonge Street to Victoria Street, a work undertaken by the City Corporation about ten years ago, and except that an existing building at the westerly end of the property has been used for tailoring or other mercantile purpose the balance of the property has only been usable for some years as an automobile parking station.

The Agent for the property has testified as to his unsuccessful efforts to have the property put to more advantageous uses during recent years, but up to the present time he has not been able to attract any person to use the property for any suitable purpose.

Except as to the prices paid for the property by the present owner when he acquired it by two purchases made in 1924 and 1929, there is little evidence of sales of property in the locality which is of real value to the Board in coming to a determination. As to the prices paid by the owner regard must be had to the evidence given by him, and as to the reason which induced him to purchase at the amount he gave. These prices, in the opinion of the Board, are not indicative of the present value or of the real value at the time of purchase. They were highly speculative prices.

The Hermant property in the immediate vicinity has erected upon it a substantial building, but at that the land upon which the building stands is valued by the assessment department at only \$6.93 per square foot, as compared with a valuation by the same department of the land in question at \$7.16 per square foot, reduced by the Court of Revision to \$6.09 per square foot.

Taking the evidence as a whole it is difficult to see how the value of the land can be maintained as fixed by the assessment department or even as reduced by the Court of Revision. The property by reason of its location and shape and having regard to the character of other properties in the vicinity is not one for which any immediate development is discernible.

There would appear to be no purpose in the owner contemplating the erection of any substantial building at the present time, as the district is neither a retail nor an office building area, nor is there any evidence of a demand for commercial or industrial buildings in the neighborhood.

Until some new development not apparent at the moment comes to light, the probabilities are that the use to which the vacant portion of the property will be put for some time is a continuance of its present use as a parking station.

That such a use is not regarded in the Assessment Act as an advantageous one as compared with other business uses is ascertainable by reference to the scale of business assessments of ten per cent. fixed by the Act for parking stations against a minimum scale of twenty-five per cent. for any other class of business.

Nor is it reasonable to assert that the land is worth more per square foot than the Hermant property because of any potentialities which it may possess when that property which has achieved full use and had its potentialities become actualities is valued at a lower rate.

It is difficult to fix the true value of the land in question with all the uncertainties affecting the situation, and any value must be a matter of opinion. It is, however, the opinion of the Board that if a total amount of \$65,000.00 is placed as the value it will more nearly approximate the true than the amount fixed by the assessment department or Court of Revision.

We find from these facts that the land should not be assessed for more than \$58,500.00, and the Assessment Roll should be amended accordingly, by assessing the land at that figure. There will be no costs.

(sgd) C. R. McKEOWN,
Chairman.

(Sgd.) HERBERT L. CUMMINGS,
Commissioner.

Dated at Toronto the 22nd Day of November, 1934.

November 22nd, 1934.

ORDER

UPON APPLICATION of Sir William Mulock made on Thursday, the 8th day of November, A.D., 1934, by way of appeal from the decision of His Honour the Senior Judge of the County Court of the County of York in respect of the said assessments by Counsel for the said Sir William Mulock in the presence of Counsel for the Municipal Corporation of the City of Toronto, upon hearing the evidence adduced, upon reading the Exhibits filed and upon hearing what was alleged by Counsel aforesaid, and Judgment having been reserved until this day,

THE BOARD ORDERS that the said appeal be and the same is hereby allowed and that the said assessments be and they are hereby fixed at the sum of \$65,000.00 and that the value of the land be assessed for not more than \$58,500.00 and that the Assessment Roll for the year 1934 be amended accordingly.

AND THE BOARD doth not see fit to make any Order as to costs.

PROCEDURE FILE A-4945

BETWEEN:

The Executors of the Estate of James Harris, deceased,

Appellants,

—and—

The Corporation of the City of Toronto,

(ASSESSMENT APPEAL)

Re: 2 parcels—Part Lot 9, North west corner of Richmond St. West and York Street—Land—\$21,000 and \$76,081—Total \$97,081.

January 20th Notice of Appeal filed.

October 29th Hearing, 10.30 A.M.: 3.45 to 5.10 P.M. Hearing concluded; Judgment reserved.

November 26th Judgment delivered; Appeal dismissed.

December 28th Draft Order filed (by City).

December 29th Order issued.

In the Matter of the Estate of James Harris deceased, Appellants, and

In the Matter of the assessment of the property at the corner of York Street and Richmond Street, in the City of Toronto, owned by the said Estate, and

In the Matter of the appeal to the Ontario Municipal Board in connection therewith.

JUDGMENT

The Harris Estate owns the property at the northwest corner of York Street and Richmond Street, and upon the Roll it is assessed in two parcels, as follows:

York Street—82 feet 3 in. x 125 feet—Land	\$76,081
Richmond Street—42 feet x 110 feet. 10 in.—Land	21,000
	\$97,081

The Court of Revision and County Judge have confirmed the assessment of the York Street lot but the Court of Revision reduced the land assessment of the Richmond Street lot by \$25.00 per foot, or \$1,050.00, thus reducing that property to \$19,950.00, and the aggregate to \$96,031.00.

The owner applies to the Board for a further reduction in assessment and the principal evidence in support is that of Mr. Ponton, real estate valuator of Toronto.

The property, that is the two parcels, is used as a "parking" lot for automobiles and as might be expected the rental obtained from that use is not in any way commensurate with the values put upon the property by the Assessment Department. The revenue statement shows an operating loss.

It is impossible, for the Board to determine the value of the property by reference to its use or operating loss resulting from such use.

The late Mr. Harris whose estate now owns the property purchased it in December, 1928, for \$155,500, but there is a doubt under all the circumstances as to whether that price is really indicative of true value. That price was somewhat speculative and included some buildings which were removed prior to 1933.

Mr. Ponton for the owner attempts to depreciate the price of \$155,500 by a double method. He first of all deducts 20% for inflation and loss of buildings and then from the reduced amount of \$124,400 he makes a further reduction of 40% on account of General depreciation and for loss in value by reason of University Avenue Extension, leaving a value in 1933 of \$74,640.

No definite reason is assigned by Mr. Ponton for deducting 20% for inflation and loss of building. It may be an educated estimate, but it savours more of a recognition of the fact that the price of \$158,500 must be gotten away from.

And it is also difficult to appreciate why a further reduction of 40% should be allowed because University Avenue has been extended south of Queen Street. There is no evidence submitted as to any development having occurred on University Avenue, although it may be assumed that traffic flow along York Street has been reduced by reason of such street extension.

Other methods employed by Mr. Ponton in arriving at the same value of \$74,000 or thereabouts are not convincing.

The situation with which the Board finds itself faced is that while the Appellant may be correct in his contention that the property is over-assessed there is no evidence sufficient in character or weight to justify any reduction being made and in the absence of such evidence the Board feels itself compelled to dismiss the appeal. There will be no costs.

(Sgd) C. R. McKEOWN,
Chairman.

(Sgd) HERBERT L. CUMMINGS,
Commissioner.

Dated at Toronto, the 22nd day of
November, 1934.

November 22nd, 1934

ORDER

Upon the Application of the Estate of James Harris made on Monday the 29th day of October, 1934, by way of appeal from the decision of His Honour the Senior Judge of the County Court of the County of York in respect of the said assessment, by Counsel for the Estate of James Harris, deceased, in the presence of Counsel for the Corporation of the City of Toronto, upon hearing the evidence adduced, upon reading the Exhibits filed, and upon hearing what was alleged by Counsel aforesaid, judgment having been reserved until this day.

The Board Orders that the said appeal be and the same is hereby dismissed, and that the assessment of the lands of the appellant in the City of Toronto, being 82 feet 3 inches by 125 feet on York Street, and 42 feet by 110 feet 10 inches on Richmond Street, as fixed by the Court of Revision and confirmed by the County Judge of the County of York, be and the same is hereby confirmed.

An the Board doth not see fit to make any Order as to costs.

PROCEDURE FILE A-4950

BETWEEN:

Imperial Oil Limited,

Appellants,

—and—

The Corporation of the City of Toronto,

Respondent.

(ASSESSMENT APPEAL)

Re: Northwest corner King and Church Streets—Land—\$134,876;
Building—\$550,000. Total—\$684,875.

January 24th Notice of Appeal filed.

November 8th. Hearing, 10.30 A.M.: 11.45 A.M. to 4.45 P.M.. Hearing concluded; Judgment reserved.

November 26th Judgment delivered. Assessment of land on King Street fixed at \$83,875, and Court Street \$16,583; Building \$450,000—Total of \$550,458.

December 28th Draft Order filed (by City)

December 29th Order issued

In the Matter of the Imperial Oil Company, Limited, and

In the Matter of the assessment of the property at the corner of King Street and Church Street, and on Court Street, in the City of Toronto, owned by the Appellant, and

In the Matter of the appeal in connection therewith from the County Judge of the County of York to the Ontario Municipal Board.

JUDGMENT

The Appellant owns and has its main offices at the premises situate at the north-west corner of King Street and Church Street running to Court Street at the rear and upon the Assessment Roll it was assessed—

Land (King Street) 55 feet x 155 feet 6 inches at \$2000 per ft.	
(Court Street) 82 ft. 11 inches x 75 ft. 7 inches at \$300 per ft. —	\$134,875
Building	550,000
	\$684,875

The learned County Judge reduced the land assessment on King Street to \$200.00 per foot, and also reduced the building assessment by \$10,000.00; thus when the matter comes before the Board the Roll has been amended to be read as follows:—

Land (King Street) 55 feet x 155 feet 6 inches at \$1800 per ft)	
(Court Street) 82 ft. 11 in. x 7 ft. 7 in. at \$200 per ft.	\$115,583
Building	540,000
	\$655,583

The appeal to the Board is limited to the King Street parcel and the building, and the evidence is confined to two expert real estate valutors, W. H. Rosley for the owner and V. H. Edwards for the City Corporation, and they are greatly at variance in their valuation.

The two valuations are as follows:

King Street lot 55 ft. x 155 ft. 6 in.

	<i>Bosley</i>	<i>Edwards</i>
Land	\$ 50,000	\$137,500
Building	375,000	627,920
	\$425,000	\$765,420

Mr. Bosley gives the land value at \$50,000.00 and the whole property, land and buildings, he says have a value at an average amount to a total of \$425,000.00. It is not clear whether this total includes the Court land assessment, or whether that is additional. I assume it is additional, and that \$16,583.00 has to be added to give a total for the whole property of \$441,583.00.

Similarly \$16,583.00 should be added to Mr. Edwards' valuation to put it at \$782,000.00 for the whole property.

Mr. Bosley, however, in dealing with replacement cost of the building less depreciation gives a depreciated value of the existing building at \$586,000, but maintains that such amount is in excess of fair market value.

Taking the evidence as to land values first, Mr. Bosley claims that as this property is out of the financial district, and is not comparable in value with substantial properties in such district, and as the assessment department has placed

much lower valuations on properties in the neighborhood of the Appellant's lands it is impossible to support a valuation at anything like the assessment, and that \$50,000.00 is the highest figure which can reasonably be put upon the land fronting on King Street. He illustrates his contention by reference to the plan Exhibit 1 which has indicated thereon comparable assessments of other properties. In addition Mr. Bosley maintains that land values generally have depreciated from 25% to 30% as between 1929 and 1933, and points to instances of valuations and sales. One concrete example is that the Krausmen property at the southwest corner of King Street and Church Street immediately across the street from the Appellant's property is offered for sale by the owner at a total price of \$25,000.00, and no bid has been made at that amount. That property has a frontage of 44 feet and a frontage on Church Street of 96 feet.

As to the building, a statement was filed by Mr. Bosley (Exhibit 2) giving comparative assessments of the Appellant's building and other substantial downtown office buildings, which statement shows the assessment per square foot of the Appellant's building is at the rate of \$5.08 per square foot, while the next highest is \$4.18 per square foot and the average for twelve buildings, including the Appellant's, is \$3.93 per square foot.

Against such evidence is that of Mr. Edwards who estimates the land to be worth \$2,500.00 per foot, and in support of that value the witness contends that this property is within the office zone, and is comparable in land value with many other office premises in the down-town area. He points to the fact that the Imperial Oil Company in 1925 purchased the rear portion of the property for \$140,000, and the front portion on King Street and Church Street in 1929 for \$155,000.00, and that the buildings in existence at the times of the two purchases were old and of comparatively little value.

Mr. Edwards' valuation of the building is arrived at by estimating the replacement cost less depreciation, and computing the depreciated present (1933) value to be \$627,920.00.

The task of the Board is to scrutinize this conflict of opinion and weigh the probabilities.

From all the evidence it is impossible, in my opinion, for it to be successfully maintained that the Imperial Oil Company property is now, if it ever were, within the zone or area of influence of the down-town business section of Toronto so as to give to the property the substantial values which attach to the sites of the many important office buildings mentioned in the evidence, and any comparisons of values which may be made with respect to such properties cannot help but direct one to a conclusion that the assumption upon which the assessment department and its expert valuator have proceeded will not stand up under close scrutiny.

The weight of evidence indicates that while the property of the Appellant may well suit its purposes and have some special adaptability and value to the Appellant, yet no person seeking to erect a substantial office building as a commercial venture would do so upon the property in question. Such being the case it is not possible to give to the site any value which would naturally go with a property adapted and convenient for the erection of a large office building to be rented in several and separate tenements.

Having regard to all the evidence, to comparable assessments, sales, adaptability of the property to the purposes of the Appellant, our opinion is that the site with the King Street frontage of 55 feet, and a frontage on Church Street of 155 feet 6 in. had in 1933 a value of \$1,525.00 per foot, or a total value of \$83,875.00.

As to the building a somewhat greater difficulty arises in arriving at a sound value. While it is in use for the purposes of the Appellant and of the Royal Bank as a tenant of a portion of the ground floor, it is not possible to definitely ascertain the amount by which the building increases the value of the site. That could be more readily determined if the building were open for rental by offices or suites of offices to a number of separate occupants. The weight of evidence being against any commercial venture being probable at this point, it is not possible to maintain an assessment value of \$5.08 per square foot when the average assessment value of comparable buildings is only \$3.93, and in the absence of more definite and uncontradicted evidence, the Board is of the opinion that the equitable value to be placed upon this building is at an average little above 3.93, with a total value of \$450,000.00.

In view of the evidence and basing the Board's conclusions and findings thereon and upon the weight thereof, the Board finds the value of the Appellant's property to be:

Land (King street) 55 ft. x 155 ft. 6 in. at \$1525 per ft.	\$ 83,875
(Court street) 82 ft. 11 in. x 75 ft. 7 in. at \$200 per ft.	16,583
Building	450,000
	<hr/>
Total value	\$550,458

The Board, therefore, directs that the Assessment Roll be amended accordingly. There will be no costs.

Dated at Toronto the 23rd day of
November, 1934.

Nov. 23rd 1934

ORDER

UPON THE APPLICATION of the above-named Appellant, by way of appeal from the Judgment pronounced by the Senior Judge of the County Court of the County of York, partially allowing the appeal of the Appellant from the decision of the Court of Revision of the said City of Toronto, whereby the assessment of lands and buildings of The Imperial Oil Company, Ltd, as shown by the assessment Roll for the said City of Toronto for the year 1933, under Number 272, at \$684,875.00 for land and buildings, was reduced to \$655,585.00, and this appeal coming on for hearing on the 8th day of November, 1934, upon hearing evidence adduced and what was alleged by Counsel for the Appellant and the Respondant, the Board was pleased to reserve Judgment, and coming on this day for Judgment,

THE BOARD ORDERS that the said appeal of the Appellant be and it is hereby allowed.

The Board further orders that the lands and buildings of the Imperial Oil Company, Limited, as shown by the Assessment Roll of the City of Toronto for the year 1933, under Number 272, be reduced so that the land be assessed 55' on King Street by 155' 6" on Church Street, \$83,875.00; 82' 11" on Court Street by 75' 7", \$16,583.00; building, \$450,000.00, making a total assessment for land and buildings, \$550,458.00.

_____ Total \$100,320.

January 24th Notice of Appeal filed.

October 29th Hearing, 10.30 A.M. to 2.40 P.M.—Adjourned ‘sine die’ for Argument.

November 13th Hearing continued, 10.45 to 11.00 A.M. Hearing concluded; Judgment reserved.

December 18th Judgment delivered.

IN THE MATTER of the Assessment of the property of General Steel Wares, Limited, fronting on King Street and Emily Street, in the City of Toronto, and

IN THE MATTER of the Appeal from the decision of His Honour, the County Judge of the County of York, to the Ontario Municipal Board in connection therewith.

JUDGMENT

This Appeal is with respect to the property of the Appellant Company situate at No. 177 King Street West and Nos. 21 to 25 Emily Street.

The assessments on the Roll for 1933 were as follows:

King Street—Land	\$39,875	
Building	22,000	\$ 61,875
		<hr/>
Emily Street—Land	\$13,445	
Building	25,000	38,445
		<hr/>
		\$100,320

The Court of Revision reduced the assessment of the Emily Street building to \$20,000 and the learned County Judge reduced the assessment of the King Street building to \$18,000, and thereby the aggregate assessment was reduced to \$91,320, and at that amount the matter comes before this Board with a plea for a further reduction so that the aggregate assessment be set at \$75,000, which amount is alleged to be the full value of the property.

The two properties referred to although fronting upon two streets abut upon one another at the rear, and are utilized as a whole by the Appellant Company for warehousing and showroom purposes, but it is given in evidence before the Board that their retention is not essential to the purposes of the Appellant, and they are anxious to dispose of them, and in recent years have authorized their sale at \$75,000.

The King Street property was formerly abutted upon the east by the Princess Theatre property, and was servient to that property in respect of a lane and “turning basin”, the use of which was common to both properties. The lane or right-of-way is composed of the easterly 11 feet 9 inches of the Appellant’s property extending from King Street to the south limit of the lot—a distance of 217 feet. Over this lane the Appellant has the right, which it has utilized, to erect its building for a distance of some 45 feet southerly from King Street, leaving as it was required to do a clearance of 14 feet between ground level and the base of the superstructure, The “turning basin” in 1933 consisted of an area at the south end of rear of the King Street property of a depth of 32 feet to the south limit, and for the full width of the lot from the lane itself. This area is set aside and to remain clear of buildings so that vehicles may be turned in such area.

The Princess Theatre property was evidently acquired by the City Corporation at some time prior to 1933 for the purpose of University Avenue Extension, and the only portion of that property not now occupied for highway purpose is a narrow strip of land between the Appellant's property and the westerly limit of University Avenue. This strip has a frontage of between 5 and 6 feet on King Street with a greater width (27 feet) at the southerly limit. This strip of property is owned by the City Corporation and it remains the dominant tenement in respect of the lane and turning basin above mentioned.

What the Board has to consider, therefore, with respect to the King Street property is the value of the Appellant's property on King Street and Emily St., but in light of the fact that portions of its land are subject to use as a lane and right-of-way by adjacent owners, with such part of the apportioned value of such land and right-of-way which is to be added to the Appellant's property.

To enable this to be done accurately it is necessary that the Assessment Roll be amended by an entry being made therein with respect to the lane and right-of-way, and the notation that it is a "Lane not assessed" — See Section 15a of the Assessment Act. When that correction is made, as it should be, it will then be possible to correctly assess the Appellant's property and also enter in the Roll with exempt properties the correct assessment of the City Corporation's property (the dominant tenement) accordingly as this Board apportions the value of such lane and right-of-way.

Leaving that feature for the time being, the evidence given before the Board on behalf of the Appellant which directly bears on values consists principally of the evidence of W. H. Bosley, a well known real estate broker and agent for Toronto, and H. W. Wickett, a general building contractor of Toronto.

Mr. Wickett's evidence is confined to the buildings, and having regard to his estimated replacement costs, he gives present (1933) values as follows:

King Street Building—Replacement	\$25,000	Value	\$12,000
Emily Street Building—	22,520	"	15,000

This witness states that the first mentioned building is 50 years or so old, and the other 20 years old, and that both are in bad condition and require considerable repairs to put in rentable condition. The buildings are interconnected and as developed and used are not independent in respect of heating and plumbing facilities, etc. There is evidence also that the King Street building is so constructed that the floors of the upper storeys will not bear heavy loads.

The evidence of W. H. Bosley is that while he has this property listed for sale at \$75,000 it is not worth as a whole more than \$60,000. To some extent Mr. Bosley's evidence is affected by the fact that he regards control over the adjacent strip owned by the City and fronting on University Avenue as the key which will give the Appellant's property a greater value, and until ownership of such strip is acquired he discounts the value of the existing holding, and appears to the Board too ready to discount such values.

Mr. H. Nixon of the Assessment Department as witness for the City Corporation gave general evidence supporting the assessment, and gave a much better character to the buildings than did the witness for the Appellant. It is also clear from his and

other evidence as to assessments of adjacent properties that the King Street property of the Appellant is assessed at its present rate because of its proximity to University Avenue on the supposition or in the belief that such proximity adds to the value of this and other nearby properties.

The only direct evidence as to the effect which the right-of-way over the lane has upon the value of the Appellant's property is that the Assessment Department by assessing it at \$500 per foot as compared with \$850 per foot for the remaining portion of the Appellant's property on King Street.

The only other points in the evidence necessary to be mentioned are that the City Corporation in 1932 offered to sell the strip of land next to University Avenue to the Appellant for \$12,740, but it was also stated that such strip is subject to local improvement frontage charges amounting to about \$2,000 per annum.

With this evidence before the Board the task is placed upon it of determining whether or not the assessment is correct or, if not, at what amount it should be placed.

Having regard to the heavy annual tax burdens which would have to be assessed in connection with the extension of University Avenue, the Board is unable to see what present advantage there could be to the Appellant or any purchaser from it, if the University Avenue frontage were acquired. For the present the Appellant's property must be regarded, as it now is, without reference to University Avenue or the adjacent City's strip.

It does not necessarily follow because the Appellant is anxious to dispose of the properties in question or can for its own purposes dispense with their use, that there is not substantial value, but having regard to the evidence and the weight thereof, and even making due allowance for any colouring or unreasonable discounting of values there may be in the evidence for the Appellant, we do not see how any greater aggregate value than \$77,495 can be put against the whole property including the lane and "turning basin", and before the value of the latter is apportioned.

The amount of \$77,495 above mentioned arrived at by the Board as follows:

King Street—Land—51 ft. 9 ins. @ \$600 per foot	\$31,050
Building	15,000
	<hr/>
	\$46,050
	<hr/>
Emily Street—Land—76 ft. 10 ins. @ \$175 per foot	\$13,445
Building	18,000
	<hr/>
	\$31,445
	<hr/>
Aggregate Total	\$77,495
	<hr/>

In arriving at the above mentioned values the Board has had some regard to assessments of nearby properties as one of the elements properly to be considered.

It is necessary to apportion the value of the lane and "turning basin" as between the dominant and servient properties, and as in 1933 the dominant tenement still

entitled to the use of such lane and "turning basin" had been reduced to but a narrow strip of property not capable in itself so far as one can see, of being put to any development which would require substantial use of the lane and "turning basin", we believe that the equities will be met if the value of the lane and "turning basin" is distributed as to 70% thereof to the servient tenement and 30% to the dominant tenement, which gives the following result:

Lane 11 ft. 9 ins. x 217 feet @ \$600 per foot	\$7,050	
Turning Basin 40 ft. x 32 ft. @ \$50 per foot	2,000	
		\$9,050
30% as share of Dominant Tenement	\$2,715	
70% as share of Servient Tenement	6,335	
		\$9,050

From the aggregate value of \$77,495 above stated there should be deducted \$2,715, leaving the value of the Appellant's properties to be assessed at \$74,780.

The Assessment Roll should therefore be corrected as follows:

Appellant's properties

Roll No. 72121—Land 40 ft. x 185 ft. (including apportioned value of lane No. 72121a)	\$28,335	
Building	15,000	\$43,335
		\$43,335
Roll No. 68576—Land—76 ft. 10" x 50 ft.	\$13,445	
Building	18,000	31,445
		\$74,780

There should be a new entry in the Roll as to the lane and "turning basin" as follows:

Roll No. 72121a—Lane 11 ft. 9 in. x 217 ft.
 Turning Basin 40 ft. x 32 ft.

NOT ASSESSED—Apportioned values included
 IN ASSESSMENTS ROLL Nos. 72121a

And in the portion of the Roll relating to exempted properties the assessment of the lot above referred to owned by the City Corporation should be amended by increasing the land assessment by \$2,716, the apportionment placed upon that lot of the value of the lane and turning basin.

There will be no costs.

Dated at Toronto the 13th day of December, 1934.

December 28th Draft Order filed (by City).

December 29th Order issued.

IN THE MATTER of the Guardian Realty Company of Canada, Limited, Appellants, and

IN THE MATTER of the assessment of the north-east corner of King Street and Yonge Street, in the City of Toronto, and

IN THE MATTER of the appeal to the Ontario Municipal Board in connection therewith.

JUDGMENT

This appeal concerns the property at the north-east corner of King Street and Yonge Street known as the Royal Bank Building owned by the Appellant Company:

The assessment on the Roll is entered as follows:

Land 28 ft. 3 in. x 112 ft. 2 in. at	\$ 5,500 per ft.	
27 ft. x 112 ft. 2 in. at	8,000 per ft.	
26 ft. x 112 ft. 2 in. at	12,250 per ft.	\$689,875.00
Building		850,000.00

\$1,539,875.00

This assessment was confirmed by the Court of Revision and the learned County Judge. The evidence taken before the latter is made part of the record before the Board.

In addition to the above mentioned evidence, the Board heard the evidence of V. H. Edwards, expert valuator, called by the City, and the Appellant Company called in reply as its expert valuator W. H. Bosley (who also gave evidence before the County Judge), S. E. Lyons and W. E. Barker.

This well known property is one of the larger and most important of the down-town office buildings. It was erected about 1914 and consists of some twenty storeys. The evidence is all to the effect that until recent years the property was at the heart of the down-town business section, and the site was the second most valuable in the City. The City expert maintains that this situation has not yet changed to any material extent, but the evidence for the Appellant Company is all in the contrary direction, and to the effect that there has been a definite shift of the centre of things to King and Bay Streets, with consequent lessening value of the Royal Bank Building and site.

Evidence of Mr. Norman Cloke, a valuator called by the Appellant, before the County Judge, details all the defects and depreciating features of the building, and witness claims an expenditure of \$442,000.00 would be necessary to make it modern building.

The valuations made by the experts are as follows:

	Land	Buildings	Total
Mr. Edwards (for City)	\$825,833	\$878,957	\$1,704,790
“ Bosley	609,000	600,000	1,209,000
“ Lyons	486,000	529,673	1,017,673
“ Barker	574,839	607,500	1,182,339

Mr. Edwards arrives at his land values by taking part of the site 81 ft. 3 in., fronting on King Street flankage of 90 feet on Yonge Street at \$8800.00 per foot (\$715,000.00), and the balance as 22 ft. 2 in. on Yonge Street into a depth of 81 ft. 3 in. at \$5000 per ft. (\$110,833.00). The building he cubes at 47 cents for replacement cost less 30% depreciation to give a percent value (1933) of \$878,987.00. To support such valuation Edwards points to the sale of the property at the north-east corner of King and Yonge Streets at \$16,666.00 per foot, but it later appeared that such sale was in 1923, and at over \$18,000 per foot, exclusive of building.

Bosley's land value of \$609,000 is at an average of \$7500.00 per foot, or for the corner 40 feet 7 in. at \$9,000.00 per foot, and for the inside 40 feet 7 in. at \$6,000.00 per foot. He put the replacement cost of \$1,250,000 on the building with a 50% depreciation to 1933, giving a round figure value of \$600,000.00 for the building.

Lyons put the site value at \$6000.00 per foot (\$488,000.00) and the building, allowing for depreciation and absolence at 47%, he says is now worth \$529,673.00. He gives a cube replacement cost of 46 cents.

Barber, who is secretary of the organization known as the "Building Owners and Managers Association", and as such has somewhat intimate knowledge over a

long period of years of most of the down-town office buildings, says as the result of his experience and knowledge that the site value is \$7000.00 per foot (\$574,839.00), and the building which he cubes at 46 cents for replacement is depreciated to \$607,500.00. Barber puts the useful life of office buildings at thirty--five years.

So the Board has two schools of thought, and two extremes, and two middle-course values for consideration to weigh in coming to conclusion, and while the evidence of both Bosley and Barber is the more reliable and reasonable, one cannot help but feel that Bosley is a little too severe in his depreciation of the King-Yonge area, and Barber is from the returns he has been receiving in recent years apt to have his judgment linked with undue pessimism.

Taking a general view of the evidence and weighing it all carefully, the Board has come to a definite conclusion that while the present assessment of the property is excessive because of the failure (or perhaps reluctance) of the Assessment Department to recognize that there is a trend away from the King-Yonge area the centre of business life, yet that trend is not so definitely established as to justify the depreciation which the Appellant's experts extend. The Board is, therefore, of the opinion that for 1933 a fair and reasonable view of the matter indicates that the property in question had a value for

Land at \$8000.00 per foot	\$650,000
Building	750,000
	<hr/>
	\$1,400,000

and directs that the Assessment Roll be amended accordingly. There will be no costs.

(Sgd.) C. R. McKEOWN,

Chairman.

(Sgd) HERBERT L. CUMMINGS,

Commissioner.

Dated at Toronto, the 22nd day of November, 1934.

November 22nd, 1934

ORDER

UPON THE APPLICATION of the Guardian Realty Company of Canada, Limited, by way of appeal from an Order of His Honour, Judge Parker, Senior Judge of the County Court of the County of York, dated the 3rd day of January, 1934, in respect of the assessment made in 1933 of the lands and buildings of the Appellant known as the north-east corner of King Street and Yonge Street in the City of Toronto, made unto this Board pursuant to appointment, on the 6th day of November, 1934, and continued on the 7th, 9th and 13th days of November, 1934, in the presence of Counsel for the appellant and for the Corporation of the City of Toronto, respondent, and upon hearing the evidence adduced, and reading the material filed, and upon hearing what was alleged by Counsel aforesaid, and Judgment having been reserved until this day,

1. THE BOARD ORDERS that the following entry on the assessment roll of the Respondent in connection with the above-mentioned assessment of the land and building of the appellant:

Land 28 ft. 3 in. x 112 ft. 2 in. at \$5500 per ft.	
Land 27 ft. x 112 ft. 2 in. at \$8000 per ft.	
Land 26 ft. x 112 ft. 2 in. at \$12,250 per ft.	
	\$ 689,875.00
Building	850,000.00
	\$1,539,875.00

be amended by assessing the lands of the appellant at the uniform rate of \$8,000 per foot and by reducing the assessment of the building of the appellant from \$850,000 to \$750,000 and that this appeal be and the same is hereby allowed accordingly.

2. The Board doth not see fit to make any Order as to costs.

November 26th Judgment delivered: Assessment reduced to—Land \$202,650 and Buildings \$120,000 — Total \$322,650.

December 28th Draft Order filed (by City).

December 29th Order issued.

IN THE MATTER of the Globe Realty Corporation, Limited, Appellants, and

IN THE MATTER of the assessment of its property known as Nos. 10 and 12 King Street East, Toronto, and

IN THE MATTER of the appeal of the Ontario Municipal Board from the decision of the Judge of the County Court of the County of York in connection therewith.

JUDGMENT

The premises Nos. 10 and 12 King Street East are owned by the Appellant Company, and consist of a parcel of land fronting 48 feet 3 inches on King Street with a depth of 110 feet, and on the land is erected a six-storey office building with basement portion of the ground and lower floors being occupied by the Royal Bank which bank controls the Appellant Company by its stock holdings.

The Assessment Roll gave the assessment as follows:

Land at \$4800.00 per foot	\$231,600.00
Building	150,000.00
	\$381,600.00

The learned County Judge has reduced the assessment of the land to \$4500.00 per foot, thus amending the roll to

Land at \$4500.00 per foot	\$217,125.00
Building	150,000.00
	\$367,125.00

The Appellant Company comes before the Board seeking a further reduction in respect of both land and building, and as part of the record before the Board the evidence taken before the County Judge is filed. In addition the Board heard the evidence of Mr. V. H. Edwards as expert valuator for the City, and part of the evidence of the Appellant's witnesses before the County Judge was read as part of the case in chief and reply of the Appellant Company.

Once again the Board is faced with the duty of determining the facts upon evidence in which the witnesses for each side are at great variance. The evidence given for the Appellant Company before the County Judge, which is now laid before the Board, consists of W. H. Bosley's expert valuation that the land is worth \$4,000.00 per foot (\$193,000.00), and the building \$70,000.00, making a total of \$263,000.00. Against this is the valuation made by the City's expert, giving the land a value of \$5400.00 per foot (\$260,550.00), and the building \$149,185.00, with a total of \$409,735.00.

Additional evidence given before the County Judge was that of W. F. Ferguson, premises clerk of the Royal Bank, who gave information as to revenue operating statements of the premises, rental and capital expenditures for improvements, and a table of the assessments of the property over a period of years.

Plans filed as exhibits also give useful information as to properties in the vicinity and their assessments.

It is also in evidence that in 1932 the adjacent property to the east was purchased by the present owner for \$153,000.00, after being turned over in a previous exchange made in 1931 at a figure of \$300,000. These transactions, however, are not sufficiently indicative of the values to have much weight attached to them.

Reviewing the evidence, and endeavoring to reconcile the great difference between the two expert valuers, it is apparent that the one called for the Appellant is definitely of opinion that property values have materially depreciated since 1929, and in addition that the centre of office, commercial and financial business has been shifted from the King-Yonge area to the King-Bay area. Consequently he subjects this and other properties in the vicinity to severe depreciations in value with respect to land and buildings. On the other hand the City's expert does not agree with either of such contentions, and therefore supports maintained values in the King-Yonge area as between 1929 and 1933, particularly with respect to land value.

Having regard to the weight of evidence and particularly to the established fact that there is a definite trend shifting the centre of the down-town business area from King-Yonge to King-Bay, it is impossible for the Board to find that property values on King Street East of Yonge Street can be maintained at their former level.

Taking the facts by and large the opinion is that the Appellant's property had in 1933 a value as follows:

Land at \$4200.00 per foot	\$202,650.00
Building at	120,000.00
	\$322,650.00
Total assessment value	\$322,650.00

and the Board therefore, directs that the Assessment Roll be corrected to accord with such finding. There will be no costs.

ORDER

Upon the Application of the Globe Realty Corporation, Limited, by way of appeal from an Order of His Honour, Judge Parker, Senior Judge of the County Court of the County of York, dated the 3rd day of January, 1934, in respect of the assessment made in 1933 of the lands and building of the Appellant, known as Nos. 10 and 12 King Street East, Toronto, made unto this Board pursuant to appointment, on the 6th day of November 1934, and continued on the 7th, 9th and 13th days of November, 1934, in the presence of Counsel for the Appellant and upon hearing the evidence adduced and reading the material filed, and upon hearing what was alleged by Counsel aforesaid and judgment having been reserved until this day.

1. THE BOARD ORDERS that the entry on the assessment roll of the Respondent, whereby the aforesaid lands are assessed at the rate of \$4500 per foot, and the aforesaid building at \$150,000 be amended by assessing the said lands at \$4200 per foot and the said building at \$120,000 and that this appeal be and the same is hereby allowed accordingly.

2. The Board doth not see fit to make any Order as to costs.

November 26th Judgment delivered; Appeal dismissed; assessment of County Judge confirmed.

December 28th Draft Order filed (by City).

December 29th Order issued.

IN THE MATTER of the Assessment of the property in the City of Toronto known as 14 King Street East, and

IN THE MATTER of the appeal from the decision of His Honour, the County Judge of the County of York in connection therewith to the Ontario Municipal Board.

JUDGMENT

The property known as 14 King Street East is owned by an incorporated company of the same name, that is "14 King Street East, Limited".

This particular property was assessed by the Assessor for the City of Toronto for \$209,250.00, made up as follows:

Land Assessment—41 feet on King Street by a depth of 151 feet, at a rate per foot frontage of \$4,250—	\$174,250.00
The value of the buildings	35,000.00
	\$209,250.00

The assessment above set out was confirmed by the Court of Revision, and upon appeal to the County Judge therefrom, the land valuation was reduced to \$3,900 per foot frontage, and the assessment of the buildings at \$35,000 was confirmed, making a total assessment on land and buildings of \$194,900.

From this decision 14 King Street East, Limited, by its Solicitor, Lewis Duncan, K.C., appealed to the Ontario Municipal Board. An appointment for the said hearing was fixed for the 6th day of November, 1934, at half-past ten o'clock in the forenoon, in the Board's Chambers, Parliament Buildings, Toronto, and notice thereof was sent to Mr. Lewis Duncan as solicitor for the Appellants, and to the Corporation of the City of Toronto.

The said appeal having been called on the morning of the 6th day of November, 1934, in accordance with said appointment, the solicitor for the said Appellants, Mr. Lewis Duncan, appeared, and notified the Ontario Municipal Board that although he was not withdrawing the appeal itself, he was personally withdrawing from any participation in proceedings in connection with the said appeal before the Board, and the said Lewis Duncan therefore withdrew.

No person appearing for the said company, and no evidence being offered in connection with the said appeal other than the papers filed, the Ontario Municipal Board is unable to find good and sufficient reason for interfering with the decision arrived at by His Honour, the County Judge of the County of York in connection with this assessment, and accordingly dismisses the appeal and confirms the assessment as fixed by His Honour, the County Judge.

(Sgd.) C. R. McKEOWN,
Chairman.

PROCEDURE FILE A-4975

BETWEEN:

ST. JAMES COURT LIMITED,

Appellant,

—and—

THE CORPORATION OF THE CITY OF TORONTO

Respondent.

(ASSESSMENT APPEAL)

Land and Buildings: \$245,596.00.

February 21st Notice of Appeal filed.

October 29th Hearing, 10.30 A.M.: 2.40 to 3.45 P.M. Judgment reserved. Comparisons to be furnished by the Assessment Department. (See Reporter's Notes).

December 6th Judgment delivered: Assessment of land confirmed. Assessment of building reduced to \$150,000.

December 28th Draft Order filed (by City).

December 29th Order issued.

IN THE MATTER of the assessment made by the City of Toronto against St. James Court, Limited, in respect of the land buildings on property No. 48 St. Clair Avenue West, and

IN THE MATTER of the appeal from the decision of His Honour, Judge Parker, Judge of the County Court of the County of York, in connection therewith, to the Ontario Municipal Board.

JUDGMENT

This appeal respecting the St. James Court Apartment property on the south side of St. Clair Avenue West comes before the Board at the instance of the owner in an effort to obtain a reduction in the assessment of both land and building.

This apartment property was erected a few years ago as a result of a scheme of financing which obligated the company to an indebtedness of about \$300,000.00, and it is stated that the completed cost of the building, including architects' fees, was \$215,600, and that the place cost the company \$56,400.00 in 1925.

The apartment building contains sixty suites of which fifty-eight are rentable, and vary in size from one room to five rooms, and the rentals range from \$25.00 to

\$90.00 per month, giving an average rental value for the fifty-eight suites of approximately \$43.00 per month.

The land assessment is \$56,225.00, and the building assessment has been reduced to \$177,000.00, making a total assessment of \$233,225.00.

While it is true that the total assessment is much less than the amount of money put into the property by the owner, and that the building assessment is materially less than the stated cost of the building, it is apparent, however, from the evidence that the building when new was not worth the amount of cost charged against it.

It would seem as if the owner, and the shareholders of the owning company, and the bonholders have not got full value for their investment, but with that aspect we are really not concerned. The point is what is the current value as of 1933 of the property in question.

From the evidence it would appear that the land assessment is not excessive with regard to sales in the vicinity and in comparison with land assessments generally in the vicinity, and on the same side of the street, and although the property immediately to the west is assessed at a lower rate per foot frontage the Board is not satisfied that the Appellant is entitled to a reduction on that account. On the contrary we believe that the assessment of the adjacent property is too low.

The Board is of the opinion therefore, that the assessment upon the land should be confirmed, but with respect to the building assessment we think there is evidence sufficiently strong to indicate an over assessment.

The architect called by the Appellant to give evidence as to the value of the building places the replacement cost at \$136,000.00 in round figures, but the Board thinks that his estimate seems on a somewhat low basis of costs, and we are not able to accept his evidence as properly establishing the present value. It is a little difficult, as in many of these cases, to determine accurately what is the true value, having regard to all the circumstances and realizing that this building is constructed in such a manner as to bring about somewhat rapid depreciation we think that the building assessment should be reduced to \$150,000.00, and we find that round sum represents the value of the building in 1933. The Assessment Roll should be amended accordingly. There will be no costs of the Appeal.

(Sgd.) C. R. McKEOWN,
Chairman.

Commissioner.

Dated at Toronto, the 3rd day of
December, 1934.

December 3rd, 1934

ORDER

UPON motion made by the Appellant St. James Court Limited, on the 29th day of October, 1934, in the presence of Counsel for the Respondent, the Corporation of the City of Toronto, by way or appeal from the decision of His Honour Judge Parker, Judge of the County Court of the County of York, on the assessment of the lands and buildings owned by the said appellant at 45 St. Clair Avenue West,

Toronto, for the year 1933, upon hearing the evidence adduced and upon hearing what was alleged by Counsel aforesaid, this matter standing over for Judgment until this day,

1. IT IS ORDERED that the decision of His Honour Judge Parker as to the assessment for the calendar year 1933 of the said lands at the rate of \$300.00 a foot, be and the same is hereby confirmed;

2. AND IT IS FURTHER ORDERED that the decision of His Honour Judge Parker as to the buildings on the said lands be varied and that the said buildings on the said lands should be assessed for the year 1933 at One Hundred and Fifty Thousand Dollars (\$150,000.00) instead of One Hundred and Seventy-seven Thousand Dollars (\$177,000.00) and that the buildings accordingly be assessed at One Hundred and Fifty Thousand Dollars (\$150,000.00) for the calendar year 1933, and that the assessment roll be amended accordingly.

of the Ontario Municipal Board, authorized under Section 17, Chap. 27, of the Ontario Statutes of 1932.

AND the said *Chairman* having heard the evidence adduced, and what alleged by counsel in respect of the Appellant and the Respondent,

The said *Chairman* was pleased to report to the Ontario Municipal Board, and the said Board having approved of said report, the same becomes the judgment of the Ontario Municipal Board, and is as follows:

THE SAID BOARD ORDERS AND DIRECTS that the Assessment Roll of the Town of Fort Frances in respect of the matters in question herein shall be confirmed, altered or amended as follows:

The Appeal of the Town of Fort Frances is hereby dismissed, and the assessment as fixed by His Honour, the District Court Judge be confirmed.

There will be no costs.

(Sgd.) C. R. McKEOWN,
Chairman.

Dated at Toronto the 17th day of
December, 1934.

PROCEDURE FILE A-4994

Application by the City of Sarnia, under section 398 of "The Municipal Act", for approval of its By-law No. 2055, restricting, to certain uses, Lots on College Avenue, from George Street to the London Road, (excepting Lots 115 and 116 on each side of College Avenue) and Lots on Queen Street, both sides, from Talfourd Street to Wellington Street.

March 7th Application and material filed.

April 4th By-law 2059 (in lieu of 2055) filed.

April 27th Hearing, 1.30 P.M. at Council Chamber, Sarnia (Vice-Chairman authorized under Section 17, Chapter 27, Ontario Statutes, 1932).

April 27th Report of Vice-Chairman: By-law to be amended by excluding Lots 21 and 22, Queen Street East, and 21 and 22 Queen Street West; also Lots 3 to 10 inclusive (there is no Lot No. 8) on George Street West. In paragraph 1 (a) insert "apartment". I recommend that the By-law be approved when so amended.

(Sgd.) J. A. ELLIS,
Vice-Chairman,

April 27th Report adopted.

May 10th By-law No. 2064 amending 2059 filed.

July 19th By-law No. 2068 amending 2059 filed.

July 19th Order, approving By-law 2059 as amended by 2068, issued.

19th July, 1934

ORDER

UPON THE APPLICATION of the said Corporation, and upon consideration of the material filed, and the *Vice-Chairman* of the Board, duly authorized under section

17, Chapter 27, Ontario Statutes, 1932) having, pursuant to Appointment, on Friday, the 27th day of April, 1934, at the Council Chamber, in the City of Sarnia, heard all Parties interested, Notice of such Hearing having been duly given as directed by the Board, and the *Vice-Chairman* on such Hearing having reported that the By-law should be amended by excluding therefrom Lots 21 and 22, Queen Street East, and Lots 21 and 22 Queen Street West; also Lots 3, 4, 5, 6, 7, 9 and 10 (*inclusive*) on George Street West; and that the words "Apartment Houses" should be inserted in the first line of Paragraph (a) of Section 1 of the By-law, immediately after the word "include", and such Report having been adopted as the Order of the Board, and amending By-law No. 2068 having been this day filed.

THE BOARD ORDERS that the said By-law No. 2059, intituled "By-law No. 2059. A By-law restricting the use of land and the erection of buildings on "land situate within certain defined areas", as amended by the said By-law No. 2068, be and the same is hereby approved.

September 20th. Agreement with Chocolate Products, Ltd., filed.

September 20th. Draft Order filed.

September 21st. Order issued.

REPORT OF COMMISSIONER

Pursuant to appointment I heard this application at the City Hall, Stratford, on Friday the 8th June, 1934, the city being represented by Mr. J. M. Riddell, City Solicitor, and evidence in support was given by Mr. Riehl, City Engineer, and Alderman Marks.

Opposing owners of premises in the vicinity were represented by Mr. Goodwin, their solicitor, and evidence was given by Mesdames Moore, Robertson, Vivian and Burgess and by Messrs. Diehl and Ferguson.

I viewed the locus after the hearing.

By-law No. 3547 is intended to permit of the use of a small building fronting on the west side of Nile Street between Ontario Street and Albert Street. The lot upon which this building is situate is the only lot in the block which fronts on Nile Street, the lots to the north and south fronting on Ontario Street and Albert Street respectively.

The block in which the property in question is situated is within a short distance of the heart of the city and has itself suffered a gradual transition from residential to business purposes, as only the easterly half of the block is now utilized for residences.

The building in question was erected many years ago for a winery, but has for some years been unoccupied. The immediate use to which it is proposed to put the building is that of a small dairy.

Naturally the occupants of adjacent residence properties seek to stem the transition in character which they fear will take place if the amending by-law is approved, and their representation are entitled to sympathetic consideration.

Having regard however to the location of the lot and building in question, its proximity to the business area, the probabilities that in due course the whole area will gradually be transformed from private residential purposes into commercial residences and business premises, and to the fact that practically the whole of the block which is not yet converted from residential purposes is not restricted. I am unable to wholly meet the views presented by the objecting owners as in my opinion it is not in the interests of the city as a whole, or in the long run of property owners in the block, that residential restrictions therein be continued in effect as at present.

To continue such restrictions would in my opinion tend towards depreciation or loss of values which attach to these properties as potential business sites.

As the transition yet to occur will be a gradual one, believe some reasonable condition should be attached to any immediate lifting of the restriction, so that the amenities of a present residential use will be protected as far as is reasonably possible.

I recommend that the city corporation be permitted to amend its By-law No. 2740 in respect of the property in question so that the present restrictions to which it is subject may be removed but subject to the condition that for at least three years from the 1st day of May, 1934, the owner and occupants thereof be prohibited from extending the present building towards the street line and that for the same period reasonable limitation be imposed as to the use to which the vacant area in front of the present building may be put so that no unnecessary annoyance may be occasioned.

It will be necessary for the city council to deal with the matter further than is contained in By-law No. 3547 and this may perhaps best be done by an agreement being entered into between the city corporation and the owner and occupants of the property which could be registered. After the expiration of the three year period the amending by-law would then become fully effective.

Subject to proof being furnished that such an agreement has been entered into I recommend that an order be made approving By-Law No. 3547.

(Sgd) HERBERT L. CUMMINGS,
Commissioner.

Sept. 21st. 1934.

ORDER

UPON THE APPLICATION of the said Corporation, such application having been duly heard pursuant to appointment by Mr. H. L. Cummings, Commissioner (duly authorized under section 17, Chapter 27, Ontario Statutes, 1932) on the 6th day of June, 1934, at the City Hall, in the City of Stratford, and upon consideration of the evidence adduced and the material filed, and upon hearing Counsel for the said Corporation and Counsel for persons appearing in opposition thereto, and upon consideration of the report filed this day by Mr. H. L. Cummings, Commissioner of the Board of such hearing, which Report has been duly adopted as the basis of the Board's Order herein,

THE BOARD ORDERS, under and in pursuant of the provisions of section 398 of "The Municipal Act" that the said "By-Law Number 3547 of the City of Stratford, being a By-Law to amend its By-law Number 2740 (as amended by By-law 3221) be and the same is hereby approved.

(Sgd.) J. A. ELLIS,
Vice-Chairman.

(Sgd) HERBERT L. CUMMINGS,
Commissioner.

In the matter of the application of the Municipal Corporation of the Town of Orillia for the general approval of the Board required under section 6 of the Town of Orillia, Act 1934. (Re Orillia Power Development).

REASONS FOR APPROVAL

This application is one made by the Corporation of the Town of Orillia pursuant to the provisions of the Town of Orillia Act for general approval by this Board of the proposed undertaking of the Town Corporation to develop electrical power at Workman's Falls on the Gull River for transmission and distribution of such power to and in Orillia and vicinity under the statutory authority conferred in that behalf.

As the matter is one of major importance to Orillia and of general importance in other respects, it is desirable to state the facts submitted to the Board and which induce it to grant the general approval requisite under the statute.

Orillia was one of the first municipalities in Ontario to undertake the public development and distribution of electrical power to meet the needs of its inhabitants and its present plant has been in operation for some thirty years. Having pioneered in the matter and being in possession of a sufficient system operated upon a profitable basis, the town authorities and ratepayers never felt it incumbent or advantageous to become associated with the greater public development and distribution of electrical power which subsequent to 1906 was undertaken by the Hydro Electric Power Commission of Ontario on behalf of the many municipalities in the province which have become partners in the "Hydro System".

Orillia has continuously and up to the present time retained its own electrical power system for itself and there appears to be no indication of any desire to depart from the policies which consistently have been followed for the past thirty years.

The present power plant for Orillia is located at Swift Rapids on the Severn River, distant some 18 miles from the town. The plant is capable of a rated capacity of 6000 h. p., but for some years owing to an increased demand for power the plant has been overtaxed to a degree which made a development of over 7000 h. p. necessary in 1933.

In addition the town commission, which is the operating authority, has for some years had a contact with the Hydro Electric Power Commission of Ontario for an interchange of power and the purchase and sale thereof under which the town system and the Georgian Bay system of the Provincial Commission were paralleled and power floated from one to the other and bought or sold. In the earlier years of the contract the town generally speaking sold surplus power to the Provincial Commission but latterly the position has been reversed and the town has become a buyer in order to overcome the shortages of its own system.

The contract referred to came to an end however in 1933, there being continued in effect only an indefinite arrangement which permitted the town to obtain the benefits of floating power and definite power in case of emergency.

The town commission being faced in 1933 with the necessity for procuring a definite supply of additional power on a permanent basis for present and future requirements had some negotiations with the Provincial Commission which proved abortive principally because of the fact that Orillia having the benefits of very low power cost has been able to produce and sell power at rates below those prevailing on the Georgian Bay System, and in consequence the basis for a supply of power by the Provincial Commission did not look attractive to the town.

The town commission therefore explored for a source of power of its own and for that purpose had the power site at Workman's Falls on the Gull River surveyed and analysed. This projected development is situated near Minden about 50 miles from Orillia and necessitates transmission that distance.

There have been presented to the Board in documentary form reports upon the proposed development at Workman's Falls, the principal report being made by John B. McRae, Consulting Engineer of Ottawa, whose name is well and reputably

known as an engineer of some eminence. These reports cover both the physical, engineering and financial aspects of the whole of the proposed undertaking.

In addition a very comprehensive survey and brief of the financial aspect of the undertaking are submitted, implemented by statements of the general financial affairs of the town, and the present and estimated future financial position of the town's electrical power and light system.

The Board held public hearing at Orillia on the 12th day of June to consider the application, receive evidence in support and to listen to any objections which might be voiced by any person interested or affected.

At the hearing one ratepayer who said he was objecting attended for a short while but then withdrew and did not return.

The case for the applicant was presented by A. B. Thompson, the Town solicitor, in his usual thorough manner and the members of the Board are indebted to him for the very able and lucid presentation of the facts of the situation, as the work of the Board has been considerably lightened thereby.

The proposal is to ultimately develop the power site at Workman's Falls in two stages, the lower stage only to be developed at the present time. The upper stage will be proceeded with as and when necessary.

The estimated gross cost of the presently planned development is \$562,000, of which it is stated that \$385,000 will be required to be borrowed by an issue of debentures by the town corporation. The remaining portion of the cost is to be met by unemployment relief grants, available surpluses and reserves and other sources, which do not require the voting of money by the council or the imposition of local taxation.

The present system has for many years had a substantial operating surplus after taking care of all requirements, and from additional statements filed at the request of the Board it would appear that when the combined system of the present and new plants gets in actual operation the revenues will within three years be more than sufficient to meet all operating expenses, fixed charges for debenture principal and interest and for depreciation.

The estimated capacity of the new development is 4200 h. p. of which some 1800 h. p. will be taken up within two years and the balance gradually over a short period of years thereafter.

The Town commission feels it imperative to have a stand-by reserve of 2000 h. p. available at once to take care of emergencies and shortages and will require that in any event.

The project is for the Town of Orillia one of considerable magnitude and not lightly to be undertaken or approved. If power could be procured by purchase elsewhere on a satisfactory basis and without undue increase in power costs the undertaking would not be justified.

The town authorities are insistent and emphatic in their statements that it is impossible to obtain a supply of additional power on a satisfactory basis or at costs which would come any where near what the cost of power will be after the proposed undertaking is in operation. At the hearing the Board requested that further effort be made to obtain a supply of power, but subsequently information was filed by the town that efforts to secure such supply on a satisfactory arrangement had failed.

Orillia is therefore faced with making one of two decisions. The one, to purchase power at an increase in cost and the other to proceed with the proposed development in the expectation that power costs will not materially be increased and that the system will remain self-sustaining so that no burden thereof will fall upon the taxpayer.

It is probable that the revenues of the town commission will for a short while not be sufficient to provide for depreciation and other reserves, and for some years there may be no surplus to pay over to the general funds of the municipality to the relief of the taxpayers. The latter result would in all likelihood ensue if power were purchased and not developed.

Orillia cannot stand still, and it cannot expect to progress if faced with a serious and permanent shortage of power.

The situation is one which requires definite action and is one which does not appear to justify undue delay in the hope that a source of power on an advantageous basis will become available in the near future.

Ordinarily it appears to have been the policy of the Legislature for some years past to frown down upon electrical developments in old Ontario except at the instance of the Provincial Commission. In this instance the Legislature recognizing that Orillia is in a unique position has given its assent to the proposed development by the town if the Board and the ratepayers approve.

Upon the facts submitted there does not appear to be any reason why the general approval of the Board should withheld. The magnitude of the undertaking appears to be justifiable and so far as can be foreseen should not prove to be a burden upon the taxpayer.

The ultimate responsibility rests upon the shoulders of these taxpayers who have the final voice as to whether or not the project should be gone on with, and the Board's approval should not avoid the taxpayers' being given the full facts so that they may vote intelligently and definitely thereon.

If the undertaking is approved by the taxpayers, the town commission will face a heavier burden of responsibility than has been the case in recent years, and efficient management will be necessary to make the scheme a success.

Upon the facts submitted and in the absence of any objections the Board feels warranted in expressing and giving its general approval as required by section 6 of The Town of Orillia Act 1934.

PROCEDURE FILE A-5058-a

Application by the Town of Orillia, under Section, 6 Subsection (2) of Chapter 113, Ontario Statutes, 1912, for approval of the withdrawal of \$45,000 from its Contingent Fund in respect to the Orillia Power Plant, for the purposes set out in Chapter 87, Ontario Statutes, 1934, and Order of this Board dated July 5th, 1934.

September 10th. Application filed.

September 13th. Application granted. Applicant's Solicitor to draft Order.
 September 15th. Draft Order filed.
 September 15th. Order issued.

IN THE MATTER of the Application of the Corporation of Town of Orillia, under subsection (2) of section 6 of Chapter 113, Ontario Statutes, 1912, for approval of the withdrawal from its Contingent Fund in respect to the Orillia Power Plant the sum of \$45,000 for the purposes set forth in Chapter 87 of the Statutes of Ontario, 1934, and in the order of this Board dated the 5th day of July, A.D., 1934.

September 13th, 1934.

ORDER

UPON THE APPLICATION of the said Corporation, and upon consideration of the material filed,

THE BOARD ORDERS, under and in pursuance of the provisions of subsection (2) of Section 6 of Chapter 113, Ontario Statutes, 1912, that the Corporation of the Town of Orillia be permitted to withdraw from the Contingent Fund in respect to its Power Plant the sum of Forty-Five Thousand (\$45,000.00) Dollars, and to use the same as required for the purposes of the works authorized by Statutes of Ontario, 1934, Chapter 87, and referred to in this Board's Order dated the 5th day of July, A.D., 1934.

PROCEDURE FILE A-5064

BETWEEN:

W. GEORGE FARLEY, Assessment Commissioner for the Corporation of the City of Toronto, and THE CORPORATION OF THE CITY OF TORONTO.

Appellants,

—and—

FAMOUS PLAYERS' CANADIAN CORPORATION, LIMITED,

Respondent.

(Assessment Appeal—Income, \$200,000.00)

May 16th. Notice of Appeal filed.

November 6th. Hearing, 10.30 A.M. to 5.30 P.M. Adjourned to 10.30 A.M. tomorrow.

November 7th. Hearing continued, 10.30 A.M. to 12 M. Hearing concluded. Judgment reserved.

November 26th. Judgment delivered: Assessable Income fixed at \$3,586.40.

IN THE MATTER of the Assessment of the famous Player's Corporation, Limited and

IN THE MATTER of the appeal from the decision of His Honour, the County Judge of the County of York, to the Ontario Municipal Board.

JUDGMENT

This matter comes before the Board by way of appeal by the City Corporation from the decision of His Honour Judge Macdonell, who allowed the appeal of the Respondent Company against its assessment for income on the Assessment Roll of the City of Toronto for 1933, and directed such income assessment be struck off the Roll.

The Respondent Company before the Board admitted however, its assessable income is \$3,586.40, but otherwise denies liability to income assessment which had been entered upon the Roll at \$200,000.00.

The Respondent Company occupies for its Head Office purposes certain office quarters in the Royal Bank Building in Toronto, and in respect of such occupation is subject to business assessment.

The Assessment Commissioner in assessing the Respondent Company for business assessment recorded the business of the Respondent Company as that of "Executive Offices".

The taxable income of the Respondent Company for 1932 is recorded upon the Roll of 1933 at \$200,000.00, and it is claimed by the City Corporation that such income was not derived from the business for which the Respondent Company is assessable. It is, therefore, liable to income assessment in respect to that amount by virtue of clause (d), subsection (1) of Section 10 of "The Assessment Act".

The Respondent Company asserts, however, that it has only one business and all its income is derived therefrom, and being liable to business assessment in respect thereof, it is not liable to assessment in respect of any portion of the income derived from such business. Its position is that the only income which it does not derive from the operation of its one and only business is the sum of \$3,586.40 which it received from investment of surplus funds in public securities, and upon which sum it is ready to pay municipal income tax.

The first difficulty which the City Corporation has to surmount in an endeavor to establish that the assessed income is not derived from the business of the company in respect of which it is assessable is occasioned by reason of the business of the Respondent Company being stated upon the Roll as that of "Executive Offices".

"Executive Offices" is a misnomer and it is descriptive of a site or location rather than of a business or occupation but if it is to be regarded as a business then as it is assessable and assessed for business under that name it cannot be assessed for income it derives from its executive occupation and operation, and the evidence before the Board indicates that the operations of the Company in all their ramifications partake of an executive nature, and except as above stated all of its income is attributable to the successful carrying out of its executive policies.

In the opinion of the Board the description "Executive Offices" is in fact a misnomer, and the Roll should be corrected to indicate clearly and properly the business of the Company, which having regard to all the evidence can best be described as that of Theatre Controller and Operator. The Assessment Roll should be amended accordingly.

The evidence indicates that the business of the Respondent may be subdivided into three main branches, either as operators of theatres which it owns, or as

operators of theatres owned by subsidiary corporations controlled by the Respondent by means of its stockholdings therein, or as operators of theatres owned by other corporations or persons, but the policy of whom or which the Respondent controls by agreement or other means.

Summing up the evidence it is apparent that the Respondent Company does not interest itself in, or have anything to do with the affairs of any theatre or theatre owner unless the Company itself by one means or another effectively controls the policies and operations of such theatres or owners. Such being the case it is impossible to establish that the company has more than one business and it is to the end that we must look and not to the means by which such end is accomplished by the Respondent.

The matter of liability of the Respondent Company to income assessment must be determined according to the provisions of the Assessment Act, and upon the facts relating to the affairs of this particular company. It may well be that other companies can be subjected to income assessment because of ability to determine that they have two or more distinct businesses. Upon the facts which are established in this case it is our opinion that the Respondent Company has only one business, and that all its investments and all income derived therefrom are made and received in connection with that business, and cannot, therefore, be assessed for income except in the sum of \$3,586.40, and we find from the facts accordingly.

The Roll should be amended both with respect to the proper description of the Respondent Company's business, and by reducing the income assessment to the figure of \$3,586.40, and to that extent the appeal is allowed. There will be no costs.

(Sgd.) C. R. McKEOWN,
Chairman.

(Sgd.) HERBERT L. CUMMINGS,
Commissioner.

Dated at Toronto the 21st day of November, 1934.

PROCEDURE FILE A-5074

In the matter of the Application of the Corporation of the Town of Merritton, to annex certain lands and premises located in the Township of Grantham and described in the said application, to the said Town of Merritton.

May 22nd. Application and other material filed.

May 22nd. Application granted. Order issued.

UPON THE APPLICATION of the said Corporation, upon reading the material filed and the approval of the Township of Grantham and upon hearing what was alleged on behalf of the applicant,

22nd May, 1934.

ORDER

The Board Orders, under and in pursuance of Section 30 of "The Municipal Act", that the Corporation of the Town of Merritton be and it is hereby per-

mitted to add and annex the following lands and premises to the said Town of Merritton, namely: ALL and SINGULAR that certain parcel or tract of land and premises situate, lying and being in the Township of Grantham, and County of Lincoln, and Province of Ontario, containing by admeasurement 6 acres, more or less, being a part of Lot II in the 9th Concession of the said Township and which said parcel or tract may be more particularly described as follows: COMMENCING at the point of intersection of the easterly boundary of the Grand Trunk Railway (Port Dalhousie Division) right-of-way with the northerly boundary produced of Elm Street in the Town of Merritton; THENCE East in the northerly boundary of Elm Street produced, 304.3 feet to a stake; THENCE North 540.8 feet to a stake; THENCE West parallel to the northerly boundary of Elm Street and its production 585.7 feet to the easterly boundary of the Grand Trunk Railway Right-of-way; THENCE South 24 degrees and 10 minutes east in said last mentioned boundary 370.7 feet to the beginning of a curve to the left; THENCE south-easterly in and along said curve 241.7 feet more or less to the point of commencement and that the said lands and premises be and the same are hereby annexed to the said Town.

2. That this Order shall take effect from the date hereof.

3. That the Township of Grantham has given approval to this order as evidenced by a Resolution of the said Township Council passed on the 3rd day of April, 1934 as well as evidenced by the approval of the same under the hand of the Reeve and Clerk of the said Township.

PROCEDURE FILE A-5075

Application by the Town of New Toronto, under section 398 of "The Municipal Act", for approval of its By-law No. 963, prohibiting the erection of dwelling houses of less than two storeys in height on land on Eleventh Street, between the Lake Shore Road and the Shore of Lake Ontario.

May 25th. Application and material filed.

June 20th. Hearing, 10.30 to 11.05 A.M., at Board's Chambers; adjourned to 10.30 A.M., June 26th, 1934, pending negotiations between Parties interested and the Town Council.

June 26th. Hearing continued, 10.39 to 10.45 A.M.: Application granted — applicant's Solicitor to draft Order.

PROCEDURE FILE A-5080

Application by the Corporation of the City of Toronto, under section 398, subsection (2) of "The Municipal Act", for approval of its By-law No. 14110, repealing Restricted Area By-law No 12958 in so far as it prevents the erection of three private detached dwelling houses on land on the south side of Briar Hill Avenue, the easterly one having a lesser frontage than 33 feet 4 inches as required by the said By-law.

June 1st. Application and material filed.

June 20th. Hearing, 10.30 A.M.: 11.05 to 11.15 A.M., at the Board's Chambers. Application granted. Applicant's Solicitor to draft Order.

June 22nd. Draft Order filed.

June 22nd. Order issued.

June 20th, 1934.

ORDER

The Application of the Corporation of the City of Toronto for approval, pursuant to section 398, subsection (2b) of "The Municipal Act", being R.S.O., 1927, Chapter 233, of its By-law No. 14110 having come on by appointment for hearing this day before this Board, in the presence of Counsel for the Applicant, the Corporation of the City of Toronto, no one appearing for the property owners although duly notified according to the said Statute and the directions of this Board given thereunder as appears by affidavit filed upon hearing read the material filed, and upon hearing what was alleged by Counsel, and it appearing that there was no opposition to the said application.

The Board orders under and pursuant to the said Statute, that By-law No. 14110 of the Corporation of the City of Toronto, being intituled "No. 14110". A By-law to repeal By-law No. 12958, "in so far as it prevents the erection of three private detached dwelling houses on the south side of Briar Hill Avenue the easterly one having a lesser frontage than 33 feet 4 inches as required by the said By-law", be and the same is hereby approved.

PROCEDURE FILE A-5107

IN THE MATTER of Section 136 of "The Ontario Municipal Board Act, 1932", and

IN THE MATTER of Mediation by the Board therunder respecting threatened strike of the employees of the Toronto Transportation Commission.

June 23rd. Conference with Parties—8.00 to 10.00 P.M., in Legislative Chamber, Parliament Buildings: The 70 men laid off by the Commission to be re-instated and wages on former basis to be paid in interim, pending negotiations between Parties.

June 29th. Hearing, 10.30 A.M. at Board's Chambers; adjourned to July 5th, at 10.30 A.M.

July 5th. Hearing continued, 10.30 A.M. to 4.00 P.M.; adjourned 'sine die'.

August 8th. Hearing continued, 11.00 A.M. to 5.00 P.M.

August 9th. Hearing continued, 10.30 A.M. to 5.00 P.M. Hearing concluded: Recommendation reserved.

August 13th. Recommendation, by Chairman and Vice-Chairman, issued.

August 13th. Recommendation, by Mr. Commissioner Cummings, issued.

IN THE MATTER OF THE TORONTO TRANSPORTATION COMMISSION, hereinafter called "The Commission", of the one part, and

IN THE MATTER of Division No. 113, AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES OF AMERICA, hereinafter called "The Employees", of the other part.

RECOMMENDATION OF THE ONTARIO MUNICIPAL BOARD.

WHEREAS the Employees and the Commission entered into an Agreement for the services to the Commission of the Employees, and for the rate of wages to be paid by the said Commission to the Employees, which terminated on the 31st day of March, 1934;

AND WHEREAS in the said Agreement there is set out a Schedule of the wages to be paid to the Employees, varying from fifty-four cents an hour to sixty-five cents an hour;

AND WHEREAS upon the termination of the said before in part recited Agreement on the 31st day of March 1934, the Commission gave notice to the Employees that thereafter and until further notice a reduction in the wages of the said Employees would go into effect;

AND WHEREAS for the purposes or arriving at an Agreement between the parties hereto, sixty cents an hour was fixed as a basic payment upon which calculations could be made, and any reduction or addition to be made to the wages should be applied in the same manner throughout the whole body of the Employees;

AND WHEREAS the Employees were unwilling to accept the proposition made by the Commission in respect to the said wages, a Board of Conciliation consisting of His Lordship, Mr. Justice Kerwin, His Honor, Judge Widdifield, and Mr. Fred Bancroft, was appointed to investigate and report as to what under the circumstances would be considered as a fair wage to be paid to the Employees;

AND WHEREAS the said Board of Conciliation made a majority and a minority report in connection with such investigation, the majority report recommending that the basic figure of sixty cents an hour be reduced to fifty-seven cents an hour, the said majority report was signed by His Lordship, Mr. Justice Kerwin, and His Honor, Judge Widdifield, and the minority report was signed by Mr. Fred Bancroft, recommending that no reduction be made in the wages of the men as they existed in the above mentioned Agreement;

AND WHEREAS the Employees refused to accept the decision of the said Board of Conciliation as set out in the majority report thereon, and in gathering assembled

threatened to go on strike, the Ontario Municipal Board, in compliance with the provision of the Statute which requires that where a strike is threatened the Board shall proceed as soon as practicable to the locality thereof, and endeavor by mediation to effect an amicable settlement of the controversy, called together the representatives of the Commission, and of the Employees, at the Board's Chambers, Parliament Buildings, on Saturday, the 23rd day of June, 1934, and it was thereby agreed by and between the parties hereto that for the purpose of averting a strike the Employees should continue the operation of the street railway system, and the Commissioners should continue the wages hereinbefore paid to the Employees under the said Agreement for the term of one month to enable the Ontario Municipal Board to endeavor to effect a settlement of the differences between the parties hereto;

Subsequent thereto meetings were held, evidence tendered, documents filed and arguments submitted by those representing the Commission, as well as those representing the Employees;

For the purpose of settling the differences, Mr. D. W. Harvey as General Manager of the street railway system, suggested on behalf of the Commission that the men should be paid at the rate of fifty-seven cents an hour, as found by the Board of Conciliation, and that as soon as the car riding public had increased in numbers 4% as compared with a similar six months term in 1933, the wages of the Employees should be advanced by one cent per hour, and when increased by 8% as compared with a similar six months period in 1933, the wages of the Employees should be increased by two cents an hour, and so on until the wages had increased to sixty cents an hour, the full amount of the basic figure in payment of the wages of the men under the above mentioned Agreement;

This proposition appealed to some of the Members of The Ontario Municipal Board as one that the men might possibly consider, but the Board was of the opinion that if the men rejected this principle as applied to the wages payable to them, the Board would not feel like pressing such a principle upon them in preference to a definite statment as to the amount payable to them by way of wages;

And the Employees, having by their Committee taken the suggestion above mentioned into consideration, rejected the same, and intimated their desire to have their wages fixed definitely rather than by way of a sliding scale;

The figures submitted to the Board by the Commission for part of 1934 showed an increase in car riders over the same period for 1933 of between 3% and 4%, and these figures were only obtainable after the Board of Conciliation appointed by the Dominion Government had passed upon the question of a fair wage, and the ability of the Commission to pay;

From the evidence submitted it would appear that the City of Toronto has for some time past been paying its other Employees a minimum figure of sixty cents an hour, the men working by the day being paid at that rate, and the garbage collector receiving sixty cents an hour, the police force receiving a much higher rate of wage, the firemen a much higher rate, and it being considered that the Toronto Railway System is an asset of the taxpayers of the City of Toronto, and that the men who are operating that system, although employed by a Commission, are nevertheless Employees of the City of Toronto, it is difficult to see why they should be

asked to accept a wage less than the other Employees working for the City of Toronto in other capacities;

The Employees receive no holidays have no pension fund, have no sick leave, and are paid only for the actual time that they work. They are required at all times to present to the public a neat and acceptable appearance, and at sixty cents an hour for eight hours a day, working five-and-a-half days a week, the average pay would be in or about \$26.40 a week per man; this figure does not appear to the Board to be in any way unreasonable, and any less figure cannot be said to be a fair wage, within the City of Toronto;

The Commission has not seriously disputed its ability to pay. Therefore, in as much as the Commission is apparently able to pay the wages heretofore paid to the men under the former Agreement, and inasmuch as the Board is of the opinion that anything less than the basic figure of sixty cents an hour would not be a fair wage for the work that the Employees are called upon to do, this Board would suggest that the Commission should enter into an Agreement with the Employees for a further term, and that the wages payable under the said Agreement shall not be less than those payable under the Agreement which terminated on the 31st day of March, 1934.

(Sgd.) C. R. McKEOWN,
Chairman.

(Sgd.) J. A. ELLIS,
Vice-Chairman.

Dated at Toronto the 13th day of
August, A.D., 1934.

THE ONTARIO MUNICIPAL BOARD

In the matter of subsection 1 of section 136 of The Ontario Municipal Board Act 1932 and a threatened strike of the employees of the Toronto Transportation Commission.

SUMMARY OF REPORT OF MR. COMMISSIONER CUMMINGS

The more extended report which I have made in this matter may be summarised as follows:

Prevailing Wages — The basic rate is 60 cents per hour and at a 44 hour week the standard weekly pay envelope for a regular trainman will contain \$26.40. The wage schedules being determined by the basic rate payable, no conclusions are to be drawn from the fact that according to class of employment or other circumstances employees may be paid more or less than at the basic rate.

Proposed Wage Reduction — The Commission proposed a wage reduction which the employees refused to accept. Negotiations proving abortive the employees asked for a Board of Conciliation which made majority and minority reports in June 1934. The majority report recommended a reduction in the basic rate to 57 cents per hour. The minority report recommended a continuance of the prevailing rate of 60 cents per hour. The employees refused to accept the recommenda-

tions of the majority and as they feared the Commission would put the majority recommendations into effect, they threatened to strike. Under the statute it then became the duty of the Municipal Board to endeavour to avert a strike.

Why Wage Reduction Proposed — Two main grounds are stated for the Commission's proposals. One that reduced revenues of the street railway system compel a cut in wages and the other that such cut is justified by reason of the decline in the cost of living since 1929.

Conclusions — Consideration of the matters involved in determining the basic rate of wages leads to the following conclusions:

1. *Conciliation Board—Majority Report.* This report is based upon a view that for comparison with 1929 it should be assumed that a 48 hour week is still effective and that extra pay for overtime, one-man car operation etc. should be considered and that the proposed reduction is below the cost of living ratio. These views not being considered as justified or conclusive, the Majority Report is with the greatest respect, not one which can be approved.

2. *Decline in Revenues of Commission.* That wages should be reduced because revenues are down would involve acceptance of an unsound principle in relation to the operation of a municipally owned public utility system which the community regards as a beneficial asset and the continued operation of which is essential. Furthermore avenues remain open for eliminating expenditures now thrown upon the Commission by the City Council but which are unfair impositions upon the street railway system.

3. *Decline in Cost of Living.* It is said that the cost of living has materially decreased since 1929 so that a wage reduction is justified. The cost of living factor in fixing wages is only one element to consider and as gauged by statistical data and relative values it is largely illusive and theoretical, and has little regard to actualities of life and to the vagaries of the human equation.

The employees are entitled to be paid a fair and proper wage having regard to the nature of their work, their duties and responsibilities etc. and it would be unsound to base wages solely upon any theoretical standards of cost of living.

4. *Proposed Sliding Scale of Wages.* It has been proposed that wages should now be reduced but should increase as the business of the system improves so that by the end of 1935 the basic rate might be 61 cents per hour. It is considered that the introduction of such a principle is unsound in the operation of a municipally owned public utility system.

Recommendations. The onus being upon the Commission to establish that a wage reduction is necessary and justified, it is considered that the Commission has failed to satisfy such onus. It is therefore recommended that the prevailing basic rate of wages (60 cents per hour) be continued in effect for (say) two years from the expiry of the last wage agreement made.

(Sgd.) HERBERT L. CUMMINGS

Commissioner.

Toronto, 9th August, 1934.

PROCEDURE FILE A-5111

Application by the Village of Forest Hill, under section 398 of "The Municipal Act", for approval of its Restricted Area By-law No. 892—Roseberry Avenue, from the Belt Line Railway southerly to Eglinton Avenue, to detached dwelling houses.

INDEX TO RAILWAY LEGISLATION

The following Index has been made with the object of continuing in chronological order all the legislation passed by the Dominion and Provincial Governments since 1867, affecting railways situated wholly or partially within the Province of Ontario.

"List No. 2" was commenced on page 272 of our Ninth Annual Report (1914), and is continued on page 172 of our Twenty-fifth Annual Report (1930) on page 165 of our Twenty-sixth Annual Report (1931), on page 160 of our Twenty-seventh Annual Report (1932), and on page 146 of our Twenty-eighth Annual Report (1933) and in the following list up to and inclusive of 1934.

THE CANADIAN NORTHERN ONTARIO RAILWAY COMPANY AND THE CAMBELLFORD,
LAKE ONTARIO AND WESTERN RAILWAY COMPANY:

(An Act to confirm an agreement between the Companies)

CANADIAN NATIONAL RAILWAYS:

Dominion Statute	28	1934
(Authorizing provision of moneys to meet expenditures, 1934, and to provide for the refunding of certain maturing financial obligations)		

MOUNT MCKAY AND KAKABEKA FALLS RAILWAY

Ontario Statute.....	281	1954
Act respecting, (Extension of time to operate)		

TEMISKAMING AND NORTHERN ONTARIO RAILWAY

Ontario Statute.....	58	1934
Act to amend Section 18 of "The Temiskaming and Northern Ontario Railway Act"		

WINDSOR ESSEX AND LAKE SHORE RAILWAY

Ontario Statute.. ..	54 (sec. 21)	1934
Section 21, "The Windsor, Essex and Lake Shore Railway Act, 1933 to remain in force until June 30th, 1935)		

FORMS THAT MAY BE USED IN CONNECTION WITH THE EXAMINATION
OF MOTORMEN

Name of City or Town

..... 193

NAME OF RAILWAY

This is to certify that, acting under "The Railway Act, 1927," R.S.O., Chapter 224, Section 265, I have fully examined the.....who is.....years of age and.....feet.....inches high, weighs.....lbs., complexion....., as to his fitness as a motorman, that the said.....is of steady habits, and is in physical ability, intelligence and general knowledge of, and experience in, this work qualified to act as motorman on any electric motor car of said Company.

I have been duly appointed an examiner under the said Act, my appointment being dated.....

Name.....

Examiner.

FORM TO BE USED BY COMPANIES IN REPORTING ACCIDENTS

ACCIDENTS Regulations under and in pursuance of Sections 275 and 276 of "The Railway Act, 1927." R.S.O., Chapter 224.

ACCIDENTS.—Every company upon the happening of an accident shall give to the Ontario Railway and Municipal Board notice thereof in writing by delivering the same at the office of the Board in the City of Toronto or by mailing it, postage prepaid, in a registered letter addressed to the Board.

Such notice shall contain a statement signed by a duly authorized officer of such company, setting forth the information and particulars hereinafter mentioned.

Such statement shall be divided into paragraphs, each of which shall include and refer to one (or one group) only of the numbered particulars hereinafter mentioned, and the paragraph referring to each respective numbered particular shall bear the number corresponding to the number hereinafter given for each such particular.

The numbers of paragraphs and the particulars to which each shall refer as aforesaid are as follows:

1. Name or names of company or companies concerned in accident.
2. Numbers of train, engine, car or motor.
3. Date and time of accident.
4. Nature of accident.
5. Exact location.
6. Name in full, address and legal addition of each persons injured or killed.
7. Age.
8. Married or single.
9. Passenger, employee or other.
10. If employee, length and nature of service with dates and periods of different occupations (if more than one).
11. If employee, character, experience, skill and fitness with respect to occupation at time of accident.
12. How engaged at time of accident and how long on duty.
13. Cause of accident, how same occurred, with full particulars and details, and diagram, if required.
14. Persons in charge, with full names, addresses and the particulars referred to in paragraphs 10, 11 and 12.
15. Result to person and particulars of injury.
16. Result to property, including amount of damage.
17. Names and addresses of all persons present at, or eye witnesses of, the accident.
18. What investigation (if any), and result of same.
19. Verdict (if any).

The Board reserves the right to require such further and other details, particulars, maps, plans, profiles, documents, models and information or illustration of any kind as to the nature of the accident and a full understanding thereof may suggest or require.

In pursuance of Sections 275 and 276 of said Act, the Board declares that all such information so given in pursuance of this regulation shall be privileged.

Signature of Officer.

N.B.—Give name of officer who fills out this report.

REGULATIONS

REGULATION AS TO HEIGHT OF CAR STEPS

Under and in pursuance of a certain order of the Board bearing date the 2nd day of June, A.D. 1909, the Ontario Railway and Municipal Board made the following regulations:

The steps on all cars hereafter constructed and used by The Toronto Railway Company and all other street and electric railways under the jurisdiction of this Board shall have steps conforming to the following regulations:

On closed single truck cars the height of the first step above the ground shall not be less than twelve nor more than fifteen inches.

On closed double truck cars the height of the first step above the ground shall not be less than fourteen nor more than sixteen inches.

On open single truck cars the height of the first step above the ground shall be not less than twelve nor more than fifteen inches, and the distance between the first and second steps and the second step and the floor of the car shall measure twelve inches and nine inches respectively.

On open double truck cars, the height of the first step above the ground shall be not less than fourteen nor more than sixteen inches, and the distance between the first and second steps and the second step and the floor of the car shall measure twelve inches and fourteen inches respectively.

REGULATION RE DRINKING WATER ON PASSENGER CARS

Every Electric Railway in Ontario, subject to the jurisdiction of the Board, shall provide in each passenger car which runs 20 miles or more, a suitable receptacle for water with paper cups attached upon or near such receptacle, and shall keep such receptacle, while the car is in use, constantly supplied with cool drinking water for the use of passengers and the conductor and motorman in charge of such car.

This regulation shall not apply to street railways in towns or cities.

Dated at Toronto, this 10th day of April, A.D. 1928.

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO
SESSIONAL PAPER No. 25, 1935

ONTARIO

TORONTO :
Printed and Published by T. E. Bowman, Printer to the King's Most Excellent Majesty
1935

THE HONOURABLE ARTHUR W. ROEBUCK,
Attorney-General and Minister of Labour.

SIR:

I have the honour to submit to you the Return of the General Election as held in the year 1934, and the subsequent by-elections as held to date.

Respectfully submitted,

C. F. BULMER,
The Clerk of the Crown in Chancery.

Toronto, January 2nd, 1935.

TO THE HONOURABLE

The Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

The undersigned has the honour to present to Your Honour the Return of the General Election as held in the year 1934, and the subsequent by-elections as held to date.

Respectfully submitted,

ARTHUR W. ROEBUCK,
Attorney-General and Minister of Labour.

Department of the Attorney-General,
January 2nd, 1935.
